*Media and New Religions in Japan* Erica Baffelli, 2016-02-05 The Open Access version of this book available at [www.taylorfrancis.com/books/9781135117849](http://www.taylorfrancis.com/books/9781135117849)

has been made available under a Creative Commons Attribution Non Commercial No Derivative 4.0 license Japanese new religions shinshūkyō have used various media forms for training communicating with members presenting their messages reinforcing or protecting the image of the leader and potentially attracting converts In this book the complex and dual relationship between media and new religions is investigated by looking at the tensions groups face between the need for visibility and the risks of facing attacks and criticism through media Indeed media and new technologies have been extensively used by religious groups not only to spread their messages and to try to reach a wider audience but also to promote themselves as a highly modern and up to date form of religion appropriate for a modern technological age In 1980s and early 1990s some movements such as Agonshō Kōfuku no Kagaku and Aum Shinrikyō came into prominence especially via the use of media initially publications but also ritual broadcasts advertising campaigns and public media events This created new modes of ritual engagement and new ways of interactions between leaders and members The aim of this book is to develop and illustrate particular key issues in the wider new religions and media nexus by using specific movements as examples In particular the analysis of the interaction between media and new religions will focus primarily on three case studies predominantly during the first period of development of the groups

**Japan's Holy War** Walter Skya, 2009-04-03 Japan's Holy War reveals how a radical religious ideology drove the Japanese to imperial expansion and global war Bringing to light a wealth of new information Walter A Skya demonstrates that whatever other motives the Japanese had for waging war in Asia and the Pacific for many the war was the fulfillment of a religious mandate In the early twentieth century a fervent nationalism developed within State Shintō This ultranationalism gained widespread military and public support and led to rampant terrorism between 1921 and 1936 three serving and two former prime ministers were assassinated Shintō ultranationalist societies fomented a discourse calling for the abolition of parliamentary government and unlimited Japanese expansion Skya documents a transformation in the ideology of State Shintō in the late nineteenth century and the early twentieth He shows that within the religion support for the German inspired theory of constitutional monarchy that had underpinned the Meiji Constitution gave way to a theory of absolute monarchy advocated by the constitutional scholar Hozumi Yatsuka in the late 1890s That in turn was superseded by a totalitarian ideology centered on the emperor an ideology advanced by the political theorists Uesugi Shinkichi and Kakehi Katsuhiko in the 1910s and 1920s Examining the connections between various forms of Shintō nationalism and the state Skya demonstrates that where the Meiji oligarchs had constructed a quasi religious quasi secular state Hozumi Yatsuka desired a traditional theocratic state Uesugi Shinkichi and Kakehi Katsuhiko went further encouraging radical militant forms of extreme religious nationalism Skya suggests that the creeping democracy and secularization of Japan's political order in the early twentieth century were the principal causes of the terrorism of the 1930s which ultimately led to a holy war against Western civilization

**Bibliography of Japanese New Religious Movements** Peter B Clarke, 2013-12-16 Containing some 1500 entries this new bibliography will be widely

welcomed for its comprehensive brief and for the sub section profiling principal NRMs converging history beliefs and practices main publications braches worldwide and membership      Bibliography of Japanese New Religions, with Annotations and an Introduction to Japanese New Religions at Home and Abroad Peter Bernard Clarke,1999 Containing some 1500 entries this new bibliography will be widely welcomed for its comprehensive brief and for the sub section profiling principal NRMs converging history beliefs and practices main publications braches worldwide and membership      Civil Society, Religion, and the Nation ,2022-05-20 Japan Russia and Turkey are major examples of countries with different ethnic religious and cultural background that embarked on the path of modernization without having been colonized by a Western country In all three cases national consciousness has played a significant role in this context The project of Modernity is obviously of European origin but is it essentially European Does modernization imply loss of a country s cultural or national identity If so what is the fate of the modernization process in these cases The presence of the idea and reality of civil society can be considered a real marker of Modernity in this respect because it presupposes the development of liberalism individualism and human rights But are these compatible with nationalism and with the idea of a national religion These questions are the more pressing as Japan is considered part of the Western world in many respects and Russia and Turkey are defining their relation to the European Union in different ways An investigation of these three countries set off against more general reflections sheds light on the possibilities or limitations of modernization n a non European context      The "Greatest Problem" Trent E. Maxey,2020-05-18 At its inception in 1868 the modern Japanese state pursued policies and created institutions that lacked a coherent conception of religion Yet the architects of the modern state pursued an explicit religious settlement as they set about designing a constitutional order through the 1880s As a result many of the cardinal institutions of the state particularly the imperial institution eventually were defined in opposition to religion Drawing on an assortment of primary sources including internal government debates diplomatic negotiations and the popular press Trent E Maxey documents how the novel category of religion came to be seen as the greatest problem by the architects of the modern Japanese state In Meiji Japan religion designated a cognitive and social pluralism that resisted direct state control It also provided the modern state with a means to contain regulate and neutralize that plurality      **Japanese Religions on the Internet** Erica Baffelli,Ian Reader,Birgit Staemmler,2013-05-13 Japanese Religions on the Internet draws attention to how religion is being presented represented and discussed on the Japanese Internet Its intention is to contribute to wider discussions about religion and the Internet by providing an important example based on one of the Internet s most prominent languages of how new media technologies are being used and are impacting on religion in the East Asian context while also developing further our understandings of religion in a technologically advanced country Scholars studying the relationship of religion and the Internet can no longer work on prevailing notions that have thus far characterised the field such as the assumption that the Internet is a Western centric phenomenon and that studies of English language sites relating to religion can provide a viable

model for wider analyses of the topic Despite this growing amount of research on religion and the Internet comparatively little has focused on non Western cultures The general field of study relating to religion and the Internet has paid scant attention to Asian contexts The field needs a full length and comprehensive study that focuses on the Japanese religious world and the Internet not merely to redress the imbalances of the field thus far but also because such studies will be central to the emerging field of the study of religion and the Internet in future They will provide important means of developing new theories constructing new paradigms and understanding the underlying dynamics of this new media form Religion in the Military Worldwide Ron E. Hassner, 2014 This volume is the first to offer a comparative analysis of religion in militaries worldwide

**China Developing: Cultural Identity Of Emerging Societies** George Fusun Ling, 2008-03-13 This book deals with the intellectual foundation of the sociopolitical economic and legal systems of developing countries using a methodological approach It calls for not only the need to search for a country's cultural identity but also a need to analyze the prevalent concepts important to a contemporary modern society such as the respect for an individual human rights freedom equality democracy and the universal respect for law Based on the author's lifelong reflection on why some of these deeply treasured Western values and institutions have not been useful in developing democracy in Asia it examines which values are applicable and which are not to Asian emerging societies Using China's historical and contemporary attempts in modernization and development the author suggests that all mighty rivers are confluences of multiple tributaries Likewise an emerging society has to recognize that the dynamism of its history would also be derived from a confluence of multiple cultural traditions As a valuable resource for decision makers of developing countries this book will help to shed some light on the potential pitfalls and fallacies they may encounter in their search for a cultural identity and values to subscribe to among the many that are circulating in our globalized world
