Heaven and Earth in Early Han Thought John S. Major, 1993-01-01 The Huainanzi has in recent years been recognized by scholars as one of the seminal works of Chinese thought at the beginning of the imperial era a summary of the full flowering of early Taoist philosophy This book presents a study of three key chapters of the Huainanzi The Treatise on the Patterns of Heaven The Treatise on Topography and The Treatise on the Seasonal Rules which collectively comprise the most comprehensive extant statement of cosmological thinking in the early Han period Major presents for the first time full English translations of these treatises He supplements the translations with detailed commentaries that clarify the sometimes arcane language of the text and presents a fascinating picture of the ancient Chinese view of how the world was formed and sustained and of the role of humans in the cosmos

he explains the origin and meaning of their compelling ideas Because none of these classics was written in its current form by the author to whom it is attributed the book begins by asking What are we reading and showing that understanding the textual history of the works enriches our appreciation of them A chapter is devoted to each of the eight works and the chapters are organized into three sections Philosophy of Heaven which looks at how the Analects Mozi and Mencius discuss often skeptically Heaven tian as a source of philosophical values Philosophy of the Way which addresses how Laozi Zhuangzi and Sunzi introduce the new concept of the Way dao to transcend the older paradigms and Two Titans at the End of an Age which examines how Xunzi and Han Feizi adapt the best ideas of the earlier thinkers for a coming imperial age In addition the book presents clear and insightful explanations of the protean and frequently misunderstood concept of qi and of a crucial characteristic of Chinese philosophy nondeductive reasoning The result is an invaluable account of an endlessly fascinating and influential philosophical tradition

Identity Reflections Brian R. Dott, 2020-05-11 The social structure of contemporary Korea contains strong echoes of the hierarchical principles and patterns governing stratification in the Chosŏn dynasty 1392-1910 namely birth and one's position in the bureaucracy At the beginning of Korea's modern era the bureaucracy continued to exert great influence but developments undermined instead of reinforced aristocratic dominance Furthermore these changes elevated the secondary status groups of the Chosŏn dynasty those who had belonged to hereditary endogamous tiers of government and society between the aristocracy and the commoners specialists in foreign languages law medicine and accounting the clerks who ran local administrative districts the children and descendants of concubines the local elites of the northern provinces and military officials These groups had languished in subordinate positions in both the bureaucratic and social hierarchies for hundreds of years under an ethos and organization that based predominantly on family lineage consigned them to a permanent place below the Chosŏn aristocracy As the author shows the political disruptions of the late nineteenth and early twentieth centuries however rewarded talent instead of birth In turn these groups newfound standing as part of the governing elite allowed them to break into and often dominate the cultural literary and artistic spheres as well as politics education and business Mount Tai in northeastern China has long been a sacred site Indeed it epitomizes China's religious and social diversity Throughout history it has been a magnet for both women and men from all classes emperors aristocrats officials literati and villagers For much of the past millennium however the vast majority of pilgrims were illiterate peasants who came to pray for their deceased ancestors as well as for sons good fortune and health Each of these social groups approached Mount Tai with different expectations Each group's or individual's view of the world interpersonal relationships and ultimate goals or dreams in a word its identity was reflected in its interactions with this sacred site This book examines the behavior of those who made the pilgrimage to Mount Tai and their interpretations of its sacrality and history as a means of better understanding their identities and mentalities It is the first to trace the social landscape of Mount Tai to examine the mindsets not just of prosperous male literati but also of women and

illiterate pilgrims and to combine evidence from fiction poetry travel literature and official records with the findings of studies of material culture and anthropology *Spiritual Tourism* Alex Norman, 2011-11-24 First volume exploring spiritual tourism as a phenomenon in Western cultures of travel discussing the relationship between contemporary tourism and secular approaches to religious practices **Rogue Flows** Koichi Iwabuchi, Stephen Muecke, Nabdt Thomas, 2004-11-01 Rogue Flows brings together some of the best and most knowledgeable writers on consumption and cultural theory to chart the under explored field of cultural flows and consumption across different regions in Asia and the importance of these flows in constituting contemporary Asian national identities It offers innovative possibilities for envisioning how the transfer of popular and consumer culture such as TV music film advertising and commodities across Asian countries has produced a new form of cross cultural fertilisation within Asian societies which does not merely copy Western counterparts Rogue Flows is unique in its investigation of how Asianness is being exploited by Asian transnational cultural industries and how it is involved in the new power relations of the region It is an important contribution to the literature of Asian cultural studies
