Religious Responses to Earthquake and Volcanic Eruption Disasters

David Chester, Angus Duncan, John Duncan, 2024-07-26 This book argues that although secular and religious perspectives on disasters have often conflicted today there are grounds for believing that the world's major faiths have much to contribute to the processes of post disaster recovery and future disaster risk reduction DRR It seeks to demonstrate how contemporary dialogues between theologians disaster scholars and policymakers are defining new ways of working together These explore how the resources of religious communities e.g. buildings human resources and finance may be used to foster successful policies of DRR particularly in the aftermath of earthquakes and volcanic eruptions Musing on the relationships between religion and disasters has occurred for millennia and has affected many societies worldwide In societies where the world's major religions Buddhism Christianity Hinduism Islam Judaism and Shinto have been and remain dominant attempting to find supernatural explanations for disasters has occurred throughout history and there have been many theologies seeking to

explain why people suffer losses It is argued that developments both within these traditions of faith and in how disasters are understood by the hazard research community of researchers and planners have allowed a new modus vivendi to emerge which emphasises both a recognition of religious worldviews by academic writers and disaster planners on the one hand and a desire by people of faith and their leaders to be more fully committed to the goals of DRR The book will appeal to those who are interested in the interface between disasters and theology across the principal religions of the world This includes researchers and students in geology geography theology and religious studies It will also be useful for specialist academic audience and the educated general reader **A Companion to Greek Mythology** Ken Dowden,Niall

Livingstone,2014-01-28 A Companion to Greek Mythology presents a series of essays that explore the phenomenon of Greek myth from its origins in shared Indo European story patterns and the Greeks contacts with their Eastern Mediterranean neighbours through its development as a shared language and thought system for the Greco Roman world Features essays from a prestigious international team of literary experts Includes coverage of Greek myth s intersection with history philosophy and religion Introduces readers to topics in mythology that are often inaccessible to non specialists Addresses the Hellenistic and Roman periods as well as Archaic and Classical Greece *Under Ancient Skies* Paul Dunbavin,2005-01-01 In all of the world s myths and religions we find traditions of a Great Flood There are stories too of a Golden Age the antediluvian paradise that it destroyed Might these be real memories of the ancient world And how can we analyze the subject scientifically The key to unlock these ancient myths lies in astronomy Under Ancient Skies will examine the astronomical evidence for a prehistoric cataclysm and in the process will explore a number of related anomalies in prehistory including Was there a single great flood in human prehistory or have there been many Could the workings of ancient calendars and the records of ancient eclipses give us clues about the Flood and the antediluvian world Did the Celtic Druids use a calendar based on the orbit of Saturn and is this the same antediluvian calendar that is described in Plato s myth of Atlantis Do Hindu Chinese and Mayan cosmology myths recall the years after the Flood when our world wobbled on its axis Did these same events trigger the building of astronomically aligned monuments such as Stonehenge and the pyramids Was the Atenist religion of the heretic Egyptian Pharaoh Akhenaten inspired by a series of eclipses during his lifetime Do the seven good years and the seven bad years of the Joseph story recall a time when a comet struck the Earth Did the British Druids use astronomy to calculate the size of the Earth and could they have used this knowledge to navigate to America Why were the ancient Celts so afraid that the sky would one day fall on their heads Are comets and asteroids the only danger lurking in the cosmos or could there be other dangers as yet unknown to science In 1994 we watched as a comet struck the giant planet Jupiter Geologists have recently discovered the crater in Yucatan where an asteroid impact destroyed the world of the dinosaurs Scientists and astronomers have stopped dismissing the theory that asteroids and comets could have struck the Earth during prehistory but any suggestion that a comet impact just a few thousand years ago might have caused the

Biblical Flood remains the last taboo It is time for this prejudice too to be washed away The reader is promised a real book a fully referenced textbook with original content in every chapter and a bibliography of over 300 sources If you have read Paul Dunbavin s other books then you will know what to expect First published in 2005 and for a long time out of print this new edition will make the author s unique research available again to anyone who is interested in mythology astronomy and ancient mysteries Now also available in Kindle hard and soft editions

Poems Containing History Gary Grieve-Carlson, 2013-11-08 Ezra Pound s definition of an epic as a poem containing history raises questions how can a poem contain history And if it can does it help us to think about history in ways that conventional historiography cannot *Poems Containing History* Twentieth Century American Poetry s Engagement with the Past by Gary Grieve Carlson argues that twentieth century American poetry has contained and helped its readers to think about history in a variety of provocative and powerful ways Tracing the discussion of the relationship between poetry and history from Aristotle s *Poetics* to Norman Mailer s *The Armies of the Night* and Hayden White s *Metahistory* the book shows that even as history evolves into a professional academic discipline in the late nineteenth century and as its practitioners emphasize the scientific aspects of their work and minimize its literary aspects twentieth century American poets continue to take history as the subject of their major poems Sometimes they endorse the views of mainstream historians as Stephen Vincent Ben t does in John Brown s *Body* but more often they challenge them as do Robert Penn Warren in *Brother to Dragons* Ezra Pound in *The Cantos* or Charles Olson in *The Maximus Poems* In *Conquistador* Archibald MacLeish illustrates Aristotle s claim that poetry tells more philosophical truths about the past than history does while in Paterson William Carlos Williams develops a Nietzschean suspicion of history s value Three major American poets T S Eliot in *Four Quartets* Hart Crane in *The Bridge* and Carolyn Forché in *The Angel of History* present different challenges to professional historiography s assumption that the past is best understood in strictly material terms *Poems Containing History* devotes chapters to each of these poets and offers a clear sense of the seriousness with which American poetry has engaged
