## **Security Policy Reorientation In Peripheral Europe A Comparative Perspective Approach:**

Security Policy Reorientation in Peripheral Europe Kjell Engelbrekt, 2019-09-18 This title was first published in 2002 This rich comparative analysis looks at security policy reorientation in four European states located at the periphery of the European continent During the post Cold War period Greece Bulgaria Sweden and Finland conducted a security policy that was heavily influenced by their close proximity to the iron curtain Probing this transition during a decisive phase of the post Cold War reconstitution of the wider European security order the author analyzes national security policy making from the standpoints of three international relations traditions realism institutionalism and political anthropology This engaging work is invaluable for students scholars and policy analysts working in the field of international relations and European politics

*European Union and Strategy* Kjell Engelbrekt, Jan Hallenberg, 2010-09-13 This edited volume sets out to explore the paradox that the European Union EU produces policies with strategic qualities but lacks the institutions and concepts to engage in strategic reasoning and action proper The book has a two fold agenda exploring current EU external policies that are or seem to be linked to strategic priorities and also studying the concept of strategy in the particular context of EU decision and policymaking The volume first examines the character of the Union as a strategic actor at this stage of its development It then explores the ability of the Union to act and otherwise influence both its periphery and the wider world focusing in particular on how it is perceived by other actors The final section comprises personal assessments by a group of contributors regarding the character of the union as a strategic actor in the present and future When these are pieced together a picture emerges of a European strategy in the making albeit one that so far is modest and partial This book will be of interest to students of European Security European Politics and IR

**Old Europe, New Security** Mary Troy Johnson, Janet Adamski, Cristina M. Schweiss, 2017-11-30 Many of the US criticisms of Western European reluctance to engage in the 2004 war in Iraq stem from a perception that these governments are weak on defence or unwilling to pull their own weight in the international system Secretary Rumsfeld pejoratively designated traditional Atlantic Alliance allies as Old Europe to distinguish them from the freshly minted cooperative states of New Europe In doing so Rumsfeld accused Old Europe of yet again relying on the United States to solve shared security problems This volume critically evaluates the validity of this view of Western European choices and policies Rather than a primary reliance on military force as first line defence it proposes that Western European governments are expanding the set of tools they have to apply to the post Cold War array of security and defence problems The volume examines the emergent European security approach from multiple perspectives in multiple institutions and identities and in different geographic contexts *Europe After the Cold War* Wojciech Kostecki, 1996 **The Making of European Security Policy** Roberta

Haar, Thomas Christiansen, Sabina Lange, Sophie Vanhoonacker, 2021 This volume addresses how and in what capacity the European Union and its member states are able to respond to fundamental shifts occurring in global politics and are able to remain relevant for the future The changing nature of the international system is subject to considerable contestation among scholars with many claiming that the fundamentals of the post war international system are being rewritten This volume brings together prominent scholars in the field of European security to address a range of pertinent issues related to Europe's role in the context of evolving global challenges The first section focuses on whether the EU is an actor with a strategic nature and the means to act on a global security strategy The second section considers the institutional dynamics and the approaches at the EU's disposal to fulfil its possible intended global roles The third section addresses Europe's most important strategic relationship the partnership it has with the United States This section considers the recalibration of the transatlantic relationship in light of the changing international system and the reorientation of U S foreign policy This book will be of much interest to students of European Union policy European Security policy European foreign policy and International Relations in general Cross-Disciplinary Perspectives on Regional and Global Security Paweł

Frankowski, Artur Gruszczyk, 2018-04-06 This book focuses on current key issues of international security from an actor centered approach The volume is divided into 3 sections the first part analyses an array of security issues in Europe the second one explores how those security issues play out in the Americas and the third focuses on Africa Each of the chapter authors outlines the relevant ideas interests and institutions The volume provides an overview of how global regional and national actors differ in their management approaches capacity levels and how these differences translate into cross regional cooperation on security issues *Strategic Cultures in Europe* Heiko Biehl, Bastian Giegerich, Alexandra Jonas, 2013-04-09

European countries work together in crisis management conflict prevention and many other aspects of security and defence policy Closer cooperation in this policy arena seems to be the only viable way forward to address contemporary security challenges Yet despite the repeated interaction fundamental assumptions about security and defence remain remarkably distinct across European nations This book offers a comparative analysis of the security and defence policies of all 27 EU member states and Turkey drawing on the concept of strategic culture in order to examine the chances and obstacles for closer security and defence cooperation across the continent Along the lines of a consistent analytical framework international experts provide case studies of the current security and defence policies in Europe as well as their historical and cultural roots **A Critical Approach to European Security** Przemysław Grudziński, Peter van Ham, 1999 This work

examines the key elements of Europe's dynamic security framework It analyzes how European institutions and their policies influence the security of the continent looking also at the broader political setting in particular how the development of a European identity might influence European security It aims to bring clarity into the often muddled discussion on European security and elucidates some of the concepts that are central to the current discourse on the topic Perspectives for a

European Security Strategy Towards Asia Gustaaf Geeraerts, 2011 As the geopolitical point of gravity moves to the east the European Union EU faces the challenge of ongoing global power shifts and this study addresses the options opportunities and obstacles that lie ahead as the EU becomes a security actor in Asia and Africa Contributors address a number of key issues including the EU's soft power overall strategic planning European interests in Asia and the role of Russia in Asia's security climate

Europe and Global Security Bastian Giegerich, 2017-10-03 In the twenty first century the European Union is confronted by myriad security problems that demand concerted action and cooperation As a negotiating power it seeks to persuade Iran to forswear a nuclear weapons programme As a crisis manager it seeks to contribute to global peace and stability through civilian and military operations Closer to home it is wrestling with questions about membership enlargement large scale migration and terrorist threats to the security of its populations and infrastructure European governments already under financial strain from ageing workforces and welfare systems face ever more difficult choices about budget cuts in security and defence after the near collapse of the global banking system Will it be possible to enhance cooperation between member states How can the EU complete its transition from a security actor with great potential to a player that credibly aligns available policy instruments and resources These and other issues about the very nature and identity of the Union are explored in this Adelphi From the need to establish its hard power credentials overcome its reluctance to demonstrate them against non compliant states and leverage its relationships with other great powers to attempts to break its dependence on Russian energy it is clear the EU has its work cut out But by affirming its commitment to multilateralism and defining a careful balance between closer cooperation and the national security concerns of EU member states this book suggests the European Union can build on its status as a global security power in the making

**The European Security Strategy** Sven Biscop, 2016-12-05 In December 2003 the EU adopted the European Security Strategy the first ever common strategic vision of the Member States This volume examines how the Strategy can form the basis of a comprehensive approach that integrates all dimensions of EU external action from aid and trade to defence under the same agenda of effective multilateralism or global governance This agenda can be translated into the core public goods to which every individual on earth is entitled promoting access to these global public goods can be the essence of a distinctive European approach emphasizing long term stabilization and conflict prevention On that basis the Strategy can be a global agenda for positive power global because of its worldwide scope and comprehensive nature for an EU with effective power to achieve positive objectives The book will appeal to audiences interested in the EU as an international actor foreign policy security and defence development and trade It is also suitable for policy makers in the EU institutions and the Member States

The Politics of European Security Policies Xymena Kurowska, Patryk Pawlak, 2014-06-03 The book is a timely investigation into the European security policy dynamic from the perspective of actors engaged in the contentious policy process Instead of looking at security actors in isolation from one another the book enquires into the practice of the policy

process and maps out the constellations of formal and informal actors sponsoring concrete ideas on what European security should be about. The understandings of security shift and advocating a particular reading of security involves entering the political contest with actors advancing different conceptions. The contributors analyse these different modalities, overlapping scenes and shifting meanings that bring about EU security policies. Our case studies illustrate how these processes unfold both at the intra EU level where different institutions supply and endorse their security framings and vis vis the EU and its neighbours. The purpose of the book is to uncover by pluralistic means the rules of the game that structure the field of the EU's security making. That way rather than impose a rigid theoretical model, the editors structure the inquiry around three concepts: security, politics and policy. This book was published as a special issue of *Perspectives on European Politics and Society*.

Old Europe, New Europe and the US Blagovest Tashev, Professor Tom Lansford, 2013-02-28. Iraq can be considered the perfect storm which brought out the stark differences between the US and Europe. The disagreement over the role of the United Nations continues and the bitterness in the United States against its betrayal by allies like France is not diminishing. Meanwhile the standing of the United States among the European public has plummeted. Within Europe political tensions between what US Secretary of Defense Donald Rumsfeld euphemistically called the Old Europe and the New Europe continue to divide. To fully comprehend these rifts this volume takes a specific look at the core security priorities of each European state and whether these interests are best served through closer security collaboration with the US or with emerging European structures such as the European Rapid Reaction Force. It analyzes the contribution each state would make to transatlantic security, the role they envisage for existing security structures such as NATO and the role the US would play in transatlantic security.

Security in a greater Europe Charlotte Wagnsson, 2013-07-19. Can Russia, the European Union and the three major EU member states adopt a unified policy line in the global arena? Charlotte Wagnsson investigates the cohesiveness of greater Europe through the detailed scrutiny of policy statements by the leadership elites in the UK, France, Germany, Russia and the EU in connection with three defining events in international security: the crisis in Kosovo of 1999, the terrorist attacks of 9/11 and the Iraq crisis of 2003. This extensive empirical enquiry results in a critical constructivist response to neorealist understandings of European security. The book is available in paperback for the first time. It contrasts the EU's new way of doing security with the established competitive bilateral interplay in the European security sphere and provides a clue to the kind of security politics that will prevail in Europe. A joint Moscow-Brussels approach would improve the chances of both increasing their relative strength vis vis the USA but serious cleavages threaten to undermine such a greater European common view on security. Wagnsson considers the extent to which the major European players pursue similar objectives and assesses the possible implications for and the chances of greater Europe emerging as a cohesive global actor. This meticulously researched book will interest scholars and students with an interest in international security, the EU's international role, European international relations and Russian security.
