Pathways To Parliament Candidate Selection In Britain:

Pathways to Parliament Austin Ranney, 1965 Political Candidate Selection Jeanette Ashe, 2019-12-05 The secret garden of politics where some win and others lose their candidate selection bids and why some aspirant candidates are successful while others fail have been enduring puzzles within political science This book solves this puzzle by proposing and applying a universally applicable multistage approach to discover the relationship between selection rules selectors biases aspirants attributes and selection outcomes Rare party and survey data on winning and losing candidates and insider views on what it takes to win a selection contest at multiple selection stages are compared and used to reveal the inner workings of the secret garden With a primary focus on the British Labour party over several elections the findings challenge many long held assumptions about why some aspirant candidate types are successful over others and provides real world and controversial solutions to addressing women s and other marginalised groups descriptive underrepresentation As such it provides a much needed fresh look at party selection processes and draws new conclusions as to why political underrepresentation occurs and should inform policies to remedy it This text will be of key interest to scholars and students of gender and ethnicity in politics political parties and candidate selection and more broadly to the study of political elites comparative politics sociology labour studies gender race and disability studies and to practitioners **Pathways to**

Parliament Austin Ranney, 2011-11-01 **Parliamentary Candidates Between Voters and Parties** Lieven De Winter, Rune Karlsen, Hermann Schmitt, 2020-10-27 This book offers the first comprehensive comparative and coherent perspective on parliamentary candidates in contemporary representative democracy Based on the unique database of the Comparative Candidate Survey project which interrogated parliamentary candidates in more than 30 countries it fills a significant lacuna by focusing on the thousands of ordinary candidates that participate in national elections It examines who the candidates are in terms of their socio demographic background and political career patterns how they were selected by their parties what their policy preference are and whether these are congruent to those held by their voters who they seek to represent and how they intend to do so once elected and what their visions are on representative democracy and party government Last but not least it investigates how they go about reaching out to their potential voters during the election campaign This book will be of key interest to scholars and students of political parties and party politics political elites political communication political participation elections theories of democracy and representation legislative studies voting behaviour and more broadly to European politics as well as to political and policy professionals throughout Europe ,

The Electoral System in Britain Robert Blackburn, 2016-07-27 This excellent new book provides a comprehensive account of the British system of parliamentary elections It contains a description of the current structure and operation of the electoral system and pays special attention to those subjects which have given rise to political concern or controversy in recent years There is extensive analysis and commentary upon the different proposals for reform which are currently in

debate and the author puts forward his own conclusions on how the electoral system should be developed in the years ahead to modernise and improve the quality of representative democracy in Britain British Politics Martin Burch, Michael Moran, 1987 *Reform in the House of Commons* Michael Jogerst, 2021-10-21 One of the most significant changes in the British House of Commons has been the development in 1979 of a system of select committees charged with monitoring government ministries Unlike previous experiments in parliamentary reform these committees are staffed exclusively with backbench MPs who regularly review executive policies and offer recommendations Michael Jogerst reappraises the relationship between the executive and legislative branches in light of these new circumstances which are likely to affect the entire governmental structure of the United Kingdom *Passages to Power* Pippa Norris, 1997-10-09 Recruitment to legislative office is one of the core functions of political systems yet we know little about how the process varies from one country to another *Passages to Power* provides a comparative account of legislative recruitment which applies a common analytical framework and new survey data to nineteen advanced democracies Legislative recruitment refers to the critical step as people move from lower levels of politics into parliamentary careers Who succeeds in becoming a politician Who fails And why Based on original research which adopts a new institutionalist perspective this 1997 book compares these issues in a wide range of countries This important study brings together an outstanding group of international scholars to look at recruitment around the world The countries examined in depth include Australia Canada Finland Germany Japan the Netherlands New Zealand the United Kingdom and the United States along with a comparison of all member states in the European Union Political Recruitment Pippa Norris, Joni Lovenduski, 1995 Asking why some politicians succeed in moving into the highest offices of state while others fail this text examines the relative lack of women black and working class Members of Parliament and whether this evident social bias matters for political representation Representing Women in Parliament Marian Sawer, Manon Tremblay, Linda Trimble, 2006-09-27 Written by a major international team of authors this new study features twelve chapters on both new and established parliaments including Australia Canada New Zealand and the United Kingdom It tests the latest theories about women's political representation within Westminster style assemblies and is clearly organized into three key sections Consensus and Beyond Alan Warde, 1982 **Democracy and the Cartelization of Political Parties** Richard S. Katz, Peter Mair, 2018-07-04 Political parties have long been recognized as essential institutions of democratic governance Both the organization of parties and their relationships with citizens the state and each other have evolved since the rise of liberal democracy in the 19th and early 20th centuries Going into the 21st century it appears that parties losing popular support putting both parties and potentially democracy in peril This book traces the evolution of parties from the model of the mass party through the catch all party model to argue that by the late 20th century the principal governing parties and their allied smaller parties collectively the political mainstream were effectively forming a cartel in which the form of competition might remain and indeed even appear to intensify while its

substance was increasingly hollowed out The spoils of office were increasingly shared rather than restricted to the temporary winners contentious policy questions were kept off the political agenda and competition shifted from large questions of policy to minor questions of managerial competence To support this cartel the internal arrangements of parties changed to privilege the party in public office over the party on the ground The unintended consequence has been to stimulate the rise of extra cartel challengers to these cozy arrangements in the form of anti party system parties and populist oppositions on the left but especially on the right Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Emilie van Haute Professor of Political Science Universit libre de Bruxelles Ferdinand M ller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow John and Rebecca Moores Professor of Political Science University of Houston
