Religion and Global Order John L. Esposito, Michael Watson, 2000 An important exploration of the role and significance of religious ideas and ideology in the field of global order in the face of the political and economic social environmental and ecological changes of the 21st century comprising eleven in depth essays by renowned scholars

Religion in Global Civil Society Mark Juergensmeyer, 2005-11-03 The extraordinary changes in world society at the beginning of the 21st century have involved religion to a degree that would have amazed earlier observers of modernity Within the past decade religion has been associated with some of the world's most strident forms of political encounter including new movements of nationalism the clerical leadership of political sects and the religiously motivated acts of terrorism Religion seems to be trying to tear the planet apart even as other cultural forces seem to be trying to pull it together The technology of the Internet film television cell phones and other forms of rapid universal communication seem to be knitting the world into a single social fabric Consumer franchises and popular culture seem to be making the world a single global city Religion seems to be at odds with all of this Is religion the natural enemy of globalization The essays in this volume explore the difficulties and possibilities of a diversity of religious groups occupying the same civil society The authors avoid simplistic generalizations Religion they show is not only identified with the culture and politics of the hostile anti urban village it is not simply the jihad that Benjamin Barber identified as the opponent of the homogenous global culture of McWorld True some religious activists have blown things up But others have tried to smooth things over Even the religious opposition to globalization is nuanced Some violent activists like Hindu extremists in India want a new religious state Others like Christian militias or al Qaeda envision a transnational religious entity a kind of religious globalization to supplant the secular one Prophetic religious voices call for moderation justice and environmental protection Religion these essays demonstrate plays diverse and sometimes contradictory roles in the new cultural globalization In a global culture the shared values of different religious traditions can provide a collective sense of virtuous conduct in public life But religion can also support the position of enemies of global society those who see in globalization the effort to impose the values and power of one country over the others

Black Theology--Essays on Global Perspectives Dwight N. Hopkins, 2017-06-15 Since its start in 1966 black liberation theology in the United States has continually engaged international developments with Africa and the entire world But after Nelson Mandela was released from prison in February 1990 there has been an almost twenty year break in books on black theology and international affairs Black Theology Essays on Global Perspectives bridges that post 1990 gap and makes a vital contact with Africa again This book conceptualizes black theology to take on the global reconfigurations and opportunities brought about by the rapidly shrinking earth of fast paced worldwide contacts In other words in the specificity of the genealogy of black theology we need to reforge ties with Africa This claim is based on tradition And in the generality of the larger worldwide intertwining of technologies and economics we need a new type of black theological leadership for the twenty first

century This claim is based on today's international challenges The essays in this book draw on tradition and point forward in the midst of today's worldwide challenges and favorable possibilities given the closeness of all nations and the varieties of cultures

Religion in the Context of Globalization Peter Beyer, 2013-07-24

Peter Beyer has been a central figure in the debate about religion and globalization for many years. This volume is a collection of essays on the relation between religion and globalization with special emphasis on the concept of religion, its modern forms, and on the relation of religion to the state. Featuring a newly written introduction and conclusion which frame the volume and offer the reader guidance on how the arguments fit together, this book brings together ten previously published pieces which focus on the institutional forms and concept of religion in the context of globalizing and modern society. The guiding theme that they all share is the idea that religion and globalization are historically, conceptually, and institutionally related. What has come to constitute religion and what social roles religion plays are not manifestations of a timeless essence called religion or even a requirement of human societies. In concept and institutional form, religion is an expression of the historical process of globalization; above all, during modern centuries, what religion has become is one of the outcomes of the successive transformations and developments that have brought about contemporary global society. Including some of the most important theoretical work in the field of religion and globalization, this collection provokes the reader to consider paths for future research in the area and will be of great interest to students and scholars of religion and politics, globalization, and religion and sociology.
