Abridged Report of an Address on the Chinese Puzzle Arthur Diósy,1901 **China Into Its Second Rise: Myths, Puzzles, Paradoxes, And Challenge To Theory** James Chieh Hsiung,2012-03-20 This book seeks to demystify the re

ascendancy of China as a civilization state China's politics and society are examined in the light of its living civilization which is the only one of the ancient civilizations that has survived to this day The book also contrasts China's development with that of the West and Japan By combining the impact of internal political and socio economic developments in China and its external relations from the silk routes the tribute system to the modern day it unravels the existing myths puzzles and paradoxes surrounding China and questions the adequacy of most of the Western political theories such as realism in international relations in an attempt to explicate China's re emergence as a world power It attempts to tackle squarely the question Is China a threat to world order The book traces the rationale for contemporary developments in China to the roots in the country's tradition as well as foreign influences and seeks to unravel the puzzle about the unique China Model that defies conventional thinking in political economy with its sustained and incredibly rapid economic growth over the past three decades This study on China's second rise provides a broad background that includes a meaningful scrutiny of the country's behavior during its first rise 713 1820 and beyond In comparing China's ongoing second rise with its first ascent the book not only refocuses on and reinterprets the example set during its first rise but also takes into account the crucial lessons it learned during its century in eclipse in the interregnum for the effects they have on the country's current orientation and behavior The book follows an interdisciplinary approach combining the cultural intellectual historical normative ideological and social scientific perspectives to lend a more solid grasp of the present day China It ends with an educated speculation based on the foregoing analyses on the contours of a Pax Sinica that is likely to result from the impact of China's second rise as a world power
