To each Religion there are many points of view, some of these points of view have been research and studied for years by many great scholars. Although there are various perspectives, each is entitled to their own, and there is no right or wrong way of thinking when it comes to religion. Each religion has different beliefs, practices and traditions that make them unique and interesting. One religion that is particularly engaging is that of the Indigenous peoples.

Wolhuter, Corene de Wet, 2014-05-31 This book scrutinises religion in education in ten countries It reveals much about the tension between religion and education in secular countries and the blending between religion and education in religious countries such as Iran and Malaysia as well as secular countries such as the Netherlands It also shows the important role the church currently plays in education in developing countries such as Tanzania *Geography, Religion, Gods, and Saints in the Eastern Mediterranean* Erica Ferg, 2020-01-16 Geography Religion Gods and Saints in the Eastern Mediterranean explores the influence of geography on religion and highlights a largely unknown story of religious history in the Eastern Mediterranean In the Levant agricultural communities of Jews Christians and Muslims jointly venerated and largely shared three important saints or holy figures Jewish Elijah Christian St George and Muslim al-Khi'r These figures share peculiar characteristics such as associations with rain greenness fertility and storms Only in the Eastern Mediterranean are Elijah St George and al-Khi'r shared between religious communities or characterized by these same agricultural attributes attributes that also were shared by regional religious figures from earlier time periods such as the ancient Near Eastern Storm god Baal Hadad and Levantine Zeus This book tells the story of how that came to be and suggests that the figures share specific characteristics over a very long period of time because these motifs were shaped by the geography of the region Ultimately this book suggests that regional geography has influenced regional religion that Judaism Christianity and Islam are not historically or textually speaking separate religious traditions even if Jews Christians and Muslims are members of distinct religious communities and that shared religious practices between members of these and other local religious communities are not unusual Instead shared practices arose out of a common geographical

environment and an interconnected religious heritage and are a natural historical feature of religion in the Eastern Mediterranean. This volume will be of interest to students of ancient Near Eastern religions: Judaism, Christianity, Islam, sainthood, agricultural communities in the ancient Near East, Middle Eastern religious and cultural history, and the relationships between geography and religion.

Values - Politics - Religion: The European Values Study Regina Polak, Patrick Rohs, 2023-07-18. This open access book analyses the international data of the European Values Study (EVS) 1990-2017 with a focus on the impact of religion on political values from empirical as well as theoretical perspectives, i.e. sociology, political and cultural studies, philosophy, ethics, theology, and the law. It interprets results from interdisciplinary perspectives, including the viewpoints of social ethics, sociology, and cultural studies, law, and practical theology. In the political and public as well as media debates of the European Union, the recourse to above all European and also Christian values has played a central and controversial role in the field of politics and religion for several decades. This collection is a contribution to a qualified discourse on values in Europe by providing empirical, hermeneutical, and ethical criteria for a responsible use of the concept of values. In addition to a comparison of political value systems in Western and Eastern Europe and the possible role of religion in this context, the book also deals with topics such as solidarity, economics, and values, value formation, and law and values. Additionally, specific population groups such as the socio-culturally marginalized strata are examined more closely. Besides current scientific analyses and interpretations of interest to researchers from various disciplines, this book also offers valuable impulses and suggestions for various multipliers in political civil society and religious organisations, as well as a sound overview for graduate students.
