to accompany the pupil's book *The Law of Electronic Commerce and the Internet in the UK and Ireland* Steve Hedley, 2017-09-29 Internet law and electronic commerce law are new entities and as such there is some difficulty in defining this rapidly changing area of the law. Scholars are divided as to whether it is a subject in its own right or part of a broader area and there is also debate concerning its status as a new law or as old law which needs interpreting in a new way. This text helps the student to unravel this complicated area of law and provides guidance through the wealth of literature available on the topic. The text is for law students coming towards the end of their first degree or taking a Masters. The first half focuses on the principles of electronic commerce law and includes an introduction to the law of the Internet, basic concepts in intellectual property law, privacy law and data protection. The second part deals with rights and duties in the online world including liabilities, ownership and contracts. Technical operations are explained in the text as necessary and a glossary provides a guide to the more commonly encountered computer technicalities. With a supporting website providing links to online further reading, this textbook is ideal for students of e-commerce law and will provide those studying information technology law or practising commercial law with an indispensable introduction to Internet issues.

Celts, Romans, Britons Francesca Kaminski-Jones, Rhys Kaminski-Jones, 2020-09-29 This interdisciplinary volume of essays examines the real and imagined role of Classical and Celtic influence in the history of British identity formation from late antiquity to the present day In so doing it makes the case for increased collaboration between the fields of Classical reception and Celtic studies and opens up new avenues of investigation into the categories Celtic and Classical which are presented as fundamentally interlinked and frequently interdependent In a series of chronologically arranged chapters beginning with the post Roman Britons and ending with the 2016 Brexit referendum it draws attention to the constructed and historically contingent nature of the Classical and the Celtic and explores how notions related to both categories have been continuously combined and contrasted with one another in relation to British identities Britishness is revealed as a site of significant Celtic Classical cross pollination and a context in which received ideas about Celts Romans and Britons can be fruitfully reconsidered subverted and reformulated Responding to important scholarly questions that are best addressed by this interdisciplinary approach and extending the existing literature on Classical reception and national identity by treating the Celtic as an equally relevant tradition the volume creates a new and exciting dialogue between subjects that all too often are treated in isolation and sets the foundations for future cross disciplinary conversations
