Numismatics and Greek Lexicography Michael P. Theophilos, 2019-11-28 Michael P Theophilos explores the fascinating variety of numismatic contributions to Greek lexicography pertaining to lexicographic studies of the Second Temple period in general and the New Testament in particular Theophilos considers previous scholarly attempts to grapple with and incorporate critical numismatic material into the emerging discipline of Greek lexicography including foundational work by F Preisigke and E Kiessling before outlining his own methodological approach Theophilos then examines the resources available for engaging with the numismatic material and presents a series of specific case studies throughout the New Testament material His carefully annotated images of coins draw readers in to a greater understanding of the material culture of the Greco Roman world and how this impacted upon the Greek language and the New Testament **The First Urban Churches 3** James R. Hitler's State Architecture Alex Scobie,1990 Adolf Hitler admired ancient Rome as the crystallization point of a world empire a capital with massive public monuments that reflected the supremacy of the State and the political might of the ancient world s master race He also admired the way Mussolini turned the monuments of imperial Rome into validatory symbols of Fascism Hitler planned a Reich that would be as durable as the Roman Empire Its capital Berlin would surpass the architectural magnificence of ancient Rome before the advent of Christianity as its official religion This book examines Hitler s views on Roman imperialism town planning and architecture and shows how Albert Speer though a self confessed student of Doric architecture planned and sometimes built structures that were intended to rival such monuments as Nero s Golden House Hadrian s Pantheon and the Stadium of Herodes Atticus at Athens Other architects such as Ludwig Ruff and C sar Pinnau were to plan structures inspired by the Colosseum and the Baths of Caracalla The ancient Roman obsession with order discipline and the domination of the environment is clearly reflected in the town plans and public buildings conceived by Hitler and his architects We see that neoclassical state architecture in Nazi Germany was intended to signify more than stability and the persistence of tradition It was only one aspect of the Nazi attempt to re create a pagan totalitarian state based on clearly defined forms of hierarchy that divided society into slaves and slave owners those with and those without human rights

An Introduction to the Ancient World , Y Max

Ostrovsky, 2007 Combining history archaeology sociology political science and agricultural studies Y Arctg X The Hyperbola of the World Order presents a theory claiming that any political system with a firm agricultural foundation is pre destined to reach political unity and turn this state into the norm Using the circumscription theory the idea that the phenomenon of political unification was most explicit in areas of the world where agricultural land was in short supply and exhaustive historical evidence this timely work proposes the emergence of a single world state *Introduction to the New Testament* Helmut Koester, 1995 *History, Culture, and Religion of the Hellenistic Age* Helmut Koester, 2012-10-25 While the first American edition of this book published more than a decade ago was a revised translation of the German book Einführung in das Neue Testament this second edition of the first volume of the Introduction to the New Testament is no longer dependent upon a previously published German work The author hopes that for the student of the New Testament it is a useful introduction into the many complex aspects of the political cultural and religious developments that characterized the world in which early Christianity arose and by which the New Testament and other early Christian writings were shaped
