Religion And Psychology In Transition Psychoanalysis Feminism And Theology:

Religion and Psychology in Transition James W. Jones, 2008-10-01 In this thought provoking book clinical psychologist and professor of religious studies James W Jones presents a dialogue between contemporary psychoanalytic thinking and contemporary theology He sheds new light on the interaction of religion and psychology by viewing it from the perspective of world religions providing an epistemological framework for the psychology of religion that draws on contemporary philosophy of science and bringing out the importance of gender as a category of analysis Developments in psychoanalysis provide new resources for theological reflection Jones contends The Freudian view that human nature is isolated and instinctual has shifted to a vision of the self as constituted in and through relationships Jones uses this relational model of human nature to explore the convergence between contemporary psychoanalysis feminist theorizing and themes in religious thought found in a variety of traditions He also critiques the reductionism inherent in Freud s discussion of religion and proposes nonreductionistic and genuinely psychoanalytic ways for psychoanalysis to treat religious topics For therapists psychologists theologians and others interested in spiritual or psychological issues Jones offers illuminating clinical material and insightful analysis

Race in Psychoanalysis Celia Brickman, 2017-12-06 Race in Psychoanalysis analyzes the often unrecognized racism in psychoanalysis by examining how the colonialist discourse of late nineteenth century anthropology made its way into Freud s foundational texts where it has remained and continues to exert a hidden influence Recent racial violence particularly in the US has made many realize that academic and professional disciplines as well as social and political institutions need to be re examined for the racial biases they may contain Psychoanalysis is no exception When Freud applied his insights to the history of the psyche and of

civilization he made liberal use of the anthropology of his time which was steeped in colonial racist thought Although it has often been assumed that this usage was confined to his non clinical works this book argues that through the pivotal concept of primitivity it fed back into his theories of the psyche and of clinical technique as well Celia Brickman examines how the discourse concerning the presumed primitivity of colonized and enslaved peoples contributed to psychoanalytic understandings of self and raced other She shows how psychoanalytic constructions of race and gender are related and how Freud s attitudes towards primitivity were related to the anti Semitism of his time All of this is demonstrated to be part of the modernist aim of psychoanalysis which seeks to create a modern subjectivity through a renegotiation of the past Finally the book shows how all of this can affect both clinician and patient within the contemporary clinical encounter Race in Psychoanalysis is a pivotal work of significance for scholars practitioners and students of psychoanalysis psychologists clinical social workers and other clinicians whose work is informed by psychoanalytic insights as well as those engaged in critical race and postcolonial studies Freud and Religion William B. Parsons, 2021-05-27 Offers a revised psychoanalytic theory of religion by sifting through the history of psychoanalytic models in dialogue with their multidisciplinary critiques

Climate Change and the Symbol Deficit in the Christian Tradition Jan-Olav Henriksen, 2022-02-24 Exploring how the climate crisis discloses the symbol deficit in the Christian tradition this book argues that Christianity is rich in symbols that identify and address the failures of humans and the obstacles that prevent humans from doing well while positive symbols that can engage people in constructive action seem underdeveloped Henriksen examines the potential of the Christian tradition to develop symbols that can engage peoples in committed and sustained action to prevent further crisis To do so he argues that we need symbols that engage both intellectually and emotionally and which enhance our perception of belonging in relationships with other humans be it both in the present and in the future According to Henriksen the deficit can only be obliterated if we can develop symbols that have some root or resonance in the Christian tradition provide concrete and specified guidance of agency engage people both emotionally and intellectually and finally open up to visions for a moral agency that provide positive motivations for caring about environmental conditions as a whole

Religion as

Orientation and Transformation Jan-Olav Henriksen, 2017-05-12 Religions are not primarily expressed in people's heads and their thoughts but in what they do. People use religious symbols in order to orientate or change themselves. In this way, religion is related to all realms of human life. Jan-Olav Henriksen shows that only against this backdrop can we understand the role of religions in human life. Book jacket **Religion and Psychology** Diane Jonte-Pace, William B.

Parsons, 2002-09-26 Religion and Psychology is a thorough and incisive survey of the current relationship between religion and psychology from the leading scholars in the field. This is an essential resource for students and researchers in the area of psychology of religion. Issues addressed are: The Psychology/Theology Dialogue, The Psychology/Comparativist Dialogue, Psychology/Religion and Gender Studies, Psychology as Religion, Social/Scientific Approaches to the Psychology of Religion, The Empirical Approach, International Perspectives. Relating to God, Dan Merkur, 2013-11-21 In *Relating to God*, Clinical

Psychoanalysis, Spirituality and Theism, Dan Merkur conceptualizes religious discourse within psychoanalysis. He proposes that God be treated as a transference figure whose analysis leads to a reduction of the parental content that is projected onto God. Merkur notes that religious conversion experiences regularly involve theological intuitions that are either rational or, owing to morbid complications, have undergone displacement into irrational symbolism. Analysis renders the religiosity more wholesome. Traditionally, psychoanalytic thought has been dismissive of religion. Freud is on record, however, as having called psychoanalysis a neutral procedure. He argued that religion, with its dependency on a providential God who punishes disobedience, imagines spirituality on the model of human parents and fails to approach spirituality in an appropriately scientific manner. He wrote little of spiritual phenomena but mentioned both the rationality of the universe and the parapsychological occurrence of thought transference. Occasionally, later psychoanalysts used different language in order to contrast wholesome and morbid forms of religion. Erich Fromm distinguished authoritarian and humanistic religions, while D. W. Winnicott condemned fetishistic behavior while approving of playful illusions that require belief. In these formulations, constructed a middle position for clinicians, neither categorically opposed to religion as classical psychoanalysis was, nor do they embrace cultural relativity as spiritually oriented psychotherapists are currently advocating. What sorts of spiritual practices does psychoanalysis find unobjectionable? As examples of humanistic religion, Fromm named Zen Buddhism, Buddhist mindfulness meditation, and the *via negativa* or way of negating that some Christian and Jewish mystics have followed. Because the Bible-based approaches are little known, Merkur discusses their histories, procedures, and psychoanalytic understanding. **Human Development and Faith (Second Edition)** Felicity B. Kelcourse, 2015-07-28

This book, now in its second edition, brings together the best available understandings of human development from a multidisciplinary perspective. Uniquely inclusive of the moral and faith dimensions of context and life cycle development, *Human Development and Faith* examines the interplay of mind, body, family, community, and soul at every stage of development. It addresses two central questions: What are the good enough conditions of parenting, family, and community in

each phase of life from birth to death which support growth and development What gives life adequate meaning as development proceeds If human development describes the normative and hoped for passages of life then faith provides the necessary component of meaning Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live The Journal of Pastoral Theology called the first edition of Human Development and Faith an excellent text for pastoral theology courses because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development This second edition includes a new chapter on infancy updates reflecting our growing awareness of cultural diversity and a new preface

Relating God and the Self Jan-Olav Henriksen, 2016-04-08 Religion is not only about understanding the world it is just as much about how to develop and shape the self's experience of itself Because the religious self is shaped by our symbols of God and symbols of God are also shaped by the self theology and philosophy of religion cannot ignore this interplay or the psychological dimension when they discuss what symbols of God are adequate and not By discussing critically different ways the symbol of God functions in the formation of the self the book develops a nuanced and original approach to the interplay between God and the self It suggests that play is actually an important metaphor in order to develop a dynamic understanding of religion's way of relating God and the Self This approach challenges understandings of religion focussing only its cognitive claims as well as those who emphasize doctrinal orthodoxy as the most important element in religion
