Mound Builders:

The Mound Builders John Patterson MacLean, 1879 *The Mound Builders* Stephen Denison Peet, 1892 *The Mound Builders* Robert Silverberg, 1986-05-01 In Illinois the one hundred foot Cahokia Mound spreads impressively across sixteen acres and as many as ten thousand more mounds dot the Ohio River Valley alone *The Mound Builders* traces the speculation surrounding these monuments and the scientific excavations which uncovered the history and culture of the ancient Americans who built them The mounds were constructed for religious and secular purposes some time between 1000 B C and 1000 A D and they have prompted curiosity and speculation from very early times European settlers found them evidence of some ancient and glorious people Even as eminent an American as Thomas Jefferson joined the controversy though his conclusions that the mounds were actually cemeteries of ancient Indians remained unpopular for nearly a century Only in the late 19th century as Smithsonian Institution investigators developed careful methodologies and reliable records did the period of scientific investigation of the mounds and their builders begin Silverberg follows these excavations and then recounts the story they revealed of the origins development and demise of the mound builder culture *The Mound Builders* J. P. MacLean, 1999 *The Mound Builders* George Bryce, 2019-11-26 In *The Mound Builders* George Bryce delves into the intriguing world of the prehistoric civilizations that constructed the monumental earthworks across North America Blending meticulous research with evocative prose Bryce captures the rich fabric of life among these cultures exploring social structures ritualistic practices and the environmental contexts that shaped their existence His narrative is enriched with anthropological insights making it a crucial text for understanding early Native American societies and their spatial expressions in the form of mounds and earthworks a potent symbol of their legacy George Bryce a prominent historian and archaeologist dedicated much of his academic career to uncovering the narratives of indigenous populations in North America His scholarly pursuits were heavily influenced by his fascination with the complex interplay between human societies and their environments Bryce s thorough fieldwork and engagement with local histories lend depth to his analysis allowing readers to appreciate the subtleties of Mound Builder culture and its significance within the broader tapestry of American history This compelling exploration of the Mound Builders is essential reading for anyone interested in anthropology archaeology or early American history Bryce s ability to synthesize complex ideas while maintaining an accessible narrative style makes this book an invaluable resource for both scholars and general readers alike as it invites reflection on the intricate layers of history that continue to shape contemporary understandings of cultural identity *The Mound-Builders* H. Martin Byers,2018-02-02 The Real Mound Builders of North America takes the standard position that the cultural communities of the Late Woodland period hiatus when little or no transregional monumental mound building and ceremonialism existed were the linear cultural and social ancestors of the communities responsible for the monumental earthworks of the unique Mississippian ceremonial assemblage and further these Late Woodland communities were the direct linear cultural and social descendants of those communities responsible for the great Hopewellian earthwork mounds and embankments and its associated unique ceremonial assemblage Byers argues that these communities persisted largely unchanged in terms of their essential social structures and cultural traditions while varying only in terms of their ceremonial practices and their associated sodality organizations that manifested these deep structures This continuist historical trajectory view stands in contrast to the current dominant evolutionary view that emphasizes abrupt social and cultural discontinuities with the Hopewellian ceremonial assemblage and earthworks mounds and embankments **The Mound Builder Myth** Jason Colavito,2020-02-20 Say you found that a

few dozen people operating at the highest levels of society conspired to create a false ancient history of the American continent to promote a religious white supremacist agenda in the service of supposedly patriotic ideals Would you call it fake news In nineteenth century America this was in fact a powerful truth that shaped Manifest Destiny The Mound Builder Myth is the first book to chronicle the attempt to recast the Native American burial mounds as the work of a lost white race of true native Americans Thomas Jefferson s pioneering archaeology concluded that the earthen mounds were the work of Native Americans In the 1894 report of the Bureau of American Ethnology Cyrus Thomas concurred drawing on two decades of research But in the century in between the lie took hold with Presidents Andrew Jackson William Henry Harrison and Abraham Lincoln adding their approval and the Mormon Church among those benefiting Jason Colavito traces this monumental deception from the farthest reaches of the frontier to the halls of Congress mapping a century long conspiracy to fabricate and promote a false ancient history and enumerating its devastating consequences for contemporary Native people Built upon primary sources and first person accounts the story that The Mound Builder Myth tells is a forgotten chapter of American history but one that reads like the Da Vinci Code as it plays out at the upper reaches of government religion and science And as far fetched as it now might seem that a lost white race once ruled prehistoric America the damage done by this ancient myth has clear echoes in today s arguments over white nationalism multiculturalism alternative facts and the role of science and the control of knowledge in public life

Mound Builders and Monument Makers of the Northern Great Lakes, 1200-1600 Meghan C L Howey,2012-11-20 Rising above the northern Michigan landscape prehistoric burial mounds and impressive circular earthen enclosures bear witness to the deep history of the region s ancient indigenous peoples These mounds and earthworks have long been treated as isolated finds and have never been connected to the social dynamics of the time in which they were constructed a period called Late Prehistory In Mound Builders and Monument Makers of the Northern Great Lakes 1200 1600 Meghan C L Howey uses archaeology to make this connection She shows how indigenous

communities of the northern Great Lakes used earthen structures as gathering places for ritual and social interaction which maintained connected egalitarian societies in the process Examining every available ceramic sherd from every northern earthwork Howey combines regional archaeological investigations with ethnohistory analysis of spatial relationships and collaboration with tribal communities to explore changes in the area s social setting from 1200 to 1600 During this time cultural shifts such as the adoption of maize horticulture led to the creation of the earthen constructions Burial mounds were erected marking claims to resources and defining areas for local ritual gatherings while massive circular enclosures were constructed as intersocietal ceremonial centers Together Howey shows these structures made up part of an interconnected purposefully designed cultural landscape When societies incorporated the earthworks into their egalitarian social and ritual behaviors the structures became something more ceremonial monuments The first systematic examination of earthen constructions in what is today Michigan Mound Builders and Monument Makers of the Northern Great Lakes 1200 1600 reveals complicated indigenous histories that played out in the area before European contact Howey s richly illustrated investigation increases our understanding of the diverse cultures and dynamic histories of the pre Columbian ancestors of today s Great Lake tribes **The Message of the Mound Builders to the Twentieth Century** Archer Butler
