Painting Reality:

Painting and Reality Etienne Gilson, 2023-08-15 A classic study of the art of painting and its relationship to reality In this book Etienne Gilson puts forward a bold interpretation of the kind of reality depicted in paintings and its relation to the natural order Drawing on insights from the writings of great painters from Leonardo Reynolds and Constable to Mondrian and Klee Gilson shows how painting is foreign to the order of language and knowledge Painting he argues seeks to add new beings to nature not to represent those that already exist For this reason we must distinguish it from another art that of picturing which seeks to produce images of actual or possible beings Though pictures play an important part in human life they do not belong in the art of painting Through this distinction Gilson sheds new light on the evolution of modern painting A magisterial work of scholarship by an acclaimed historian of philosophy *Painting and Reality* features paintings from both classical and modern schools and includes extended selections from the writings of Reynolds Delacroix Gris Gill and Ozenfant

Astral Planes and Your Other Realities Valentin

Matcas,2016-04-20 Can you visit other planes and realities But can you live other lives there in your other planes and realities People can always tell beautiful paranormal stories or who knows you might have already been there yourself saw them felt them and now this is why you search through all higher knowledge to learn more about your experience But was it real Are your other worlds real as real as this world All realities are real in a rather trivial manner And even more all realities are objectively real but only as long as you are there Since existence defines them similarly determining closely your continuous firsthand experience Furthermore many realities are part of life part of this life that we have here in this world And now if you have found your way into these other planes of existence in a conscious manner it might have been a natural process altogether and not exactly a random experience It had a purpose while you might have missed fulfilling it and now it is certainly meaningful to know everything that you can ever discover Yet if you have never had a paranormal experience yourself and now you simply wonder what is going there are very powerful drugs that you take regularly with your food drinks drugs and medicine meant to hold you forcefully in this world And now this is exactly what you do you remain here nicely for life And it happens with everybody or almost depending on where you live or depending on your development and genetic background There is a difference between astral planes the natural human environment and your other realities Because existence comes in three distinct levels used to distinguish between your higher and lower realities While you can understand all your realities through your mind reasoning awareness and imagination since even this world makes sense to you only as part of your reasoning awareness mind and imagination and not exactly directly as anyone may expect And this is the case because there is no other way to experience anything in life and in the wider world but through your perception reasoning and understanding and through the multitude of your selves intelligences and identities present throughout all your realities And this is why you cannot understand astral planes along with your other realities if you do not understand your cognitive system first along with your intelligences selves memories and expectations since everything is interconnected This interesting entanglement of meanings and constraints causes the ultimate truth of your wider existence to remain hidden beneath strong consensual conditions and within tedious loops of reasoning remaining inaccessible in this manner to the ignorant and to the unconditional follower of common ideologies while allowing the truth only to those living life freely consciously and in full awareness and understanding of the wider world through the fulfillment of all natural higher level needs and meanings Because these are your developmental opportunities that you experience in each one of your worlds and realities while following the fulfillment of your natural intelligent human needs for higher experience and higher development This book studies you and your life and existence throughout all your realities that you employ encounter inhabit create and co create throughout your wider existence helping you understand who you are through all your selves and intelligences as you live your life throughout all your worlds and realities If you seek to gain wider understanding of who you truly are this book is for you

Human Creation Between Reality and Illusion Anna-Teresa Tymieniecka,2006-06-30

Identifying quickly illusion with deception we tend to oppose it to the reality of life However investigating in this collection of essays illusion s functions in the Arts which thrives upon illusion and yet maintains its existential roots and meaningfulness in the real we might wonder about the nature of reality itself Does not illusion open the seeming confines of factual reality into horizons of imagination which transform it Does it not like art belong essentially to the makeup of human reality Papers by Lanfranco Aceti John Baldacchino Maria Avelina Cecilia Lafuente Jo Ann Circosta Madalina Diaconu Jennifer Anna Gosetti Ferencei Brian Grassom Marguerite Harris Andrew E Hershberger James Carlton Hughes Lawrence Kimmel Jung In Kwon Ruth Ronen Scott A Sherer Joanne Snow Smith Max Statkiewicz Patricia Trutty Coohill Daniel Unger James Werner

Working Space Frank Stella,1986 A bombshell this is a book that explodes many received ideas about abstraction It is certainly one of the most remarkable books ever written on the subject What makes it so remarkable of course is that Stella is unquestionably the most celebrated abstract painter of his generation Hilton Kramer Atlantic Working Space affords a rare opportunity to view painting from the inside out through the eyes of one of the world s most prominent abstract painters Frank Stella describes his perception of other artists work as well as his own in this handsomely illustrated volume Stella uses the crisis of representational art in sixteenth century Italy to illuminate the crisis of abstraction in our time The artists who followed Leonardo Michelangelo Raphael and Titian searched for new directions to advance their work from beneath the shadow of these great painters Caravaggio pointed the way So today Stella believes the successors to Picasso Kandinsky and Pollock must seek a pictorial space as potent as the one Caravaggio developed at the beginning of the seventeenth century Stella sees Caravaggio as the pivot on whom painting turns his consummate illusionism prompting the advance of a more flexible more real space that allows painting to move and breathe to suggest extension and unrestricted motion Following Caravaggio Rubens broad vision of fullness and active volume gave painting a momentum that helped propel it into the nineteenth century where it came to rest in the genius of G ricault and Manet themselves the precursors of modern painting Unfortunately both contemporary abstract art and figurative painting have become trapped by ambiguous pictorial space and by a misguided emphasis on materiality pigment for pigment s sake Pictorial qualities have given way to illustrational techniques Abstract art has become verbal defensive and critical caught up in theology masquerading as theory Stella asserts that painting must understand its past make use of the lucid realism of seventeenth century Italy and absorb a Mediterranean physicality to reinforce the lean spirituality of northern abstraction pioneered by Mondrian and Malevich Working Space will provoke discussion and argument not least because Stella offers nontraditional evaluations of the works of giants such as Raphael Titian Michelangelo Picasso and Pollock as well as lesser known figures including Annibale Carracci Paulus Potter and Morris Louis The artist s powers of discernment and the profusion of his ideas and opinions will dazzle and engage professionals amateurs and students of art **The Logical Alien** Sofia Miguens,2020-01-14 Is our logical form of thought merely one among many or must it be the form of thought as such From Kant to Wittgenstein

philosophers have wrestled with variants of this question This volume brings together nine distinguished thinkers on the subject including James Conant author of the seminal paper The Search for Logically Alien Thought **How, When, and Why Modern Art Came to New York** Marius de Zayas,1998 This work originally written in the late 1940s is a chronicle assembled from the author's personal archive of photographs and newspaper reviews of the exhibitions he discusses His writings informed American public opinion on artistic developments Theory and Practice of Contrast Mariusz Stanowski,2021-06-09 The book Theory and Practice of Contrast completes corrects and integrates the foundations of science and humanities which include theory of art philosophy aesthetics epistemology ontology axiology cognitive science theory of information theory of complexity and physics Through the integration of these distant disciplines many unresolved issues in contemporary science have been clarified or better understood among others defining impact contrast and using this definition in different fields of knowledge understanding what beauty art is and what our aesthetic preferences depend on deeper understanding of what complexity and information are in essence and providing their general definitions Complexity means integration value and goodness concepts that seem to be neglected today The book also has a high degree of integration complexity although each chapter introduces a new issue The last chapter Binary Model of the Universe draws attention to the need for including in physics the analysis of our mind and the resulting new possibilities which include the mentioned digital model of the universe Despite the difficult issues raised here this study is written in accessible language and may be interesting not only for scientists and academics
