

# REGULATORY PATHWAY SOUTH KOREA

DYK? The Ministry of Food and Drug Safety (MFDS) oversees South Korea's cosmetics regulations, ensuring product safety and quality.

Here's an overview of the Regulatory pathway.

## CLASSIFICATION OF COSMETICS

### General Cosmetics

Products that do not contain specific functional ingredients or functional claims.

### Functional Cosmetics

Products that contain specific functional ingredients.

**Safety Assessment:** Cosmetic manufacturers/importers must assess product safety, providing ingredient data, BSE/TSE document, and precautions to the MFDS.

**Cosmetic Ingredient Review:** South Korea lists prohibited and restricted cosmetic ingredients. Manufacturers and importers must avoid banned substances and meet allowable ingredient limits.

**Notification and Reporting:** Importers must notify the MFDS of any adverse events related to their products. This includes reporting adverse reactions from consumers.

**Labeling:** To enter the South Korean market, cosmetic manufacturers must follow MFDS guidelines for labeling, including using the Korean language and providing key details like product name, ingredients, usage instructions, and precautions.

**Good Manufacturing Practices (GMP):** Manufacturers should adhere to GMP standards for the production of cosmetics to ensure product quality and safety. However, without a GMP facility, importers cannot import overseas cosmetics into Korea.

**Post-Market Surveillance:** The MFDS conducts post-market surveillance, requesting information or initiating recalls, if safety concerns arise.

Companies marketing cosmetics in South Korea must understand and follow the local regulations to legally sell their products. Non-compliance can result in product removal and legal consequences

in the MAS context conflicts between agents affect the efficiency and quality of resulting plans. When a conflict is found at lower levels, an additional sophisticated process for avoiding it, conflict resolution, must be invoked, and some extra actions, such as waiting for synchronization and detouring, may have to be added to the plan. The conflict resolution process may become costly or fail. Even a single conflict, if it is difficult to resolve, will result in a plan with considerably lower quality than it otherwise would have. As a result, in multi-agent systems, the second or third best plans may result in better overall performance.
