Food and War in Mid-Twentieth-Century East Asia Katarzyna J.

Cwiertka,2016-04-15 War has been both an agent of destruction and a catalyst for innovation These two at first sight contradictory yet mutually constitutive outcomes of war waging are particularly pronounced in twentieth century Asia While 1945 marked the beginning of peaceful recovery for Europe military conflicts continued to play a critical role in the historical development of this part of the world In essence all wars in twentieth century Asia stemmed from the political vacuum that developed after the fall of the Japanese Wartime Empire intricately connecting one region with another Yet they have had often very diverse consequences shattering the homes of some and bringing about affluence to others Disarray of war may halt economic activities and render many aspects of life insignificant The need for food however cannot be ignored and the social action that it requires continues in all circumstances This book documents the effects of war on the lives of ordinary people through the investigation of a variety of connections that developed between war waging and the production distribution preparation and consumption of food throughout Asia since the 1930s The topics addressed range from issues at stake at the time of the conflicts such as provisioning the troops and food rationing and food relief for civilians to long term often surprising consequences of war waging and wartime mobilization of resources on the food systems diets and tastes of the societies involved The main argument of this volume is that war has not been a mere disruption but rather a central force in the social and cultural trajectories of twentieth century Asia Due to its close connection with human nourishment and comfort food stands central in the life of the individual On the other hand owing to its connection with profit and power food plays a critical role in the social and economic organization of a society What happens to food and eating is therefore an important index of change a privileged basis for the exploration of historical processes
