Hall, 1991 A study of the descent of Western idealism in the Platonic and Neoplatonic traditions as continued by outstanding creative thinkers from St Thomas Aguinas to Ralph Waldo Emerson Includes as well the following representatives of the Platonic descent Paracelsus Francis Bacon Jakob Boehme and Immanuel Kant These philosophers and mystics have influenced profoundly the entire course of modern civilization Their lives are significant for only when we know the men themselves can we interpret correctly the force and character of their ideals through the examples of their lives and ideas *The Ultimate Nature of Things:* Pathways Program F. Metaphysics Geoffrey Klempner, 2019-01-07 Is there more to existence than the familiar objects of sense perception or the underlying structures that science describes Are there things that lie beyond the mundane world of empirical inquiry things whose nature can only be approached through pure reasoning While some philosophers today remain sceptical about such a possibility others continue to hold theories that are unashamedly metaphysical One theory formulated over two centuries ago that still finds adherents today is Berkeley's immaterialism the view that our familiar material world of objects in space is ultimately composed of mental entities such as perceptions in the mind of God We shall be looking at this and other similar theories and examining their claims to credibility **Pathways Philosophy** Shrader,1996 The First Philosophers: Pathways Program C. Ancient Philosophy Geoffrey Klempner, 2019-01-07 How did philosophy begin Some time around 600 BC in ancient Greece a radically new idea took root Beliefs about a world derived from religious dogma and often lurid myths handed down from generation to generation gave way to the idea of logos the notion of a universe structured on rational principles a structure which human beings could uncover with the aid of reason and logic Exactly how the idea arose remains a mystery But it was the seed of all that has subsequently come under the name of Philosophy right up to the present time By delving into the fragments that have been preserved of the theories and writings of these first pre Socratic philosophers such as Thales Anaximander Zeno and Parmenides we shall encounter problems and paradoxes that remain unsolved to this day as well as getting a feel for what the enterprise of philosophy is about Pathways to Knowledge Alvin I. Goldman, 2002 In this title Alvin Goldman approaches many epistemological issues as questions about legitimate methods or pathways to knowledge A Lab for All Seasons Sharon E.
