Paisatges De Catalunya:

El Paisatge de Catalunya Marcel Chevalier, 1928 **Landscape dimensions** Council of Europe, 2017-04-28 As a key element of individual and social well being and quality of life landscape plays an important part in human fulfilment and in reinforcement of European identity Adopted under the auspices of the Council of Europe the European Landscape Convention aims to promote the protection management and planning of landscapes and to organise international co operation in this field It applies to the entire territory of the contracting parties and covers natural rural urban and peri urban areas It concerns landscapes considered outstanding as well as everyday or degraded areas Certain dimensions of the landscape are presented in this publication which addresses key issues for its future including democracy education economy leisure and advertising Landscape management processes and even the term landscape itself are also analysed This book forms part of a process of reflection on the major themes concerning the living environment **Geographies of Mediterranean Europe** Rubén Camilo Lois-González, 2020-12-11 This edited volume highlights the geographies of six European Mediterranean countries France Spain Italy Portugal Turkey and Greece The book provides a balanced overview on what the geographers of these six countries have investigated and reflected in recent decades This thematically arranged book takes into account the national differences of the authors but also highlights the main contributions of Mediterranean geographies on a global scale It reinforces a perception of common problems and debates in Southern Europe This book appeals to the institutionalized geographical community of Mediterranean countries but also to a global audience of scholars of geography territorial and spatial studies social sciences and history **Els Paisatges de l'aigua al delta del Llobregat** Secció de Filosofia i Ciències Socials, 2016-11-16 El delta del Llobregat actual s'un paisatge en mosaic ben lluny de com seria sense la influència humana format per peces molt diverses des d'aiguamolls que es podrien assemblar als naturals fins a espais totalment cimentats Els paisatges de l'aigua al delta del Llobregat presenta aquesta realitat complexa percebuda per dos geògrafs que se centren en la formació del paisatge i en com ha evolucionat en relació amb les estratègies per aprofitar el recurs més preuat del Delta l'aigua Segons el sistema d'explotació i la intensitat en l'ús de l'aigua es forma un paisatge particular que evoluciona tenint en compte la dinàmica pròpia dels diferents fenòmens naturals i dels aprofitaments que se'n fan Malgrat tot cal assenyalar que darrerament el valor més preuat s'ha deixat de banda del punt de vista urbanístic on l'aigua té un paper destacat Les idees clau s'exposen a partir dels grans sistemes d'aprofitament hidrogràfic Quant a les fases d'aquest aprofitament no es poden delimitar d'una manera precisa ja que se superposen en el temps i en certa manera també en l'espai Fins i tot es pot dir que actualment coexisteixen tots els tipus considerats A grans trets es pot parlar de diferents fases una d'aprofitaments molt extensius de collita i pastura en què predomina la dinàmica natural una d'agricultura de sec amb una superfície dessecada notable per amb extenses zones humides i dunars una d'agricultura de regadiu gràcies a la construcció de dos grans canals i nombrosos pous una d'industrial una de residencial una de serveis i finalment una fase logística

Malgrat que el delta del Llobregat s'un espai molt transformat la seva formació natural i sobretot la humanització del paisatge s'han relativament recents i s'ha de preveure que en un futur no gaire lluny encara s'hi esdevinguin canvis molt grans pel fet d'estar situat dins l'àrea Metropolitana de Barcelona. El repte més gran és assolir un equilibri entre els diferents serveis i la qualitat de vida dels ciutadans. En aquest aspecte hi ha de tenir un paper destacat el Parc Agrari del Baix Llobregat que engloba un ampli espai agrícola al bell mig del Delta. L'adequada integració dels cursos d'aigua en la xarxa urbana industrial comercial i de lleure ha de ser una garantia per assolir un paisatge divers i esponjós. *Fires i mercats a Catalunya* Lluís Casassas i Simó, 2002, *Revista de Catalunya*, 1924. **Landscape and Identity in the Modern Basque Country, 1800 to 1936**

Maitane Ostolaza, 2022-12-30. *Landscape and Identity in the Modern Basque Country 1800 to 1936* studies the relationship between landscape and modern identities in the Basque Country. Using an interdisciplinary approach that combines cultural history and geography it analyses the process of historical construction of the Basque landscape highlighting its multiple political, social and cultural meanings. The book is divided into two parts: the first examines the discourses, images and representations of the Basque landscape; the second examines landscape practices through tourism, hiking and mountaineering. Focusing on the Basque case but establishing numerous connections with comparable phenomena in Western Europe, the book demonstrates that the landscape became a structuring element insofar as it helped shape individual identities while participating in the creation of social links. This book examines the processes of identity construction from below by means of new interpretative tools such as the experience of landscape. This work, originally published in French, brings to an English speaking audience a crucial issue in the modern history of the Basque Country: namely the cultural construction of a collective identity within the framework of a nation state such as Spain confronted with multiple territorial identities. Approaching this question from the perspective of landscape provides new keys to understanding the processes of nation building that occurred in Europe in the nineteenth and twentieth centuries. *Ninth International Symposium "Monitoring of Mediterranean Coastal Areas: Problems and Measurement Techniques"* Laura Bonora, Donatella Carboni, Matteo De Vincenzi, Giorgio Matteucci, 2022-12-31. The ninth International Symposium Monitoring of Mediterranean Coastal Areas: Problems and Measurements Techniques was organized by CNR IBE in collaboration with Italian Society of Silviculture and Forest Ecology and Natural History Museum of the Mediterranean and under the patronage of University of Florence, Accademia dei Lincei, Accademia dei Georgofili, Tuscany Region, The North Tyrrhenian Sea Ports System Authority, Livorno Municipality and Livorno Province. In the Symposium, scholars had illustrated their activities and exchanged innovative proposals with common aims to promote actions to preserve coastal marine environment. Despite the COVID-19 pandemic, the success of this edition is attested by the 170 contributions selected by the Scientific Committee from among those received. Participation involved all the thematic lines envisaged by the sessions involving many countries of the Mediterranean Sea. A big endeavor for a coastal environment of paramount importance but threatened by

global changes The importance of this Proceedings is attested by the fact that this volume is the first issue of a new FUP Series *Spanish Tourism Geographies* Asunción Blanco-Romero, Macià Blázquez-Salom, 2023-09-30 This book provides an overview of the progress in Spanish tourism geography particularly after the overlay of financial pandemic and climate crisis by the scrutiny of the different geographical areas and variables of analysis It shows the diversity of geographical environments and their varied relationship with tourism from the emptied inland regions to urban heritage in historic centres to coastal resorts The book also introduces the analysis of the most important variables when studying the implications of Spanish tourist specialization How are the beaches with intensive tourist use managed What socio spatial processes do leisure rooted migrations involve What are the labour conditions in the Spanish tourism industry How does saving water boost tourism growth The book offers answers through a methodological specificity of Spanish geography which is highly oriented towards the analysis of public policies and even the proposal of new planning and methodology formulas that go beyond diagnostic studies The domestic perspective or that of insiders of these scientists residing in Spain bestows them with special codes for conducting interpretations and analyses based on their everyday proximity to a territory characterised by its intense touristification The tourism and real estate specialisation that Spanish society together with its territory and institutions have forged since the beginning of developmentalism permeates this scientific analysis By providing a strong conceptual and empirical portrait this book is a great resource for students and scholars in geography of tourism as well as for social scientists and policy makers
