- Greek political institutions found their way into Rome...the Republic was based on aristocratic rule and citizenship of the people...all citizens had a say in government but in the end were not the overall leaders
- Republican Rome had a Senate of aristocrats and two consuls who held the executive powers...in times of crisis, the Senate had the power to choose a dictator...Patricians and Plebians!
- Early Rome created the 12 Tables, a system of laws that prevented abuse of power amongst the classes...laws were always considered adaptable
- The Empire was a different beast...although the Senate remained in a meaningless state...emperors retained the confidence of the people through "bread and circuses"...it maintained local autonomy under the rule of Roman governors during its existence...rebel and the Roman military was sent to quell you!
- Rome was generally tolerant of other cultures and beliefs and religions...though they had a problem with Christians during the empire, it was only because the Christians would not put matters of the state of their God

Loewenstein, 2012-12-06 Next to the Bible Shakespeare the French revolution and Napoleon ancient Rome is one of the most plowed through fields of historical experience One of the truly great periods of history Rome over the centuries deservedly has attracted the passionate attention of historians philologists and more recently archeologists Since Roman law constituted the source of the legal life of most of Western Europe the legal profession had a legitimate interest Veritable libraries have been built around the history of Rome In the past confined mostly to Italian German and French scholars the fascination with things Roman by now has spread to other civilized nations including the Anglo Saxon Among the contributors to our knowledge of ancient Rome are some of the great minds in history and law Our bibliography selective as necessarily it has to be records outstanding generalists as well as some of the numerous specialists that were helpful for our undertaking Why then another study of the Roman political civilization and one that at least measured by volume and effort is not altogether insubstantial And why has to be added one presented by an author who whatever his reputation in other fields ostensibly is an outsider of the classical discipline These are legitimate questions that should be honestly answered By training and avocation the author is a constitutional lawyer or rather a political scientist primarily interested in the operation of governmental institutions **From Tribe to Empire** Alexandre Moret, Georges Davy, 1926 **A History of World Societies, Combined Volume** John P. parts of Anatolia and the Near East that were now placed under Roman rule Pompey's solution was to found six new cities and to convert two existing communities Zela a temple community dedicated to the goddess Ana tis and Amaseia the former royal residence into cities as well There would now be eight city states each with the responsibility of administering the territory known to the Romans as Pontus It has often been argued that in their eastern provinces the Romans based newly founded cities on the model of the Greek city state and that Roman culture had less influence there than in the West Jesper Majbom Madsen however describes civic development in Roman Pontus as a process by which Roman and Greek elements were introduced simultaneously He contends that the Pompeian cities were neither traditional Greek poleis nor entirely Roman settlements with Roman laws and legislation nor were they Greek cities gradually influenced by Roman rule Instead they represented a third category in which a citizen could be an Anatolian Greek and Roman at the same time as well as a member of the elite a priest in the imperial cult and in a cult to Asclepius a local politician and a member of the Pontic koinon all without contradiction Bringing together a wide range of literary historical and political sources From Trophy Towns to City States examines how Pompey's cities were initially organized how they developed over time and how inhabitants in this part of the Roman Empire defined themselves culturally and politically The Imperial Order Robert G.
