for ELT professionals engaged in in service teacher development and or undertaking academic study Progressing from
broader contextual issues to a narrower focus on classrooms and classroom discourse the volume s inter related themes
focus on ELT in the world contexts and goals planning and organising ELT curriculum resources and settings methods and
methodology perspectives and practices second language learning and learners teaching language knowledge skills and
pedagogy understanding the language classroom The Handbook s 39 chapters are written by leading figures in ELT from
around the world Mindful of the diverse pedagogical institutional and social contexts for ELT they convincingly present the
key issues areas of debate and dispute and likely future developments in ELT from an applied linguistics perspective
Throughout the volume readers are encouraged to develop their own thinking and practice in contextually appropriate ways
assisted by discussion questions and suggestions for further reading that accompany every chapter Advisory board Guy Cook
Diane Larsen Freeman Amy Tsui and Steve Walsh **Controversial Therapies for Developmental Disabilities** John W.
Jacobson, Richard M. Foxx, James A. Mulick, 2005-01-15 One of the largest and most complex human services systems in
Western nations has evolved to address the needs of people with developmental disabilities In the U S for example school

budgets are stretched thin by legally mandated special education and billions of Medicaid dollars annually are consumed by residential and professional services to this population The temptation of a quick fix is strong Many parents desperately seek the latest ideas and place pressure on program administrators who often are not trained to think critically about the evidence base for intervention efforts The problems of people with developmental disabilities have historically been targeted by a wide range of professionals who rely on clinical experience and intuition and do not submit their claims to the tests of scientific research Professional entrepreneurs have energetically promoted their treatments to a public perhaps too trustful of those with credentials Thus families and their children are buffeted by reforms founded on belief and ideologically driven management Services fluctuate with the currents of social movements and rapidly shifting philosophies of care as policymakers and providers strive for increased responsiveness and individualization These forces affect not only where and how but how well people are served Too often services are less effective than they could be or worse damaging to personal growth and quality of life Many treatments are based on poorly understood or even disproven approaches What approaches to early intervention education therapy and remediation really help those with mental retardation and developmental disabilities improve their functioning and adaptation And what approaches represent wastes of time effort and resources This book brings together leading behavioral scientists and practitioners to focus light on the major controversies surrounding these questions The authors review the origins perpetuation and resistance to scrutiny of questionable practices and offer a clear rationale for appraising the quality of services In an era of increasing accountability no one with a professional stake in services to individuals with mental retardation and developmental disabilities can afford not to read this book
