Pathology Of Malignant Mesothelioma:

Pathology of Malignant Mesothelioma Francoise Galateau-Sallé, 2010-05-06 Mesothelioma is a global problem largely related to the previous use of asbestos products Diagnosis is very difficult because of its diverse appearances and the potential for other diseases to mimic it Written by experienced international experts to aid in pathological diagnosis this book deals with clinical radiological epidemiological molecular and histopathological aspects of the disease Tumors of the pleural pericardial peritoneal cavities as well as the ovary and tunica vaginalis are considered Differential diagnoses of serosal based lesions are discussed and the use of immunohistochemical stains is explained Plentiful illustrations give further aid to diagnosis An essential read for all diagnostic pathologists as well as general pathologists who are sometimes required to diagnose the disease at biopsy or post mortem also invaluable to medical and legal professions involved with various aspects of the disease

Pathology of Malignant Mesothelioma Francoise Galateau-Sallé, 2005-11-16 Only up to date title in the market Current topic with significant media coverage Internationally relevant the use of asbestos and its consequences is a global problem This title aids in pathological diagnosis which is very difficult Contributors are experts from France UK USA Australia and Canada Plentiful colored illustrations complete the text Target group exceeds pathologists The diagnosis is evidence for medico legal purposes which makes the book invaluable to members of legal profession specializing in this disease

Pathology of the Mesothelium John S.P. Jones, 2012-12-06 Many books have been written about the pathology of the major organs of the body such as the lungs heart gastrointestinal tract etc Included in these are descriptions often with a minor emphasis of pathological conditions which affect their serosal surfaces In this book I have endeavoured to reverse the process and treat the mesothelium as an organ in its own right rather than being the no man s land between various major structures A number of pathological conditions are common to the coverings of the three major body cavities the pleura pericardium and peritoneum while some abnormalities are exclusive to one or other sites I hope that the contents of this book cover a broad enough spectrum of mesothelial diseases to be of help to service pathologists who are ever increasingly being asked to make diagnoses particularly on small biopsies of pleural and peritoneal tissues It is also my hope that the various aspects of the subject have been dealt with in sufficient depth to be of use to pathologists engaged in teaching and research and to those whose interests lie in the structure and function of the mesothelium There is still much to be learned in understanding the way the mesothelium behaves in the realm of both inflammatory response and tumour formation If this book provides a stimulus to furthering research in these fields I feel it will have achieved its objective

Tumors of the Serosal Membranes Andrew Churg, Philip T. Cagle, Victor L. Roggli, 2006 The pathologist who sees specimens from lesions of the serosal membranes pleura pericardium peritoneum and tunica vaginalis is well aware that these cases whether in the form of fluid cytologies small biopsies or major resections pose differential diagnostic problems that are among the most difficult in anatomic pathology The main problems involve the separation of malignant mesothelioma from benign mesothelial processes on the one hand and other malignant tumours particularly primary and metastatic carcinomas on the other With these differential diagnoses in mind the authors concentrate on the cytopathologic and histopathologic features of diffuse malignant mesothelioma its many variants and the other benign and malignant lesions to be distinguished from it Histochemical immunohistochemical ultrastructural and molecular features of potential use in this differentiation are discussed and illustrated Common differential diagnostic problems and their solutions take precedence but all of the known benign and malignant lesions of serosal membranes are covered with copious illustrations and the latest available references Epidemiologic pathogenetic clinical radiographic and gross pathologic features are integrated with the discussions of these entities This will be the most complete source available on this topic for years to come
