Owing to the rich storehouse of information it contains the poetry of Venantius Fortunatus c 535 600 has long been mined as a historical source for Merovingian society a focus that overshadows an appreciation of the poems literary value This volume offering free verse translations of Fortunatus personal poetry remains faithful to the historical sweep of the poet s lines while paying attention to the literary qualities that make these poems masterpieces of their kind The volume includes an overview of late antique Gaul Fortunatus biography interpretations of the poems prosopographical introductions maps bibliography and indices      **The Battle of Vouillé, 507 CE** Ralph W. **Urban Interactions** Michael J. Kelly,Michael Burrows,2020 This volume is dedicated to eliciting the interactions between localities across late antique and early medieval Europe and the wider Mediterranean Significant research has been done in recent years to explore how late Roman and post Roman cities towns and other localities communicated vis vis larger structural phenomena such as provinces empires kingdoms institutions and so on This research has contributed considerably to our understanding of the place of the city in its context but tends to portray the city as a necessarily subordinate conduit within larger structures rather than an entity in itself or as a hermeneutical object of enquiry Consequently not enough research has been committed to examining how local people and communities thought about

engaged with and struggled against nearby or distant urban neighbors Urban Interactions addresses this lacuna in urban history by presenting articles that apply a diverse spectrum of approaches from archaeological investigation to critical analyses of historiographical and historical biases and developmental consideration of antagonisms between ecclesiastical centers Through these avenues of investigation this volume elucidates the relationship between the urban centers and their immediate hinterlands and neighboring cities with which they might vie or collaborate This entanglement and competition whether subterranean or explicit across overarching political religious or other macro categories is evaluated through a broad geographical range of late Roman provinces and post Roman states to maintain an expansive perspective of developmental trends within and about the city
