On behalf of the organizing committee we would like to welcome you to Darmstadt and DAGM 2010 the 32 Annual Symposium of the German Association for Pattern Recognition The technical program covered all aspects of pattern recognition and to name only a few areas ranged from 3D reconstruction to object recognition and medical applications The result is reflected in these proceedings which contain the papers presented at DAGM 2010 Our call for papers resulted in 134 submissions from institutions in 21 countries Each paper underwent a rigorous reviewing process and was assigned to at least three program committee members for review The reviewing phase was followed by a discussion phase among the respective program committee members in order to suggest papers for acceptance The final decision was taken during a program committee meeting held in Darmstadt based on all reviews the discussion results and if necessary additional reviewing Based on this rigorous process we selected a total of 57 papers corresponding to an acceptance rate of below 45% Out of all accepted papers 24 were chosen for oral and 33 for poster presentation All accepted papers have been published in these proceedings and given the same number of pages We would like to thank all members of the program committee as well as the external reviewers for their valuable and highly appreciated contribution to the community **Pattern**

Recognition Walter Kropatsch, Robert Sablatnig, Allan Hanbury, 2005-09-14 It is both an honor and a pleasure to hold the 27th Annual Meeting of the German Association for Pattern Recognition DAGM 2005 at the Vienna University of Technology Austria organized by the Pattern Recognition and Image Processing PRIP Group We received 122 contributions of which we were able to accept 29 as oral presentations and 31 as posters Each paper received three reviews upon which decisions were made based on correctness presentation technical depth scientific significance and originality The selection as oral or poster presentation does not signify a quality grading but reflects attractiveness to the audience which is also reflected in the order of appearance of papers in these proceedings The papers are printed in the same order as presented at the symposium and posters are integrated in the corresponding thematic session In putting these proceedings together many people played significant roles which we would like to acknowledge First of all our thanks go to the authors who contributed their work to the symposium Second we are grateful for the dedicated work of the 38 members of the Program Committee for their effort in evaluating the submitted papers and providing the necessary decision support information and the valuable feedback for the authors Furthermore the Program Committee awarded prizes for the best papers and we want to sincerely thank the donors We were honored to have the following three invited speakers at the conference Jan P **Pattern Recognition** Gernot A.
