Seinemaritime Normandie Guides Gallimard:

Turner on the Seine Ian Warrell, Tate Gallery, 1999 Turner published two volumes of views of the River Seine in the early 1830s when he was at the height of his success All of the watercolours he completed for the project are reproduced in this book along with many of his preliminary studies As the text demonstrates the watercolours are born out of Turner's long familiarity with the river His views came as part of an explosion in the market for travel books particularly for the area between Paris and the coast and a number of these comparable publications with their illustrations by some of Turner's finest rivals are discussed The book also examines how Turner confronted the technical innovations of the new age making contemporary features such as canals and steamboats the subjects of his pictures and thereby preparing the ground for masterpieces such as *The Fighting Temeraire* *Hybrids* Bashir A. Schneider, 2008 An examination of kings courts and lords courts in Normandy that opens a new chapter in the debate over absolutism sovereignty and the nature of the state in early modern France Hidden deep in the countryside of France lay early modern Europe's largest bureaucracy

twenty to thirty thousand royal bailiwick and seignorial courts that served more than eighty five percent of the king's subjects. The crown courts and lords' courts were far more than arenas of litigation in the modern sense. They had become the nexus of local governance by the middle of the seventeenth century, a rich breeding ground for men who controlled the villages, towns and bailiwicks of France. Yet even as the centralizing state was reaching its zenith under Louis XIV, the king's largest permanent bureaucracy became increasingly alienated and cut adrift from the crown many decades before the French Revolution. In *The King's Bench*, Zo Schneider vividly brings to life the teeming world of the local courts with their magistrates and jailers, townspeople and peasants. Together they contested that vital border where the private world of families and property collided with the public commonwealth. Schneider chronicles the transformation of local governance after the mid-seventeenth century as judges and their courts became the face of public order in the countryside. With this richly detailed local study of Normandy in the seventeenth and early eighteenth centuries, Zo Schneider opens a new chapter in the debate over absolutism, sovereignty and the nature of the state in early modern France. Zo A. Schneider has taught at Georgetown University and with the Smithsonian Institution in Washington D.C.
