Paths To Paradise On The Liberation From Work

Roy Morrison

Paths To Paradise On The Liberation From Work:

Paths to Paradise André Gorz, 1985-01-01 **Paths to Paradise** Andre Gorz, 1985 We are moving into a world where a power elite allocates jobs where commodities buy consumers where socialist as well as capitalist dogma is an obstacle to comprehension In this book Andre Gorz returns to Marx's Grundrisse and the prophecy of early nineteenth century socialists and rediscovers a vision of post capitalist society founded on the automation of work and the transcending of the exchange economy He argues that we have reached the precise stage where these utopian insights become a reality If the socialist movement is to have something to say to a generation whose identity is no longer shaped at work it must grasp these insights

Around Quitting Time Robert Seguin, 2001-06-20 Posits social class as the American political unconscious showing in an analysis of 19th and 20th century novels how class exerts pressure on the American cultural imagination and claiming that what is desired is ultimately the liberation from work **Beyond Computopia** Morris-Suzuki, 2013-10-28 First published in 1988 The author's purpose in writing this book is neither to offer any specific lessons from Japan's experience nor to add to the warnings of the Japanese menace to western technological hegemony The aim and perspective of this book is to use the study of Japan as a means of outlining a theory of information society which will be radically different from the ideas put forward by most Japanese theorists of the subject Re-enchanting the World Silvia Federici, 2018-11-01 Silvia Federici is one of the most important contemporary theorists of capitalism and feminist movements In this collection of her work spanning over twenty years she provides a detailed history and critique of the politics of the commons from a feminist perspective In her clear and combative voice Federici provides readers with an analysis of some of the key issues and debates in contemporary thinking on this subject Drawing on rich historical research she maps the connections between the previous forms of enclosure that occurred with the birth of capitalism and the destruction of the commons and the new enclosures at the heart of the present phase of global capitalist accumulation Considering the commons from a feminist perspective this collection centers on women and reproductive work as crucial to both our economic survival and the construction of a world free from the hierarchies and divisions capital has planted in the body of the world proletariat Federici is clear that the commons should not be understood as happy islands in a sea of exploitative relations but rather autonomous spaces from which to challenge the existing capitalist organization of life and labor **Global Capitalism** Hugo Radice, 2014-08-01 The essays in this volume were published across the 1984-2011 period and range across a variety of topics and approaches to investigate the changing nature of global capitalism as a social order As such they are a valuable and instructive account of the evolution of global capitalism and of the debates which sought to make sense of this moreover they enable us to understand more clearly how capitalism may change and evolve in the coming years and decades The introduction provides a brief historical account of how global capitalism has changed since the 1960s before summarising each of the essays situating them more immediately in the context in which they were written After sketching the evolution of

his views over the period the author concludes by discussing some important dimensions of global capitalism that need further study The twelve essays are presented in four sections dealing with the overarching theme of globalisation the case of Britain the developing regions of the global South and the former Soviet bloc and the crisis that has gripped global capitalism since 2008 Presenting an interdisciplinary approach that corresponds with the emergence of international political economy as a distinct field of scholarship this book will prove to be an invaluable resource for students and scholars of international political economy politics economics international relations development studies human geography critical sociology and business studies

The Prospect of Labor in Cyberspace Zhuyuan Yang,2024-11-27 This book explores user labor in the internet age offering innovative perspectives on digital labor It broadens the discussion on topics like technology and power the reproduction of network user labor labor relations in cyberspace economic rewards of network user labor and especially the non economic rewards of network user labor Specifically the book examines the impact of technology power and capital on network user labor the control exerted by media platforms over this labor and the payment methods for both economic and non economic rewards

The Dangerous Class Clyde Barrow,2020-10-19 Marx and Engels concept of the lumpenproletariat or underclass an anglicized politically neutral term appears in The Communist Manifesto and other writings It refers to the dangerous class the social scum that passively rotting mass thrown off by the lowest layers of old society whose lowly status made its residents potential tools of the capitalists against the working class Surprisingly no one has made a substantial study of the lumpenproletariat in Marxist thought until now Clyde Barrow argues that recent discussions about the downward spiral of the American white working class its main problem is that it is not working have reactivated the concept of the lumpenproletariat despite long held belief that it is a term so ill defined as not to be theoretical Using techniques from etymology lexicology and translation Barrow brings analytical coherence to the concept of the lumpenproletariat revealing it to be an inherent component of Marx and Engels analysis of the historical origins of capitalism However a proletariat that is destined to decay into an underclass may pose insurmountable obstacles to a theory of revolutionary agency in post industrial capitalism Barrow thus updates historical discussions of the lumpenproletariat in the context of contemporary American politics and suggests that all post industrial capitalist societies now confront the choice between communism and dystopia

Utopianism and Marxism Vincent Geoghegan,2008 The grounding assumption of this book is that an element of utopianism is a necessity in any political thinking and that a self conscious utopianism can generate a richer level of theory and practice The text then follows the chequered career of utopianism in the Marxist tradition

The Routledge Dictionary of Twentieth-century Political Thinkers Robert Benewick,Philip Green,1998 It presents the ideas concepts and doctrines of leading social scientists philosophers economists and great personalities who influenced 20th century political thought and action

After Work Helen Hester,Nick Srnicek,2023-07-18 A timely manifesto for a feminist post work politics Does it ever feel like you have no free time You come home after work and instead

of finding a space of rest and relaxation you're confronted by a pile of new tasks to complete cooking cleaning looking after the kids and so on In this ground breaking book Helen Hester and Nick Srnicek lay out how unpaid work in our homes has come to take up an ever increasing portion of our lives how the vacuum of free time has been taken up by vacuuming Examining the history of the home over the past century from running water to white goods to smart homes they show how repeated efforts to reduce the burden of this work have faced a variety of barriers challenges and reversals Charting the trajectory of our domestic spaces over the past century Hester and Srnicek consider new possibilities for the future uncovering the abandoned ideas of anti housework visionaries and sketching out a path towards real free time for all where everyone is at liberty to pursue their passions or do nothing at all It will require rethinking our living arrangements our expectations and our cities

Ecological Democracy Roy Morrison, 1995 Offering a broad based critique of industrialism Morrison explores currently emerging ecological democracies such as the Mondragon Cooperative system in Spain the Seikatsu Cooperative Clubs in Japan and Coop Atlantic in Canada He outlines a dramatic revitalized participatory democracy which includes community control of finances a social wage cooperative economies demilitarization and a solar transition and shows how to get there from here

Post-work Helen Hester, Will Stronge, 2025-01-23 What does the future hold for work in our new age of crisis How do we make sure that the uncertain future into which we are heading is heavenly and not hellish How can we take the pleasures of work with us and eliminate the pains The answer we need a post work vision Questioning the received wisdom that work is good for you that you are what you do and that any job is a good job Post work offers a new challenge to the work centred society This timely book provides a vital introduction to the post work debate one of the most exciting political and theoretical currents of recent years It explores not only what the future of work will be like but more importantly what the future of work should be like

Disabled People, Work and Welfare Grover, Chris, Piggott, Linda, 2015-07-01 EPUB and EPDF available Open Access under CC BY NC ND licence This is the first book to challenge the concept of paid work for disabled people as a means to independence and self determination Recent attempts in many countries to increase the employment rates of disabled people have actually led to an erosion of financial support for many workless disabled people and their increasing stigmatisation as scroungers Led by the disability movement's concern with the employment choices faced by disabled people this controversial book uses sociological and philosophical approaches as well as international examples to critically engage with possible alternatives to paid work Essential reading for students practitioners activists and anyone interested in relationships between work welfare and disability

Marxism and Human Nature Sean Sayers, *From Artifact to Habitat* Gayle L. Ormiston, 1990 Bringing together philosophy literary criticism and textual theory social and political theory and the philosophy of language and cognitive science this collection intends to establish an interpretive framework for exploring the ubiquity and mediacy of technology

Putting Work in Its Place Peter Meiksins, Peter Whalley, 2018-09-05 Most books on the subject of work focus on the increased amount of time Americans

spend on the job Peter Meiksins and Peter Whalley address the counter trend examining the difficult path traversed by people who choose to work less than the standard forty hour week Their fascinating investigation of alternative work arrangements speaks directly to the concerns of all workers who must balance career with other commitments Through interviews with technical professionals from a wide range of employment settings Putting Work in Its Place refutes the popular myth of the customized work schedule as inevitably a mommy track or a return to traditionalism among women Most of these workers male and female young and old remain strongly committed to their jobs but wish to combine work with other activities they value just as highly This can mean family for some but for others encompasses community service or various avocations By viewing their work arrangements in the longer term and not as short term expedients these professionals are challenging the accepted view of time requirements for careers in organizations They are also helping to shape a new agenda for the future of the workplace to transform their individual successes into a normal practice of customized work time

What is Work? Raffaella Sarti, Anna Bellavitis, Manuela Martini, 2018-09-21 Every society throughout history has defined what counts as work and what doesn't And more often than not those lines of demarcation are inextricable from considerations of gender What Is Work offers a multi disciplinary approach to understanding labor within the highly gendered realm of household economies Drawing from scholarship on gender history economic sociology family history civil law and feminist economics these essays explore the changing and often contested boundaries between what was and is considered work in different Euro American contexts over several centuries with an eye to the ambiguities and biases that have shaped mainstream conceptions of work across all social sectors

The Work and the Gift Scott Cutler Shershow, 2005-06-15 Considers how in a wide range of western culture and thought the ideas of working and giving remain locked in a fatal dilemma each one representing the other's aspirations and absolute limit Ranging from Marx and Derrida to Friedrich Hayek and Alvin Toffler Scott Cutler Shershow here explores the predictions of political thinkers on both the left and the right that work is fundamentally changing or even disappearing the debates among anthropologists and historians about an archaic gift economy that preceded capitalism and might reemerge in its wake contemporary political battles over charity and social welfare and attempts by modern and postmodern artists to destabilize the work of art as we know it

BOOKJACKET Work Orientations Bengt Furåker, Kristina Håkansson, 2019-07-15 Work orientations and work attitudes have to do with the productive capacities in society Insofar as individuals are positively oriented towards contributing their labour we can expect a great amount of work to be done and to be carried out efficiently carefully and responsibly These subjective factors are thus very vital in modern working life Work Orientations Theoretical Perspectives and Empirical Findings offers up to date research on people's commitment to work and employment and job satisfaction in economically advanced countries It will also analyse changes that have taken place in these respects over the last decades Among the key issues in Work Orientations are questions about whether patterns of work centrality and employment commitment tend to

remain stable or have changed across time in various countries Moreover we assume that the circumstances under which people participate in the social division of labour colour their subjective relationships to their jobs and to employment in general A major aim of the book is to explore the impact of factors such as occupation education age and gender on work orientations and work attitudes Work Orientations will be invaluable for researchers and scholars in the fields of organizational studies the sociology of work employee engagement and related disciplines

Decoding **Paths To Paradise On The Liberation From Work**: Revealing the Captivating Potential of Verbal Expression

In an era characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force.
