## **Pathology Oklahoma Notes:**

*Pathology* John H. Holliman, 2012-12-06 These notes were developed as a synopsis of general and systemic pathology in order to present to those students who are preparing for national examinations a relatively concise review of the discipline. These notes are not intended to replace the many fine textbooks of pathology whose scope, detail, and mission are more suited to the in-depth study of pathology. Rather, these notes are intended to serve as memory joggers to rekindle and refresh the recall of salient features of various disease processes and to point out to the student possible areas of weakness which they may need to address in more detail by referring to one of the standard textbooks of pathology. Hopefully, the notes will allow a systematic review of the material in a reasonable amount of time. Some major topics in Pathology: genetic diseases, immunologic disorders, and infectious diseases are covered in other areas of our curriculum and are therefore not included in an organized fashion in these notes. *Neuropathology and Basic Neuroscience* Roger A. Brumback, Richard W. Leech, 2012-12-06

The United States Congress designated the 1990s as the Decade of the Brain in recognition of the importance of neuroscience to the health and well-being of Americans. It has been suggested that as many as 20% of all patients seeking medical treatment have neurologic problems either as the presenting complaint or as an associated condition complicating the primary illness. To this end, it is important that physicians understand basic neuroscience principles and nervous system diseases. Of course, this text is not encyclopedic but instead is an outline of the knowledge required of all medical students. Interested students can consult numerous texts that provide comprehensive coverage of the field, including Greenfield's *Neuropathology* and the exhaustive 60-volume *Handbook of Clinical Neurology*. The information selected for inclusion in this volume of the Oklahoma Notes series remains true to the goal of the whole series: incorporating only that material vital in both the general clinical practice of medicine and to answer questions on the all-important United States Medical Licensing Examination. Roger A. Brumback, Richard W. Leech. Acknowledgments: This text would not have been possible without a great deal of help and support from a number of individuals. We want to thank all those who assisted in our education in neuroscience and neuropathology, including William M. Landau and Philip R. Dodge of the Washington University School of Medicine; Lowell W. Lapham of the University of Rochester Medical Center; and Ellsworth C. *Pathology* John H. Holliman, Daniel L. Feedback, Nancy K. Hall, 1989.
