Here Comes the Sun Ken Worpole, 2000-12 Here Comes the Sun looks at how social reformers planners and architects in the early twentieth century tried to remake the city in the image of a sunlit ordered utopia While much has been written about architectural modernism Worpole concentrates less on buildings and more on the planning of the spaces in between the parks public squares open air museums promenades public pools and other public leisure facilities Life in the open was of particular concern to early urban planners and reformers with their dreams of release from the confines of overcrowded unsanitary slums Picturing youthful working class bodies made healthy by exercise and tanned by the sun they imagined an escape route from cities Worpole demonstrates how open air public spaces became sought after commissions for many early modernist architects in the early 1900s resulting in the transformation of the European cityscape a fascinating account of the political idealism that informed urban planning for the first two thirds of the twentieth century full of insights into how public space influences a sense of belonging and ownership The Guardian This is one of those books you stroke lovingly Open it and there is page after page of beautiful photographs this book combines history society politics environment and place in a well written and emotive text The strength of the book is the way it crosses these traditional boundaries and disciplines Town and Country Planning Drawing on architectural theories philosophy literature and even film making Worpole s book is wide ranging and erudite and should be of interest to the layperson as well as to the urban planner It is also elegantly written and complemented by a mixture of black and white and colour photographs to provide a visual emphasis to the points he raises N16 Magazine

The Vertical City K. Al-Kodmany, 2018-06-25 Each century has its own unique approach toward addressing the problem of high density and the 21st century is no exception As cities try to cope with rapid population growth adding 2.5 billion dwellers by 2050 and grapple with destructive sprawl politicians planners and architects have become increasingly interested in the vertical city paradigm Unfortunately cities all over the world are grossly unprepared for integrating tall buildings as these buildings may aggravate multidimensional sustainability challenges resulting in a vertical sprawl that could have worse consequences than horizontal sprawl By using extensive data and numerous illustrations this book provides

a comprehensive guide to the successful and sustainable integration of tall buildings into cities A new crop of skyscrapers that employ passive design strategies green technologies energy saving systems and innovative renewable energy offers significant architectural improvements At the urban scale the book argues that planners must integrate tall buildings with efficient mass transit walkable neighbourhoods cycling networks vibrant mixed use activities iconic transit stations attractive plazas well landscaped streets spacious parks and engaging public art Particularly it proposes the Tall Building and Transit Oriented Development TB TOD model as one of the sustainable options for large cities going forward Building on the work of leaders in the fields of ecological and sustainable design this book will open readers eyes to a wider range of possibilities for utilizing green resilient smart and sustainable features in architecture and urban planning projects The 20 chapters offer comprehensive reading for all those interested in the planning design and construction of sustainable cities

New Urban Configurations R. Cavallo, S. Komossa, N. Marzot, 2014-04-25 Urban areas have been caught up in a turbulent process of transformation over the past 50 years and changes have been rapid with issues such as mobility nature water management energy use and public space featuring prominently

In each Olympic year since 1988 the Faculty of Architecture at Delft University of Technology has held an international conference focusing on the connection between research and design exploring the field of tension between science technology and art

This book presents the proceedings of the latest in this series of conferences New Urban Configurations held in Delft the Netherlands in October 2012 in collaboration with the European Association for Architectural Education EAAE and the International Seminar on Urban Form ISUF This edition of the conference discussed the role and critical potential of the architectural project in the transformation process of cities and territories that leads to new urban configurations

The publication contains all 140 accepted papers and a selection of the keynote lectures presented at the conference The papers have been grouped into five main themes innovation in building typology infrastructure and the city complex urban projects green spaces and delta urbanism Four of these major topics are further divided into several subtopics

This book will be of interest to everyone involved in designing building thinking about as well as managing the urban landscape and territory

Hardscaping Haig Seferian, 2004 The use of materials such as stone wood brick and tile in landscape design

Design for Sustainability Janis Birkeland, 2012-05-04 With radical and innovative design solutions everyone could be living in buildings and settlements that are more like gardens than cargo containers and that purify air and water generate energy treat sewage and produce food at lower cost Birkeland introduces systems design thinking that cuts across academic and professional boundaries and the divide between social and physical sciences to move towards a transdisciplinary approach to environmental and social problem solving This sourcebook is useful for teaching as each topic within the field of environmental management and social change has pairs of short readings providing diverse perspectives to compare contrast and debate Design for Sustainability presents examples of integrated systems design based on ecological principles and concepts and drawn from the foremost designers in the fields of
