

## Seeing Is Believing (?) Blurred Boundaries and Loving Looks in Nancy Burson's Art<sup>1</sup>

Anna Kérchy

Nancy Burson is a contemporary American digital artist, photographer, born in 1948. Her work is shown in museums and galleries internationally including major exhibitions at The International Center of Photography and the New Museum in New York City, The Venice Biennale, The Contemporary Arts Museum in Houston, and The Museum of Contemporary Photography in Chicago. She has served as a visiting professor at Harvard and was a member of the adjunct photography faculty at New York University's Tisch School of the Arts. "Seeing and Believing" was the title of her traveling 2002 retrospective originating at the Grey Art Gallery, and nominated for Best Solo Museum Show of the Year in New York City by the International Association of Art Critics.

### Frames: Social Criticism, Theoretical Relevance

The title of the retrospective exhibition is extremely telling of Burson's art, since Burson has been preoccupied since the beginnings of her career with issues of culturally conditioned representation, perception, and interpretation. Her aim has been to unveil communal myths by showing how socially sanctioned misrepresentations (particularly of body, self and humanity)—necessarily fostering mis(self)identifications and misinterpretations—privilege and manipulate "seeing" as a token of "believing" and as a guarantee of "reality"/"authenticity." In the title of my study I slightly modified the exhibition's title from "Seeing and Believing" to "Seeing Is Believing(?)" in order to make the artistic project even more explicit, since I believe that Burson's photography always provides a thorough criticism of the ideologically invested nature of spectatorship and to-be-looked-at-ness, of visibility and invisibility, and calls attention to the unequal, hegemonic (gendered, raced, classed) distribution of empowered spectatorial, and of contained, controlled spectacularized spectacle-positions which become naturalized and normativized through the Foucauldian ideological *technologies of truth-production*.

Burson presents strange portraits of "naturally unnatural" pathological, deformed faces or of computer manipulated, metamorphic faces gained with the help of the digital morphing technology invented by her in order to transgress frames, to challenge aesthetic norms and normativized body-images, to unsettle ideologically ready-made truths, and revision our conventional "ways of seeing." Her morphed and metamorphosing photos destabilize her very mode of artistic expression, by mockingly troubling the "Seeing=Believing" equation apparently reinforced by the nineteenth century invention of photography.

On the one hand, her photos disclose our contemporary western consumer so-

the snap character judgments we make from faces are irresistible but usually incorrect We make up our minds about others after seeing their faces for a fraction of a second and these snap judgments predict all kinds of important decisions For example politicians who simply look more competent are more likely to win elections Yet the character judgments we make from faces are as inaccurate as they are irresistible in most situations we would guess more accurately if we ignored faces So why do we put so much stock in these widely shared impressions What is their purpose if they are completely unreliable In this book Alexander Todorov one of the world s leading researchers on the subject answers these questions as he tells the story of the modern science of first impressions Drawing on psychology cognitive science neuroscience computer science and other fields this accessible and richly illustrated book describes cutting edge research and puts it in the context of the history of efforts to read personality from faces Todorov describes how we have evolved the ability to read basic social signals and momentary emotional states from faces using a network of brain regions dedicated to the processing of faces Yet contrary to the nineteenth century pseudoscience of physiognomy and even some of today s psychologists faces don t provide us a map to the personalities of others Rather the impressions we draw from faces reveal a map of our own biases and stereotypes A fascinating scientific account of first impressions Face Value explains why we pay so much attention to faces why they lead us astray and what our judgments actually tell us
