Microeconomics Of Income Distribution Dynamics In East Asia And Latin America:

The Microeconomics of Income Distribution Dynamics in East Asia and Latin America François

Bourguignon, Francisco H. G. Ferreira, Nora Lustig, 2004 This book is about how the distribution of income changes during the process of income development Understanding development and the process of poverty reduction requires understanding not only how total income grows but also how its distribution behaves over time The authors propose a decomposition of differences in entire distributions of household incomes shedding new light on the powerful and often conflicting forces that underpin the changes in poverty and inequality that accompany the process of economic development This approach is applied to three East Asian countries Indonesia Malaysia and China and to four in Latin America Argentina Brazil Colombia and Mexico

Falling Inequality in Latin America Giovanni Andrea Cornia, 2014-01-16 The volume aims to document and explain the sizeable decline of income inequality that has taken place in Latin America during the 2000s It does so through an exploration of inequality changes in six representative countries and ten policy chapters dealing with macroeconomics foreign trade taxation labour market human capital formation and social assistance which point to the emergence of a new policy model The volume addresses a major issue in economic development with profound implications for many developing regions and those OECD countries mired in a long lasting financial crisis and economic stagnation For at least the last quarter of the twentieth century Latin America suffered from low growth rising inequality and frequent financial crises However since the turn of the century growth accelerated inequality declined poverty fell and macroeconomic stability improved all this in parallel to the spread of centre left political regimes in three quarters of the region This inequality decline has taken many by surprise as for a long time the region has been a symbol of a deeply entrenched unequal distribution of assets incomes and opportunities limited or no state redistribution and a deeply embedded authoritarianism enforcing an unjust status quo The recent Latin American experience is particularly valuable as inequality was reduced under open economy conditions and in a period of intensifying global integration which have often been considered as a source of rising inequality In this sense however imperfect the recent Latin American experience may be of interest to countries completing their transition to the market and liberal democracy as in the former socialist countries of Europe facing a political transition as those affected by the Arab Spring Myanmar and countries in sub Saharan Africa or recording rises in inequality and social tensions in spite of rapid economic growth as in China and India Until recently there was not much agreement on the drivers of the inequality decline in the region which was attributed to changes in the supply demand of skilled workers improvements in terms of trade the spread of social assistance schemes or luck In this respect the volume offers the first scholarly and systematic exploration of this unexpected change As income inequality has been rising and is currently rising in many parts of the world a good understanding of the Latin American experience over the 2000s is a topic that will inform and generate a lot of attention

Simulating Distributional Impacts of Macro-dynamics Sergio Olivieri,Sergiy Radyakin,Stanislav Kolenikov,Michael Lokshin,Ambar Narayan,Carolina Sanchez-Paramo,2014-09-23 Simulating Distributional Impacts of Macro dynamics Theory and Practical Applications is a comprehensive guide for analyzing and understanding the effects of macroeconomic shocks on income and consumption distribution as well as using the ADePT Simulation Module Since real time micro data is rarely available the Simulation Module part of the ADePT economic analysis software takes advantage of historical household surveys to estimate how current or proposed macro changes might impact household and individuals welfare Using examples from different economic and social contexts the book explains macro micro linkages in an easy and intuitive way After developing a sound theoretical foundation readers are then shown how to explore their own scenarios using the Simulation Module Step by step instructions illustrate data entry and show how to make adjustments using the Module s options Exercises present how different sections of the simulation process operate independently This book will be a valuable reference for analysts needing to evaluate the potential impact of structural reforms and to generate projections for hypothetical scenarios Results created by the Simulation Module will be helpful in informing governmental policymaking

Earnings Inequality Within and Across Gender, Racial, and Ethnic Groups in Four latin Amercian Countries , **The Rise and Fall of Brazilian Inequality, 1981-2004** Phillippe George Leite,Julie A. Litchfield,2006 Measured by the Gini coefficient income inequality in Brazil rose from 0.57 in 1981 to 0.63 in 1989 before falling back to 0.56 in 2004 This latest figure would lower Brazil s world inequality rank from 2nd in 1989 to 10th in 2004 Poverty incidence also followed an inverted U curve over the past quarter century rising from 0.30 in 1981 to 0.33 in 1993 before falling to 0.22 in 2004 Using standard decomposition techniques this paper presents a preliminary investigation of the determinants of Brazil s distributional reversal over this period The rise in inequality in the 1980s appears to have been driven by increases in the educational attainment of the population in a context of convex returns and by high and accelerating inflation While the secular decline in inequality which began in 1993 is associated with declining inflation it also appears to have been driven by four structural and policy changes which have so far not attracted sufficient attention in the literature namely sharp declines in the returns to education pronounced rural urban convergence increases in social assistance transfers targeted to the poor and a possible decline in racial inequality Although poverty dynamics since the Real Plan of 1994 have been driven primarily by economic growth the decline in inequality has also made a substantial contribution to poverty reduction World Bank web site

[Macroeconomics and Human Development](#) Deepak Nayyar,2015-07-16 In the conventional discourse on macroeconomics the subject of human development is at best marginal and at worst irrelevant In the unconventional discourse on human development macroeconomics or its constraints are seldom recognised even if its consequences are often highlighted There are however intersections and interconnections

which provide the rationale for this book that seeks to map some broad contours of an unexplored yet important domain Macroeconomics is important for human development because it determines levels of employment the degree of social protection and the public provision of services such as healthcare or education Human development has implications and consequences for macroeconomics for it can mobilize or claim resources to enlarge or diminish space for macroeconomic policies The relationship exists and matters not only in poor countries but also in wealthy ones Employment even if neglected provides the critical link This book shows that causation runs in both directions and can be either positive or negative It reveals similarities and differences between developing countries and industrialised countries The political context is significant everywhere as interests ideology and institutions influence economic policies in both spheres to shape outcomes This book was originally published as a special issue of the Journal of Human Development and Capabilities

Understanding Changes in Poverty Gabriela Inchauste, João Pedro Azevedo, B. Essama-Nssah, Sergio Olivieri, Trang Van Nguyen, Jaime Saavedra-Chanduvi, Hernan Winkler, 2014-08-21
The 2015 Millennium Development Goal to cut in half the share of the world s population living in extreme poverty was met with time to spare By 2013 the percentage of developing country populations living in extreme poverty decreased from 43 percent in 1990 to 21 percent by 2010 Clearly there is still a long way to go with 1.2 billion people without enough to eat What can we learn from the recent success This volume presents recent methods to decompose the contributions to poverty reduction What was the main contributor to poverty reduction Using a simple accounting approach we find that labor income growth was the largest contributor to moderate poverty reduction for a group of 21 countries with substantial reductions in poverty over the past decade Moreover in most cases it was the growth in income per worker that contributed the most to poverty reduction rather than an increase in employment Changes in demographics public transfers and remittances helped but made relatively smaller contributions to poverty reduction Public transfers were important in reducing extreme poverty pointing to the crucial role of social protection systems How was labor income growth able to reduce poverty After a review of the literature a structural decomposition method is presented and implemented in three countries The results show that

that labor income grew mainly because of higher returns to human capital endowments This could signal increases in productivity a higher relative price of labor or both In Bangladesh and Peru this was driven by higher returns to workers with low levels of education which may have partly been driven by higher food prices In contrast in Thailand poverty fell partly due to increasing returns to education

Inequality in the Developing World Carlos Gradín, Murray Leibbrandt, Finn Tarp, 2021 An analysis of the elevated level of contemporary global economic inequality its measurement trends over time and geography and the policy challenges thrown up by them with a focus on mainly five countries Brazil China India South Africa and Mexico

Africa at a Turning Point? Delfin Sia Go, John Page, 2008-04-14 Since the mid 1990s sub Saharan Africa has experienced an acceleration of economic growth that has produced rising incomes and faster human development However this growth contrasts with the continent s experience between 1975 and 1995 when it largely missed out on two decades of economic progress This disparity between Africa s current experience and its history raises questions about the continent s development Is there a turnaround in Africa s economy Will growth persist Africa at a Turning Point is a collection of essays that analyzes three interrelated aspects of Africa s recent revival The first set of essays examines Africa s recent growth in the context of its history of growth accelerations and collapses It seeks to answer such questions as is Africa at a turning point Are the economic fundamentals finally pointing toward more sustainable growth The second set of essays looks at donor flows which play a large role in Africa s growth These essays focus on such issues as the management and delivery of increased aid and the history and volatility of donor flows to Africa The third set of essays considers the recent impact of one persistent threat to sustained growth in Africa commodity price shocks particularly those resulting from fluctuations in oil prices
