

A silhouette of a man in a suit stands in the center of the frame, facing away from the viewer. The background is a dark, atmospheric night scene of a city, with blurred lights from buildings and streets creating a bokeh effect. A bright light source in the upper left corner casts a soft glow. The overall mood is mysterious and cinematic.

McAuslane, 2012-12-06 For a research based pharmaceutical company to be successful in the 1990s it must have a strategic plan for the global development of new chemical entities Global development can be defined as an attempt to reach all major markets as rapidly as possible and for many companies these will include the United States Japan Germany France Italy UK and Canada which together represent approximately 85% of the pharmaceutical market in the developed world The mutual acceptance of foreign clinical data would reduce the time and resources required to develop a new medicine for the international market by eliminating the requirement for the routine repetition of clinical studies in local populations In Japan this has been largely based on the belief that genetic differences in responsiveness may result in a different benefit risk assessment for a new medicine while requests in Europe and the United States for local data relate mainly to methodological and cultural considerations The importance of this issue has been recognised internationally as it was one of the topics discussed at the International Conference on Harmonisation in Orlando October 1993 and it is currently on the programme for ICH3 which will be convened in Yokohama in Japan in November 1995 **Federal Register**, 2013-06 *Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriations for ...* United States. Korsgaard,2018-06-18 Christine M Korsgaard presents a compelling new view of humans moral relationships to the other animals She defends the claim that we are obligated to treat all sentient beings as what Kant called ends in themselves Drawing on a theory of the good derived from Aristotle she offers an explanation of why animals are the sorts of beings for whom things can be good or bad She then turns to Kant s argument for the value of humanity to show that rationality commits us to claiming the standing of ends in ourselves in two senses Kant argued that as autonomous beings we claim to be ends in ourselves when we claim the standing to make laws for ourselves and each other Korsgaard argues that as beings who have a good we also claim to be ends in ourselves when we take the things that are good for us to be good absolutely and so worthy of pursuit The first claim commits us to joining with other autonomous beings in relations of moral reciprocity The second claim commits us to treating the good of every sentient creature as something of absolute importance Korsgaard argues that human beings are not more important than the other animals that our moral nature does not make us superior to the other animals and that our unique capacities do not make us better off than the other animals She criticizes the marginal cases argument and advances a new view of moral standing as attaching to the atemporal subjects of lives She criticizes Kant s own view that our duties to animals are indirect and offers a non utilitarian account of the relation between pleasure and the good She also addresses a number of directly practical questions whether we have the right to eat animals experiment on them make them work for us and fight in our wars and keep them as pets and how to understand the wrong that we do when we cause a species to go extinct
