Paths To The Present Aspects Of European:

Paths to the Present Eugen Weber, 1969 *The Path to European Defence* Karl von Wogau, 2004 After the Internal Market and the Introduction of the Euro the European Union is making the decisive steps towards the next large project on the way to European unification which is European Defence The recent Iraqi crisis has shown that a common European foreign policy is more necessary than ever In spite of this shortfall there has been important progress The European crisis intervention force such as it was defined in Helsinki in 1999 has already been deployed successfully in two operations Still creating a European Defence is an ongoing process where Europe has to continue to improve its capabilities The direction that the European Union will have to take in the coming years is indicated by the European Convention which has proposed to create a European Minister of Foreign Affairs and a European Armaments Research and Military Capabilities Agency Within the European Parliament there is a large majority for the necessity of a European Defence This is demonstrated by the contributions of representatives of the four major political groups in this book It also corresponds with the preferences of public opinion The draft of a European Security Strategy presented by Javier Solana in June 2003 is a good step towards a European Foreign and Security Policy which will be able to guarantee the security of the European citizens and to defend the interests of the European Union in the world High ranking European personalities such as Javier Solana Guy Verhofstadt Erkki Liikanen and Philippe Busquin have made valuable contributions to this book The authors set out to identify where we stand on defence and what remains to be done to help Europe evolve in the changing global context of the 21st century

The Change in the European Balance of Power, 1938-1939: The Path to Ruin by Williamson Murray Williamson Murray, 2005-07-22 A thoroughly documented study of the years of Hitler's triumph which the author sees as anything but inevitable He emphasizes Germany's economic difficulties lack of raw materials and foreign exchange and sees an objectively weak but strong willed Germany challenge a strong but weak willed West with the British always relying on a worst case analysis of their military strength and a best case analysis of Hitler's intentions An important study that in many ways returns to an earlier view that the West would have been in a better position to fight a war in 1938 than in 1939 that appeasement promoted what its proponents most feared German aggression leading to protracted war The author bolsters a familiar thesis with new evidence and great zeal Foreign Affairs Murray has mastered an impressive range of archival and published sources advances a robust revisionist thesis By a careful correlation of the economics of German rearmament with Hitler's foreign policy and strategy between 1933 and 1939 he makes a strong case that right up to the outbreak of war Germany was much less thoroughly prepared for a major war than most of her contemporary opponents imagined or than most historians have realized since Hitler began a wholesale effort at rearmament from the moment he became Chancellor Although this rearmament programme was immense when compared to other European states it was severely handicapped by Germany's heavy dependence on imported raw materials insufficient foreign credit and shortage of skilled labour The occupation of the

Sudetenland brought few economic advantages but the seizure of the remainder of Czechoslovakia in March 1939 yielded an enormous benefit in raw materials industrial resources and immediately available guns ammunition and tanks a scholarly and powerfully argued study in particular all future students of the subject will have to grapple with Professor Murray's analysis of Germany's economic problems and military deficiencies The English Historical Review Williamson Murray's book applies a reality test to the policies of the great powers in the late 1930s The test rests on a simple assumption as irrefutable as it is commonly ignored military power is the hard cold cash of international life Hitler as Murray puts it more often than not made correct strategic decisions Chamberlain and associates made the wrong choice on almost every strategic and diplomatic question that they faced Catastrophe in 1940 was the result a work that is rich in archival knowledge sophisticated argument the occasional subtle dig and an uncommon sense of the difficulties and ambiguities that face those who must decide Murray's cogent presentation of the evidence and his uncompromising uncomfoting conclusions are a devastating blow to the revisionist school on appeasement an essential book for anyone who studies the interwar period or is seriously interested in either the interrelationship of policy and strategy or the nature of relations between states The Journal of Modern History Murray offers a masterful survey of the essentials which are background to decision making in Germany England and France which produced both the war and the catastrophe for the West in the war's first year This monograph is well researched fully documented and well written Political leaders diplomats and military planners should have this book on their must read list an important work The Historian A n excellent piece of historical research a comprehensive well written and well organized narrative of the key issues affecting the foreign policymaking process it is to be recommended as a thorough introduction to the topic and an admirable attempt at historical synthesis The International History Review
