Treating the Body in Medicine and Religion John J. Fitzgerald,Ashley John Moyse,2019-05-09 Modern medicine has produced many wonderful technological breakthroughs that have extended the limits of the frail human body However much of the focus of this medical research has been on the physical often reducing the human being to a biological machine to be examined understood and controlled This book begins by asking whether the modern medical milieu has overly objectified the body unwittingly or not and whether current studies in bioethics are up to the task of restoring a fuller understanding of the human person In response various authors here suggest that a more theological religious approach would be helpful or perhaps even necessary Presenting specific perspectives from Judaism Christianity and Islam the book is divided into three parts Understanding the Body Respecting the Body and The Body at the End of Life A panel of expert contributors including philosophers physicians and theologians and scholars of religion answer key questions such as What is the relationship between body and soul What are our obligations toward human bodies How should medicine respond to suffering and death The resulting text is an interdisciplinary treatise on how medicine can best function in our societies Offering a new way to approach the medical humanities this book will be of keen interest to any scholars with an interest in contemporary religious perspectives on medicine and the body The Healing Crystals First Aid Manual Michael Gienger,2012-06-01 From acne and cataracts to sprains and vomiting this reference lists more than 100 medical conditions and describes the physical symptoms psychological ramifications and correct healing gemstones for each The most effective form of the gem is specified a polished pocket stone rather than a necklace for example and in some cases more than one kind of crystal is described to be effective A comprehensive appendix with color photos of all prescribed gemstones a guide to assembling basic home crystal kits and a bibliography are included

Traditional Medicine: Current Practice and Belief (Penerbit USM) Darlina Md. Naim,Zuraidah Mohd Yusoff,Saad Othman,2017 This book presents interesting topics on traditional practices particularly of the Malay community in women healthcare after childbirth and during the confinement period This tradition is still widely practiced despite the rapid modernization of the country The traditional practice of using plants with medicinal values is still practiced in several places in Malaysia Medicinal plant such as betel is not only evident in treating a number of diseases but is also used as a symbol of culture for example to the people in Aceh Indonesia This shows that local knowledge is the most important element in the life of a community and significant efforts to protect and preserve the knowledge must be continued

This book is an initiative to document the local knowledge of Malaysian and Acehnese society and is dedicated to students academicians as well as the general public Medicine and Religion c.1300 Joseph Ziegler,1998-07-09 This book takes a fresh look at the cultural role of medicine among learned people around 1300 It was at this time that learned medicine came to be fully incorporated into the academic system and began to win greater social acceptance Joseph Ziegler argues that physicians and clerics did not confine the role of medicine to its physical therapeutic function and that fusion rather than disjunction characterized the relationship between medicine and religion at that time Much of this argument relies on language analysis and on a close study of unedited manuscript sources By juxtaposing the spiritual writings and the medical output of two learned physicians Arnau de Vilanova c 1238 1311 and Galvano da Levanto fl 1300 Dr Ziegler shows that they saw a medical purpose namely to ensure the spiritual health of their audience and to reveal the mysteries of God and creation When entering the spiritual realm both brought to it a medical framework and extended their medical knowledge and curative activities from body to soul By examining preachers manuals and sermons the author suggests that a growing tendency emerged among clerics in general and preachers in particular to appropriate current medical knowledge for spiritual purposes and to substantiate their extensive use of medical metaphors analogies and exempla by citing specific medical authorities **The Great Physician's Rx for Heartburn and Acid Reflux** Jordan Rubin,Joseph Brasco, **The Publishers Weekly** ,2002 Pastoral Care and Western Medicine Christopher W. Bogosh,2009-05 Western medicine is not only a science that has relieved much suffering in the world it is also a philosophy that stands contrary to biblical Christianity Medical science can offer physical help but it cannot answer the most profound questions asked by the suffering and dying Why am I sick Why did I contract this disease Why am I dying Only the Bible offers adequate and satisfying answers to such questions Author Christopher Bogosh navigates the waters of modern medical practice and its underlying assumptions and presents biblically informed answers to questions about illness disease death and dying Here is valuable guidance for pastors on becoming part of the healthcare team counseling those facing the end of life and making choices about medical care Indeed this book provides all Christians with help and hope that is based in sound theology and biblical ethics Christopher W Bogosh RN B Th is the Director of Clinical Services and Education for Christian Community Care an alternative end of life care consultative advocacy and educational ministry Rev Bogosh has written several booklets on end of life issues a published article and most recently has authored The Physiology of Hope How People Persevere in the Face of Death Chris his wife Robin and son Noah reside in Yulee Florida
