Palaeohydrology And Environmental Change:

Palaeohydrology and Environmental Change G. Benito, Victor R. Baker, K. J. Gregory, 1998-12-04 Paleohydrology is the study of how the composition distribution and movement of water many have influenced environmental change over time Using in depth case studies from North America Europe Asia and Australia this book explores paleohydrological reconstruction and its implications on past and future environmental change *Palaeohydrology* Jürgen Herget, Alessandro Fontana, 2019-06-29 The book provides a review of the most relevant topics on the booming discipline of palaeohydrology and focuses on previous extreme events like exceptional floods and droughts Reviews written by leading experts of their fields are combined with selected key studies and presentations on up to day methodical and conceptional topics as a perspective for further research Consequently the compilation provides an excellent review on the state of the art of numerous relevant topics of palaeohydrology and acts as unique introduction for early career scientists and scientists of different disciplines working on hydrological extreme events both in basic research and applied aspects *Encyclopedia of Environmental Change* John A Matthews, 2013-12-13 Accessibly written by a team of international authors the Encyclopedia of Environmental Change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from the polar regions to the tropics Responses of geo ecosystems and human environmental systems in the face of past present and future environmental change Approaches methodologies and techniques used for reconstructing dating monitoring modelling projecting and predicting change Social economic and political dimensions of environmental issues environmental conservation and management and environmental policy Over 4 000 entries explore the following key themes and more Conservation Demographic change Environmental management Environmental policy Environmental security Food security Glaciation Green Revolution Human impact on environment Industrialization Landuse change Military impacts on environment Mining and mining impacts Nuclear energy Pollution Renewable resources Solar energy Sustainability Tourism Trade Water resources Water security Wildlife conservation The comprehensive coverage of terminology includes layers of entries ranging from one line definitions to short essays making this an invaluable companion for any student of physical geography environmental geography or environmental sciences Hydrology and Global Environmental Change Nigel W. Arnell, 2014-10-13 Hydrology and Global Environmental Change presents the hydrological contribution to and consequences of global environmental change Assuming little or no prior knowledge on the part of the reader the book looks at the main processes of global environmental change global scale processes large regional processes repetitive processes and how the hydrological cycle processes and regimes

impact on GEC and vice versa The SAGE Handbook of Environmental Change John A Matthews,2012-01-31 The SAGE Handbook of Environmental Change is an extensive survey of the interdisciplinary science of environmental change including recent debates on climate change and the full range of other natural and anthropogenic changes affecting the Earth ocean atmosphere system in the past present and future It examines the historic importance present status and future prospects of the field over two volumes With more than 40 chapters the books situate the defining characteristics and key paradigms within a state of the art review of the field including its changing nature and diversity of approaches evidence base key theoretical arguments resonances with other disciplines and relationships between theory research and practice Opening with a detailed contextualizing essay by the editors the work is arranged into six parts Part One Approaches to Understanding Environmental Change Part Two Evidence of Environmental Change and the Geo ecological Response Part Three Causes Mechanisms and Dynamics of Environmental Change Part Four Key Issues of Human induced Environmental Changes and Their Impacts Part Five Patterns Processes and Impacts of Environmental Change at the Regional Scale Part Six Responses of People to Environmental Change and Implications for Society Global in its coverage scientific and theoretical in its approach the books bring together an international set of respected editors and contributors to provide an exciting timely addition to the literature on climate change With the subjects interdisciplinary framework this book will appeal to academics researchers postgraduates and practitioners in a variety of disciplines including geography geology ecology environmental science archaeology anthropology politics and sociology Late Quaternary Environmental Change Martin Bell,M.J.C. Walker,2014-07-10 Late Quaternary Environmental Change addresses the interaction between human agency and other environmental factors in the landscapes particularly of the temperate zone Taking an ecological approach the authors cover the last 20 000 years during which the climate has shifted from arctic severity to the conditions of the present interglacial environment Abrupt Climate Change National Research Council,Division on Earth and Life Studies,Board on Atmospheric Sciences and Climate,Polar Research Board,Ocean Studies Board,Committee on Abrupt Climate Change,2002-05-23 The climate record for the past 100 000 years clearly indicates that the climate system has undergone periodic and often extreme shifts sometimes in as little as a decade or less The causes of abrupt climate changes have not been clearly established but the triggering of events is likely to be the result of multiple natural processes Abrupt climate changes of the magnitude seen in the past would have far reaching implications for human society and ecosystems including major impacts on energy consumption and water supply demands Could such a change happen again Are human activities exacerbating the likelihood of abrupt climate change What are the potential societal consequences of such a change Abrupt Climate Change Inevitable Surprises looks at the current scientific evidence and theoretical understanding to describe what is currently known about abrupt climate change including patterns and magnitudes mechanisms and probability of occurrence It identifies critical knowledge gaps concerning the potential for future abrupt changes including

those aspects of change most important to society and economies and outlines a research strategy to close those gaps Based on the best and most current research available this book surveys the history of climate change and makes a series of specific recommendations for the future

Palaeohydrology K. J. Gregory, G. Benito, 2003-06-02 With considerable interest in global change this topical book provides a general overview of global paleohydrology The first section provides a global review of the field by exploring real world hydrological scenarios during past environmental changes over extensive areas of Europe America Africa Asia and Australasia This is followed by an up to date review of the key methodologies of fluvial palaeohydrology and the hydrological methods for palaeohydrological reconstruction Team of international contributors focusing on major issues rather than regional detail Associated website containing database expanded bibliography reports from international programmes eg INQUA

Progress in Palaeohydrology INQUA Commission on Global Continental Palaeohydrology. Meeting, 2004

Global Continental Changes Julia Branson, Antony Gavin Brown, Kenneth John Gregory, 1996 Palaeohydrology is the study of changes in the waters of the Earth prior to continuous monitoring Knowledge of these changes is important for the understanding of past and present environmental changes and of the form of the present day environment The evolution of the hydrological cycle in response to climatic change produces a chain of environmental and human consequences factors that are becoming more relevant as climate change is predicted Evidence of past environmental changes may be used to validate models with which to predict future change thus the study of rates mechanisms and processes of Late Quaternary hydrological changes is of critical importance This volume is designed for all who are interested in the hydrological impacts of climatic change and the contribution that palaeohydrology can make to the study of these changes
