Beaulieu, 2006-04-30

Women have had a complex experience in African American culture. The first work of its kind, this encyclopedia approaches African American literature from a Women's Studies perspective. While Yolanda Williams Page's *Encyclopedia of African American Women Writers* provides biographical entries on more than 150 literary figures, this book is much broader in scope. Included are several hundred alphabetically arranged entries on African American women writers as well as on male writers who have treated women in their works. Entries on genres, periods, themes, characters, historical events, texts, places, and other topics are included as well. Each entry is written by an expert contributor and relates its subject to the overall experience of women in African American literature. Entries cite works for further reading, and the encyclopedia closes with a selected general bibliography.

African American culture is enormously diverse, and the experience of women in African American society is especially complex. Women were among the first African American writers, and works by black women writers are popular among students and general readers alike. At the same time, African American women have been oppressed, and texts by black male authors represent women in a variety of ways. The first of its kind, this encyclopedia approaches African American literature from a Women's Studies perspective and thus significantly illuminates the African American cultural experience through literary works. Included are several hundred alphabetically arranged entries written by numerous expert contributors. In addition to covering male and female African American authors, the encyclopedia also discusses themes, major works, and characters, genres, periods, historical events, places, and other topics. Included are entries on such authors as Maya Angelou, James Baldwin, Frederick Douglass, Nikki Giovanni, June Jordan, Claude McKay, Ishmael Reed, Sojourner Truth, Phillis Wheatley, and many others. In addition, the many works discussed include *Beloved*, *Blanche on the Lam*, *I know Why the Caged Bird Sings*, *The Men of Brewster Place*, *Quicksand*, *The Street*, *Waiting to Exhale*, and many more. The many topical entries cover Black Feminism, Black Nationalism, Conjuring, Children's and Young Adult Literature, Detective Fiction, Epistolary Novel, Motherhood, Sexuality, Spirituality, Stereotypes, and many others. Entries relate their topics to the experience of African American women and cite works for further reading.

Features and Benefits Includes hundreds of alphabetically arranged entries. Draws on the work of numerous expert contributors. Includes a selected general bibliography. Offers a range of finding aids such as a list of entries, a guide to related topics, and an extensive index. Supports the literature curriculum by helping students analyze major writers and works. Supports the social studies curriculum by helping students use literature to understand the experience of African American women. Covers the full chronological range of African American literature. Fosters a respect for cultural diversity. Develops

The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of

the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential **Freedomways** ,1975 **The Bottoms and Hills: Virginia Tales** Arthenia J. Bates Millican,2019-02-03 A collection of tales hinged upon a way of life in Southside Virginia the Old Dominion in the authentic language as heard by the author and originally written down in the late 1950s This treasure is re published posthumously in cooperation with the Arthenia J Bates Literary Foundation in celebration of the author s 99th birthday
