Roosevelt and the Munich Crisis Barbara Reardon Farnham, Barbara Farnham, 2000-10-22 Franklin Roosevelt's intentions during the three years between Munich and Pearl Harbor have been a source of controversy among historians for decades. Barbara Farnham offers both a theory of how the domestic political context affects foreign policy decisions in general and a fresh interpretation of FDR's post Munich policies based on the insights that the theory provides. Between 1936 and 1938, Roosevelt searched for ways to influence the deteriorating international situation. When Hitler's behavior during the Munich crisis showed him to be incorrigibly aggressive, FDR settled on aiding the democracies, a course to which he adhered until America's entry into the war. This policy attracted him because it allowed him to deal with a serious problem: the conflict between the need to stop Hitler and the domestic imperative to avoid any risk of American involvement in a war. Because existing theoretical approaches to value conflict ignore the influence of political factors on decision making, they offer little help in explaining Roosevelt's behavior. As an alternative, this book develops a political approach to decision making which focuses on the impact that awareness of the imperatives of the political context can have on decision making processes and through them, policy outcomes. It suggests that in the face of a clash of central values, decision makers who are aware of the demands of the political context are likely to be reluctant to make trade-offs, seeking instead a solution that gives some measure of satisfaction to all the values implicated in the decision.

From Isolation to War Justus D. Doenecke, John E. Wilz, 2014-08-26 In a major revision of this popular text, Dr. Justus Doenecke integrates scholarly research conducted in the 1990s to offer readers a fresh picture of the

major events and historiographical controversies in American diplomacy in the decade before Japan's attack on Pearl Harbor. Individual chapters center on the aftermath of World War I, the Manchurian crisis, the expansion of Germany and Japan, and the U.S. response. FDR's policy towards Europe from the Munich conference to his shoot-on-sight orders, and Roosevelt's stance toward Asia from the termination of the 1911 trade treaty with Japan and the breaking of diplomatic relations. A final chapter considers the background of the Pearl Harbor attack, stressing not only the role of Admiral Yamamoto but the revisionist arguments concerning the event, including the devil theory of the president's culpability. This third edition includes entirely new material, including discussions of Roosevelt's leadership style, the recognition of the Soviet Union, policy toward Cuba and Mexico, Pan American conferences, the 1940 mission of Sumner Welles, the Four Freedoms, and the U.S. Army victory plan of autumn 1940. Certain other passages have been expanded, such as those concerning the background of American anti-interventionism, major peace groups, the London Economic Conference of 1933, the Ethiopian conflict, the Spanish Civil War, the Nye Committee, the predicament of Jewish refugees, the Soviet-Finnish war, FDR's Japan diplomacy, and his last-minute assurances to British ambassador Halifax, and the latest arguments over Pearl Harbor. Also new to this edition is a collection of striking photographs. The third edition of this informative and engaging text, one enjoyed by instructors and students alike for decades, is appropriate for use in the U.S. history survey as well as in course on twentieth-century history, American foreign diplomacy, and international relations.

War Comes Again Gabor Boritt, 1995-05-18. The Civil War and the World War II stand as the two great cataclysms of American history. They were our two costliest wars, with well over a million casualties suffered in each. And they were transforming moments in our history, as well as times when the life of the nation and the great experiment in democracy, government of the people by the people for the people, seemed to hang in the balance. Now in *War Comes Again*, eleven eminent historians, including three Pulitzer Prize winners, all veterans of the Second World War, offer an illuminating comparison of these two epic events in our national life. The range of essays here is remarkable; the level of insight consistently high, and the quality of the writing is superb. For instance, Stephen Ambrose, the bestselling author of *D-Day: June 6th 1944*, offers an intriguing comparison of the two great military leaders of each war, Grant and Eisenhower. Pulitzer Prize-winning historian Robert V. Bruce takes a revealing look at the events that foreshadowed the two wars. Gerald Linderman, author of *Embattled Courage*, examines the two wars from the point of view of the combat soldier. And Arthur Schlesinger Jr. describes how both Lincoln and FDR went around strict observance of the Constitution in order to preserve the Constitution. There is, in addition, a fascinating discussion of the crucial role played by spying during the two wars by Peter Maslowski, a look at the diplomacy of Lincoln and Roosevelt by Howard Jones, and essays on the impact of the wars on women and on African Americans by D. Ann Campbell, Richard Jensen, and Ira Berlin. In perhaps the most gripping piece in the book, Michael C. C. Adams offers an unflinching look at war's destructiveness, as he argues that the evils we associate with bad wars, such as Vietnam, are equally true of good wars. And finally, in perhaps the most provocative essay in the book, Russell

Weigley one of America's most eminent military historians maps the evolution of American attitudes toward war to our present belief that the only acceptable war is one that is short inexpensive and certain of victory Would any great commander Weigley asks would a Lee or a Grant or a Marshall refuse to fight unless he knew he couldn't lose Is not a willingness to run risks for the sake of cherished values and interests close to the heart of what defines greatness in a human being or in a nation Another Pulitzer winner and World War II veteran Don E Fehrenbacher concludes *War Comes Again* with a very personal look at two common soldiers who have no monuments who have not been mentioned in previous histories but who point at the essence of these two wars and are embedded in the very structure of the enduring nation and the world we live in

Denying the Spoils of War O'Mahoney Joseph O'Mahoney, 2018-01-15 Despite being proven ineffective as a coercive tool or deterrent the international community has actively withheld recognition in numerous instances of territorial conquest since the 1930s Joseph O Mahoney systematically analyses 21 case studies including the Manchurian Crisis the Turkish invasion of Cyprus and Russia's annexation of Crimea to explore why so many states have adopted a policy of non recognition of the spoils of war By drawing on historical sources including recently declassified archival documents he evaluates states decision making He develops a new theory for non recognition as a symbolic sanction aimed at reproducing common knowledge of the rules of international behaviour

Deceit on the Road to War John M. Schuessler, 2015-07-31 In *Deceit on the Road to War* John M Schuessler examines how U S presidents have deceived the

American public about fundamental decisions of war and peace Deception has been deliberate he suggests as presidents have sought to shift blame for war onto others in some cases and oversell its benefits in others Such deceit is a natural outgrowth of the democratic process in Schuessler s view because elected leaders have powerful incentives to maximize domestic support for war and retain considerable ability to manipulate domestic audiences They can exploit information and propaganda advantages to frame issues in misleading ways cherry pick supporting evidence suppress damaging revelations and otherwise skew the public debate to their benefit These tactics are particularly effective before the outbreak of war when the information gap between leaders and the public is greatest When resorting to deception leaders take a calculated risk that the outcome of war will be favorable expecting the public to adopt a forgiving attitude after victory is secured The three cases featured in the book Franklin Roosevelt and World War II Lyndon Johnson and the Vietnam War and George W Bush and the Iraq War test these claims Schuessler concludes that democracies are not as constrained in their ability to go to war as we might believe and that deception cannot be ruled out in all cases as contrary to the national interest

The Presidential Difference Fred I. Greenstein, 2001-02-28 As Americans choose and install a new president for a new century they could do no better than to read this work by one of our keenest observers of the modern presidency Drawing on a quarter century s immersion in the presidential record and scores of interviews Fred I Greenstein provides a fascinating and instructive account of the qualities that have served well and poorly in the Oval Office from Franklin D Roosevelt s first hundred days to the end of the Clinton administration Greenstein offers a series of bottom line judgments on each of his eleven subjects and a bold new explanation of why presidents succeed or fail Previous analysts have placed their bets on the president s political prowess or personal character Yet by the first standard LBJ should have been our greatest president and by the second the nod would go to Jimmy Carter Greenstein surveys each president s record in public communication political skill vision cognitive style and emotional intelligence He concludes that the last is by far the most important According to Greenstein FDR provides endless positive lessons but is a source of warnings Truman let his bizarre readings of history lead him astray Eisenhower was wise but failed to communicate a vision Kennedy had no vision Reagan was Carter in reverse It is Ford who is most unappreciated and genuinely interesting Ford balanced many conflicting

demands kept his poise and left the office much stronger than he found it Presidents can avoid failure if they are willing to accept the warnings of failures past and act accordingly But it is not only presidents who should read this book with care Some flaws cannot be overcome no matter how otherwise talented the man Only three of Greenstein's eleven modern presidents were fundamentally free of distracting emotional perturbations When we choose our presidents we will do well to listen to Greenstein and Beware the presidential contender who lacks emotional intelligence In its absence all else may turn to ashes

War Powers Mariah Zeisberg, 2015-09-01 Armed interventions in Libya Haiti Iraq Vietnam and Korea challenged the US president and Congress with a core question of constitutional interpretation does the president or Congress have constitutional authority to take the country to war War Powers argues that the Constitution doesn't offer a single legal answer to that question But its structure and values indicate a vision of a well functioning constitutional politics one that enables the branches of government themselves to generate good answers to this question for the circumstances of their own times Mariah Zeisberg shows that what matters is not that the branches enact the same constitutional settlement for all conditions but instead how well they bring their distinctive governing capacities to bear on their interpretive work in context Because the branches legitimately approach constitutional questions in different ways interpretive conflicts between them can sometimes indicate a successful rather than deficient interpretive politics Zeisberg argues for a set of distinctive constitutional standards for evaluating the branches and their relationship to one another and she demonstrates how observers and officials can use those standards to evaluate the branches constitutional politics With cases ranging from the Mexican War and World War II to the Cold War Cuban Missile Crisis and Iran Contra scandal War Powers reinterprets central controversies of war powers scholarship and advances a new way of evaluating the constitutional behavior of officials outside of the judiciary
