Lectures on Surgical Pathology James Paget,2015-06-28

Excerpt from Lectures on Surgical Pathology Delivered at the Royal College of Surgeons of England The Lectures in this volume and especially those on Cancers are enlarged far beyond their original extent by the addition of cases statistical tables and various statements which may be worth reading but of which the recital could not be made agreeable to an audience In making these additions I have endeavored to adduce sufficient evidence for the general conclusions I have drawn without encumbering the book with such a mass of details as would be repulsive to the majority of readers I can hardly imagine that a full relation of so many cases as I have referred to would be acceptable to any besides those who are engaged in the especial study of the subjects of the Lectures To all who are so occupied I will very gladly give whatever further information my manuscript records of cases can supply It is an unavoidable defect of lectures on general pathology that they cannot be conveniently used in the study of the diseases of particular organs I have endeavored to amend this in some measure by a full index referring under the title of each organ to the descriptions of the tumors of which it is most apt to be the seat About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Colorectal Surgery Mark Killingback,2007-05-31 Colorectal Surgery Living Pathology in the Operating Room is two books in one First it is an atlas in the classic definition each chapter is a two page spread discussing one case Functionally each chapter is a case study with both the surgical and pathological perspectives beautifully rendered and fully explained Visually every chapter presents the reader with operative and or diagnostic photos and anatomic line drawings by the author The text more extensive than in many atlases provides a concise yet complete operative record patient history work up anatomic anomalies the procedure itself pathologic findings and follow up Key teaching points emphasize the most important and unique aspects of every case Residents fellows and even seasoned practitioners will gain valuable diagnostic and therapeutic insights from this material The case study presentation provides an excellent review tool for the American Board of Colon and Rectal Surgeryexam
