Hayes, 2024-10-21 **Etruscan and Italic Pottery in the Royal Ontario Museum** Royal Ontario Museum, John W. Hayes, 1985 This catalogue discusses Etruscan pottery in non Greek and non Roman styles with a particular focus on a large collection of impasto vessels of 8th to 6th century BC from Chiusi The author proposes some new dating methodology and there are catalogue descriptions good photos and profile drawings of the pieces **Catalogue of the Etruscan Gallery of the University of Pennsylvania Museum of Archaeology and Anthropology** Jean MacIntosh Turfa, 2010-11-24 Combining a guide for the Museum visitor with scholarly discussions of all objects on display this catalogue provides background on the society history technology and commerce of the Etruscan and Faliscan cultures from the ninth through the first centuries B C Several groups of material illustrate social historical and technological phenomena currently at the forefront of scholarly debate and study such as the crucial period of the turnover from Iron Age hut villages to the fully urbanized princely Etruscan cities the development and extent of ancient literacy and the position of women and children in ancient societies Many special objects seldom found or generally inaccessible in the United States include Faliscan tomb groups Etruscan inscriptions helmets and trade goods The catalogue presents and analyzes objects of warfare weaving animals religious beliefs architectural and terracotta roofing ornaments Etruscan bronze working for utensils weapons and artwork and fine generic portraiture It discusses the symbolic meaning of such objects deposited in tombs as a chariot buried with a Faliscan lady at Narce a senator's folding stool buried in a later tomb at Chiusi and a pair of horse bits with the teeth of a chariot team still adhering to them where the teeth fell when sacrificed for a funeral in the fifth century necropolis at Tarquinia much later than the horse sacrifice was previously known in Etruria [A Manual of Egyptian Pottery Volume 4](#) Anna Wodzinska, 2009-12-31 This is the fourth volume in a four book set covering all Egyptian pottery ranging from the earliest Fayum A ceramics to pottery made in Egypt today organized by historical periods The manuals are quick identification guides as well as starting points for more extensive research For each period ceramic types are illustrated with a line drawing accompanied by a description that includes information on the pot's material manufacturing techniques surface treatment and shape Color plates of representative ceramic types are included to give the clearest sense of the color composition and surface treatment All four volumes provide an extensive list of suggested readings as well as a bibliography for each period Introductory chapters in each book discuss the basics of pottery manufacture and analysis [A Study of the Circulation of Ceramics in Cyprus from the 3rd Century BC to the 3rd Century AD](#) John Lund, 2015-10-26 This is the first monograph devoted solely to the ceramics of Cyprus in the Hellenistic and Roman Periods The island was by then no longer

divided into kingdoms but unified politically first under Ptolemaic Egypt and later as a province in the Roman Empire Submission to foreign rule was previously thought to have diluted if not obliterated the time honoured distinctive Cypriot character The ceramic evidence suggests otherwise The distribution of local and imported pottery in Cyprus points to the existence of several regional exchange networks a division that also seems reflected by other evidence The similarities in material culture exchange patterns and preferential practices are suggestive of a certain level of regional collective self awareness From the 1st century BC onwards Cyprus became increasingly engulfed by mass produced and standardized ceramic fine wares which seem ultimately to have put many of the indigenous makers of similar products out of business or forced them to modify their output Also the ceramic record gradually became less diverse during the Roman Period than before developments which we today might be inclined to view as symptoms of an early form of globalisation *Library Catalog of the Metropolitan Museum of Art, New York : Supplement* Metropolitan Museum of Art (New York, N.Y.).

Sacred Flames Meghan E. Strong,2021-04-27 A fascinating examination of the role of lighting in ancient Egyptian culture Artificial lighting is one of the earliest tools used by humans By the time we began to paint cave walls we were producing lamps consisting of an illuminant a fat or oil and a wick such as a strip of fabric or a piece of reed or wood Drawing on archaeological textual and iconographic sources Meghan Strong examines the symbolic part that artificial lighting played in religious economic and social spheres in ancient Egyptian culture From the earliest identifiable examples of lighting devices to the infiltration of Hellenistic lamps in the seventh century BC Sacred Flames explores the sensory experience of

illumination in ancient Egypt the shadows sheen color and movement that resulted when lighting interacted with different spaces and surfaces The soft flickering light from lamps or hand held lighting devices not only facilitated the navigation of darkened environments such as allowing workers to see in underground chambers in the Valley of the Kings or served as temple offerings but also impacted upon the viewer s perception of a space and the objects within it Sacred Flames illustrates the active role that lighting played in Egyptian society providing a richer understanding of the symbolic and social value of artificial light and the role of lighting in ritual space and performance in ancient Egyptian culture while serving as a case study of the broader impact of artificial light in the ancient world

Terracotta Lamps II Birgitta Lindros Wohl,2017-07-01 This volume discusses more than 400 lamps and lamp fragments dating from the Late Archaic to the Byzantine period found over several decades at the Sanctuary of Poseidon at Isthmia These come from excavations undertaken by UCLA from 1967 to 1987 under the direction of Paul Clement and since then by OSU under the direction of Timothy Gregory In addition to a detailed catalogue the volume presents a commentary on the types of lamps used at the sanctuary that enriches our knowledge of their manufacture use and artistic evolution over time The lamps also contribute to a better understanding of the site as they reflect the various historical political and religious vicissitudes at Isthmia and in the Corinthia in general over the centuries The Bir Messaouda Basilica Richard Miles,Simon Greenslade,2019-12-31 This volume charts the radical transformation of an inner city neighbourhood in late antique Carthage which was excavated over a five year period by a team from the University of Cambridge Bordering the

main thoroughfare leading from the Brysa Hill to the ports the neighbourhood remained primarily a residential one from the second century until 530s AD when a substantial basilica was constructed over the eastern half of the insula Further extensive modifications were made to the basilica half a century later when the structures on the western half of the insula were demolished and the basilica greatly enlarged with the addition of a new east west aisles a large monumental baptistery and a crypt By carefully reconstructing the complex architectural plan of this innovative building this study shows how the remodelled Bir Messaouda basilica was transformed into a major pilgrimage centre overturning established tradition that located such complexes outside the city walls The Bir Messaouda basilica provides important insights into the transition between Vandal and Byzantine control of the city the development of a new Christian inter mural urban landscape in the sixth century AD and the significance of the pilgrimage in reinforcing ecclesiastical authority in post Justinianic North Africa
