## **Seeds Of Repression:**

**Seeds of Repression** Athan G. Theoharis, 1977      *Perilous Times* Geoffrey R. Stone, 2004 Geoffrey Stone's *Perilous Times* incisively investigates how the First Amendment and other civil liberties have been compromised in America during wartime. Stone delineates the consistent suppression of free speech in six historical periods from the Sedition Act of 1798 to the Vietnam War and ends with a coda that examines the state of civil liberties in the Bush era. Full of fresh legal and historical insight, *Perilous Times* magisterially presents a dramatic cast of characters who influenced the course of history over a two hundred year period from the presidents Adams, Lincoln, Wilson, Roosevelt and Nixon to the Supreme Court justices Taney, Holmes, Brandeis, Black and Warren to the resisters Clement Vallandigham, Emma Goldman, Fred Korematsu and David Dellinger. Filled with dozens of rare photographs, posters and historical illustrations, *Perilous Times* is resonant in its call for a new approach in our response to grave crises.

**Seeds of Repression; Harry S. Truman and the Origins of McCarthyism** Athan G. Theoharis, 1971      **Embryogenesis** Ken-Ichi Sato, 2012-04-20 The book *Embryogenesis* is a compilation of cutting edge views of current trends in modern developmental biology focusing on gametogenesis, fertilization, early and/or late embryogenesis in animals, plants and some other small organisms. Each of 27 chapters contributed from the authorships of world wide 20 countries provides an introduction as well as an in depth review to classical as well as contemporary problems that challenge to understand how living organisms are born, grow and reproduce at the levels from molecule and cell to individual.

*The Politics of Racism* Ann Gomer Sunahara, 2020-03-31 *The Politics of Racism: The Uprooting of Japanese Canadians During the Second World War* is the first book to fully document the politics behind the 1942 expulsion order that saw 20,000 Japanese Canadians evicted from their homes in British Columbia and sent inland to work camps, detention centres and farms in Alberta and Manitoba. The book details the relationship between racism and political expediency and shows how political parties and the affairs of the nation were controlled by a small group of politicians who scapegoated minorities to hang on to power. Most alarmingly, *The Politics of Racism* shows how easily Canadians allowed themselves to be manipulated by a political process that used fear and war hysteria in a very cynical and calculated way. Ann Sunahara has used previously classified government documents and the wartime records of the Liberal government to reveal a startling new portrait of political connivance that shows Mackenzie King bowing to the pressures of a small number of B.C. politicians who saw the Japanese problem as a useful tool to enhance their status and win favours in Ottawa. Branded as traitors in the eyes of many of their countrymen, unaware that the military had opposed their uprooting without political friends and allies except for the CCF, the Japanese Canadians were powerless, a muffled minority within a country at war. Ann Sunahara has woven together her analysis of government documents with the personal memories of victims of that shameful period. The accounts of the victims and the official records provide a poignant and powerful indictment of the politicians who used racism and fear to further their own careers and of a society whose indifference let it

happen Since the 1981 version of The Politics of Racism POR1981 was published it has undergone two further editions an HTML version in 2000 POR2000 with an additional afterward about Redress and an e book edition POR2020 with an additional photo essay by the author Both are published at [japanesecanadianhistory.ca](http://japanesecanadianhistory.ca) Gulag Realities Sebastian Farnham, AI, 2025-03-20 Gulag Realities explores the Soviet Gulag system a network of forced labor camps and its devastating impact on Soviet society The book examines how a state built on the premise of equality could operate such a brutal system of political repression It delves into the Gulag s role within the Soviet economy highlighting how it was an integral part of resource extraction and heavy industry Furthermore the book investigates the dehumanization process inflicted on prisoners stripping them of their identities and turning them into expendable tools of the state The book argues that the Gulag system was not an aberration but a consequence of Soviet ideology and political practices It reveals the historical and ideological roots of the Gulag tracing its evolution from the Bolshevik Revolution to its peak under Stalin A significant portion of the book explores the daily realities of life within the camps detailing the harsh living conditions and the brutal treatment of political prisoners The book unfolds in a structured manner beginning with the historical context and progressing to the experiences within the camps and the long term impact on Soviet society By drawing upon archival documents memoirs and scholarly analyses Gulag Realities offers a comprehensive understanding of the Gulag s structure function and lasting consequences making it valuable for students academics and anyone interested in Soviet history and human rights

Abiotic Stress Signaling in Plants: Functional Genomic Intervention Girdhar K. Pandey, Manoj Prasad, Amita Pandey, Maik Boehmer, 2016-08-08 Abiotic stresses such as high temperature low temperature drought and salinity limit crop productivity worldwide Understanding plant responses to these stresses is essential for rational engineering of crop plants In Arabidopsis the signal transduction pathways for abiotic stresses light several phytohormones and pathogenesis have been elucidated A significant portion of plant genomes Arabidopsis and rice were mostly studied encodes for proteins involved in signaling such as receptor sensors kinases phosphatases transcription factors and transporters channels Despite decades of physiological and molecular effort knowledge pertaining to how plants sense and transduce low and high temperature low water availability drought water submergence microgravity and salinity signals is still a major question for plant biologist One major constraint hampering our understanding of these signal transduction processes in plants has been the lack or slow pace of application of molecular genomic and genetics knowledge in the form of gene function In the post genomic era one of the major challenges is investigation and understanding of multiple genes and gene families regulating a particular physiological and developmental aspect of plant life cycle One of the important physiological processes is regulation of stress response which leads to adaptation or adjustment in response to adverse stimuli With the holistic understanding of the signaling pathways involving not only one gene family but multiple genes or gene families plant biologist can lay a foundation for designing and generating future crops which can withstand the higher degree of environmental stresses especially abiotic

stresses which are the major cause of crop loss throughout the world without losing crop yield and productivity Therefore in this e Book we intend to incorporate the contribution from leading plant biologists to elucidate several aspects of stress signaling by functional genomics approaches      Biomedical Engineering Sylwia Olszynska, Małgorzata Komorowska, 2011-01-08 This book is addressed to scientists and professionals working in the wide area of biomedical engineering from biochemistry and pharmacy to medicine and clinical engineering The panorama of problems presented in this volume may be of special interest for young scientists looking for innovative technologies and new trends in biomedical engineering      **Seeds** J. Derek Bewley, Kent Bradford, Henk Hilhorst, Hiroyuki Nonogaki, 2012-10-23 This updated and much revised third edition of *Seeds Physiology of Development Germination and Dormancy* provides a thorough overview of seed biology and incorporates much of the progress that has been made during the past fifteen years With an emphasis on placing information in the context of the seed this new edition includes recent advances in the areas of molecular biology of development and germination as well as fresh insights into dormancy ecophysiology desiccation tolerance and longevity Authored by preeminent authorities in the field this book is an invaluable resource for researchers teachers and students interested in the diverse aspects of seed biology      *Proceedings of the Fourth International Symposium on Seed, Transplant and Stand Establishment of Horticultural Crops* Daniel I. Leskovar, 2008 This volume contains 48 papers presented from lectures and posters at the Fourth International Symposium on Seed Transplant and Stand Establishment of Horticultural Crops arranged in eight topical areas seed biotechnology and genetics seed germination and vigor seed technology conventional transplant production and technology organic seed transplant production abiotic biotic stress grafting stand establishment and field performance      Epigenetic Memory and Control in Plants Gideon Grafi, Nir Ohad, 2013-04-18 Epigenetics commonly acts at the chromatin level modulating its structure and consequently its function in gene expression and as such plays a critical role in plant response to internal and external cues This book highlights recent advances in our understanding of epigenetic mechanisms as a major determinant through which internal and external signals such as those occurring during hybridization flowering time reproduction and response to stress communicate with plant cells to bring about activation of multiple nuclear processes and consequently plant growth and development The outcome of these processes may persist for generations long after the initial cues have expired and may contribute to plant evolution      *The Agricultural Experiment Stations in the United States* Alfred Charles True, Vinton Albert Clark, 1900      **Abiotic Stress Adaptation in Plants** , 2010      **Cellular and Molecular Biology of Plant Seed Development** Brian A. Larkins, Indra K. Vasil, 2013-03-09 The beginnings of human civilization can be traced back to the time nearly 12 000 years ago when the early humans gradually changed from a life of hunting and gathering food to producing food This beginning of primitive agriculture ensured a dependable supply of food and fostered the living together of people in groups and the development of society During this time plant seeds were recognized as a valuable source of food and nutrition and began to be used for

growing plants for food Ever since plant seeds have played an important role in the development of the human civilization Even today seeds of a few crop species such as the cereals and legumes are the primary source of most human food and the predominant commodity in international agriculture Owing to their great importance as food for humans and in international trade seeds have been a favorite object of study by developmental biologists and physiologists nutritionists and chemists A wealth of useful information is available on the biology of seeds *Kaurane Diterpenes: Advances in Research and Application: 2011 Edition*, 2012-01-09 Kaurane Diterpenes Advances in Research and Application 2011 Edition is a ScholarlyBrief that delivers timely authoritative comprehensive and specialized information about Kaurane Diterpenes in a concise format The editors have built Kaurane Diterpenes Advances in Research and Application 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Kaurane Diterpenes in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Kaurane Diterpenes Advances in Research and Application 2011 Edition has been produced by the world's leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>

Plant Peroxisomes A. Baker, I.A. Graham, 2013-03-14 In the two decades since the last comprehensive work on plant peroxisomes appeared the scientific approaches employed in the study of plant biology have changed beyond all recognition The accelerating pace of plant research in the post genomic era is leading us to appreciate that peroxisomes have many important roles in plant cells including reserve mobilisation nitrogen assimilation defence against stress and metabolism of plant hormones which are vital for productivity and normal plant development Many plant scientists are finding and will no doubt continue to find that their own area of research is connected in some way to peroxisomes Written by the leading experts in the field this book surveys peroxisomal metabolic pathways protein targeting and biogenesis of the organelle and prospects for the manipulation of peroxisomal function for biotechnological purposes It aims to draw together the current state of the art as a convenient starting point for anyone student or researcher who wishes to know about plant peroxisomes

Seed Dormancy, Germination and Pre-Harvest Sprouting Chengdao Li, Hiro Nonogaki, Jose Barrero, 2019-03-28 Pre harvest sprouting PHS and late maturity alpha amylase LMA are two of the biggest grain quality defects that grain growers encounter About 50 percent of the global wheat crop is affected by pre harvest sprouting to various degrees Pre harvest sprouting is a genetically based quality defect and results in the presence of alpha amylase in otherwise sound mature grain It can range from perhaps undetectable to severe damage on grain and is measured by the falling numbers or alpha amylase activity This is an international issue with sprouting damage lowering the value of crops to growers seed and grain merchants millers maltsters bakers other processors and ultimately the consumer As such it has attracted attention from

researchers in many biological and non biological disciplines The 13th International Symposium on Pre Harvest Sprouting in Cereals was held 18-20 September 2016 in Perth to discuss current findings of grain physiology genetic pathways trait expression and screening methods related to pre harvest sprouting and LMA This event followed the previous symposium in 2012 in Canada *Plant Developmental Biology - Biotechnological Perspectives* Eng Chong Pua, Michael R.
