Knowledge as Value , 2008-01-01 This book considers the place and value of knowledge in contemporary society Knowledge is not a self evident concept both its denotations and connotations are historically situated Since the Enlightenment knowledge has been a matter of discovery through effort and knowledge for its own sake a taken for granted ideal underwriting progressive education as a process which not only taught for and about something but also ennobled the soul While this ideal has not been explicitly rejected in recent decades there has been a tacit move away from a strong emphasis on its centrality even in Higher Education The authors address the values that inform knowledge production in its present forms and seek to identify social and cultural factors that support these values Against the background of increasingly restrictive conditions of academic work the first section of this volume offers incisive critiques of Higher Education with examples drawn from Australia and New Zealand The second group of chapters considers how academics have viewed and have tried to adapt to present circumstances The third section comprises papers that consider epistemological issues in the generation and promulgation of knowledge The chapters in this volume are indicative of the work that needs to be done so that we can come to comprehend and perhaps try and improve our relationship to learning and knowledge in the 21st Century This timely book will be of particular interest to workers in higher education it should also inform and challenge all those who have concerns for the future of the intellectual life of our civilization
