Security In The Boardroom:

The Shortest Hour Lee Parrish, 2024-07-18 Independent directors of corporate boards understand the importance of cyber security as a business issue Increased regulatory requirements the onslaught of breaches as well as the replacement of the corporate network perimeter with more third party partnerships have all contributed to cyber security rising to the top of enterprise risks Yet many directors only receive a few brief cyber security updates during the year Moreover many directors have devoted their careers to other important business disciplines and may not fully grasp the technical concepts of cyber security The challenge is that many publications on board cyber security governance address the topic at such a high level that it removes the important context of the cyber security details or covers the topic too deeply with hard to understand technical language These resources may often provide lists of security questions for directors to ask of their management team but they do not provide the answers to the questions so that actionable oversight can be performed What I would have wanted and why you are probably reading this book summary is a resource that delivers the questions to ask but also provides the answers and in a narrative easy to understand style An award winning Chief Information Security Officer with over two decades of working with multiple Fortune 500 boards Lee Parrish provides an example laden vision to improve cyber security governance in the boardroom Additionally Lee deciphers the technical jargon to increase the reader's cyber fluency not to make you a cyber expert but to help you be able to ask direct questions understand the answers provided challenge strategies and advise on important cyber decisions Pick up your copy of *The Shortest Hour An Applied Approach to Boardroom Governance of Cyber Security* today and start your journey on achieving more effective cyber security oversight Want to learn more Please visit www.novelsecurity.com **The Cyber-Elephant in the Boardroom** Mathieu

Gorge, 2021-03 We've all read the cybersecurity horror stories a prominent company exposes the private information of their customers only to scramble after the fact to apologize and safeguard the data Cybersecurity is often an afterthought a much lower priority than profit until a data breach threatens the bottom line anyway In *The Cyber Elephant in the Boardroom* data security expert and CEO Mathieu Gorge along with a host of guests shows why protecting a company's data should be top of mind for C suites and corporate boards With the innovative 5 Pillars of Security Framework any C level executive can understand their organization's cyber risk and the steps they need to take to protect their information There's a cyber elephant in the boardroom and it needs to be addressed Cyber Security in the Boardroom, 2015 Data is a company's greatest asset and as technology changes important data such as customer knowledge and product specifications are intrinsically linked to its IT infrastructure Recent high profile events have shown that corporate espionage hacking and internal factors such as employee carelessness with IT and IT infrastructure can quickly destroy a company's reputation and its market value When Target's credit card and debit card systems were hacked the personal information of over 70 million of its customers was breached the company's market value fell its CEO Gregg Steinhafel resigned and institutional investors

recommended that seven of the company's board members be removed. Boards of directors have a crucial role in setting risk tolerances and approving risk management within an organization. IT governance is one of the most pressing issues facing companies today yet despite this there remains a disconnect in knowledge and understanding between IT professionals and board members hindering their ability to effectively manage cyber risks. Directors need to be thorough in overseeing cyber risk as part of their IT governance oversight. As the number of digital attacks increase the need for cyber literacy in the boardroom could not be more vital. Unfortunately many boardrooms today don't have the skills or experience needed in this area.

How to Drive Cyber Security from the Boardroom and Get Results Mark de Rijk, 2018-11 Security in the Boardroom Mark S. A. Smith, 2005-01-01 Written with the nontechnical manager in mind this book advises readers on the questions to ask and the issues to examine when their technology teams consider security for their companies.

Women in Security Debra A. Christofferson, 2017-11-28 This volume examines core areas of development in security emphasizing the pivotal contributions of women to the field's evolution. The author first covers a broad spectrum of key topics including how security is created where innovation occurs what the underpinnings are and who supports it and how. After an overview of the field female security professionals share their own stories of technology and innovation in security today the foundation where research is headed and the emerging trends. Women currently make up a very small pocket of cyber security staffing this book aims to increase the visibility of women in the field and their contributions and encourage other females to join the field. The contributors hold various roles from executive leadership to engineers analysts and researchers.

Handbook Of Electronic Security And Digital Forensics Hamid Jahankhani, Gianluigi Me, David Lilburn Watson, Frank Leonhardt, 2010-03-31 The widespread use of information and communications technology (ICT) has created a global platform for the exchange of ideas goods and services the benefits of which are enormous. However it has also created boundless opportunities for fraud and deception. Cybercrime is one of the biggest growth industries around the globe whether it is in the form of violation of company policies fraud hate crime extremism or terrorism. It is therefore paramount that the security industry raises its game to combat these threats. Today's top priority is to use computer technology to fight computer crime as our commonwealth is protected by firewalls rather than firepower. This is an issue of global importance as new technologies have provided a world of opportunity for criminals. This book is a compilation of the collaboration between the researchers and practitioners in the security field and provides a comprehensive literature on current and future e security needs across applications implementation testing or investigative techniques judicial processes and criminal intelligence. The intended audience includes members in academia the public and private sectors students and those who are interested in and will benefit from this handbook.

Information security: Setting the boardroom agenda, 2003 **Business Continuity and Homeland Security** David H. McIntyre, William I. Hancock, 2011-01-01 What should businesses consider in preparing for terrorist attacks natural disasters pandemic illnesses and other emergencies. What steps can a business take to ensure continuity

during and after a crisis What can we learn from past success This edited collection provides responses to these and other questions from prominent business executives and academics drawn from their personal experiences with such crises as the terrorist attacks of 9 11 Hurricane Katrina and the Asian tsunami Their analyses prove a major step forward in the emerging academic and professional field of homeland security In this first volume The Challenge of the New Age the contributors noted authorities in security and risk management technology public health political science and business look at specific ways disasters can impact businesses both in the short and long term They recount their experiences with terrorist attacks and natural disasters and explore the potential impact of other hazards such as a biological event or pandemic Intended for business practitioners real world operators students and faculty government leaders and their libraries the book demonstrates with historical examples the connectivity between threats hazards policies jurisdictions information technology leadership and considerations of profit and loss Those who want to benefit from best practices while avoiding mistakes of the past will find this an excellent place to start

Corporate Security in the Asia-Pacific Region Christopher J. Cabbage, CPP, David J. Brooks, PhD, 2016-04-19 As corporations and governments become more litigious and risk averse international risk management becomes more complex Corporate Security in the Asia Pacific Region Crisis Crime Fraud and Misconduct examines real cases of corporate crisis crime fraud and other misconduct that corporate security professionals need to be aware of to effect
