*Postcommunism and the Theory of Democracy* Richard D. Anderson, M. Steven Fish, Stephen E. Hanson, Philip G. Roeder, 2021-05-11 Why did the wave of democracy that swept the former Soviet Union and Eastern Europe starting more than a decade ago develop in ways unexpected by observers who relied on existing theories of democracy In Postcommunism and the Theory of Democracy four distinguished scholars conduct the first major assessment of democratization theory in light of the experience of postcommunist states Richard Anderson Steven Fish Stephen Hanson and Philip Roeder not only apply theory to practice but using a wealth of empirical evidence draw together the elements of existing theory into new syntheses The authors each highlight a development in postcommunist societies that reveals an anomaly or lacuna in existing theory They explain why authoritarian leaders abandon authoritarianism why democratization sometimes reverses course how subjects become citizens by beginning to take sides in politics how rulers become politicians by beginning to seek popular support and not least how democracy becomes consolidated Rather than converging on a single approach each author shows how either a rationalist institutionalist discursive or Weberian approach sheds light on this transformation They conclude that the experience of postcommunist democracy demands a rethinking of existing theory To that end they offer rich new insights to scholars advanced students policymakers and anyone interested in postcommunist states or in comparative democratization

**The Third Wave** Samuel P. Huntington, 1993-01-01 Between 1974 and 1990 more than thirty countries in southern Europe Latin America East Asia and Eastern Europe shifted from authoritarian to democratic systems of government This global democratic revolution is probably the most important political trend in the late twentieth century In *The Third Wave* Samuel P. Huntington analyzes the causes and nature of these democratic transitions evaluates the prospects for stability of the new democracies and explores the possibility of more countries becoming democratic The recent transitions he argues are the third major wave of democratization in the modern world Each of the two previous waves was followed by a reverse wave in which some countries shifted back to authoritarian government Using concrete examples empirical evidence and insightful analysis Huntington provides neither a theory nor a history of the third wave but an explanation of why and how it occurred Factors responsible for the democratic trend include the legitimacy dilemmas of authoritarian regimes economic and social development the changed role of the Catholic Church the impact of the United States the European Community and the Soviet Union and the snowballing phenomenon change in one country stimulating change in others Five key elite groups within and outside the nondemocratic regime played roles in shaping the various ways democratization occurred Compromise was key to all democratizations and elections and nonviolent tactics also were central New democracies must deal with the torturer problem and the praetorian problem and attempt to develop democratic values and processes Disillusionment with democracy Huntington argues is necessary to consolidating democracy He concludes the book with an analysis of the political economic and cultural factors that will decide whether or not the third wave continues Several Guidelines for Democratizers offer specific practical suggestions for initiating and carrying out reform Huntington's emphasis on practical application makes this book a valuable tool for anyone engaged in the democratization process At this volatile time in history Huntington's assessment of the processes of democratization is indispensable to understanding the future of democracy in the world

global perspective      *China's Authoritarian Path to Development* Liang Tang, 2017-06-14 This book examines the various stages of China's development in the economic, social and political fields relating theories and models of development to what is actually occurring in China and discussing how China's development is likely to progress going forward. It argues that China's modernization hitherto can be characterized as authoritarian development, a fusion of mixed economic institutions of varying types of ownership with social stability and political cohesiveness and that the present phase where more emphasis is being given to social issues is likely to lead on to a new phase where a more mature civil society and a more extensive middle class are likely to look for greater democratization. It presents an in-depth analysis of China's changing social structure and civil society, explores the forces for and processes of democratization and assesses the prospects for further democratization in the light of changing social structures.

*Determinants of Democratization* Jan Teorell, 2010-10-28 What are the determinants of democratization? Do the factors that move countries toward democracy also help them refrain from backsliding toward autocracy? This book attempts to answer these questions through a combination of a statistical analysis of social, economic and international determinants of regime change in 165 countries around the world in 1972, 2006 and case study work on nine episodes of democratization occurring in Argentina, Bolivia, Hungary, Nepal, Peru, the Philippines, South Africa, Turkey and Uruguay. The findings suggest that democracy is promoted by long-term structural forces such as economic prosperity but also by peaceful popular uprisings and the institutional setup of authoritarian regimes. In the short run, however, elite actors may play a key role, particularly through the importance of intra-regime splits. Jan Teorell argues that these results have important repercussions both for current theories of democratization and for the international community's effort in developing policies for democracy promotion.

*Democracy in the Arab World* Ibrahim Elbadawi, 2011 Despite notable socio-economic development in the Arab region, a deficit in democracy and political rights has continued to prevail. This book examines the major reasons underlying the persistence of this democracy deficit over the past decades and touches on the prospects for deepening the process of democratization in the Arab World. Contributions from major scholars in the region give a cross-country analysis of economic development, political institutions and social factors and the impact of oil wealth and regional wars and present a model for democracy in the Arab world. Case studies are drawn from Algeria, Egypt, Iraq, Jordan, Lebanon, Syria, Sudan and the Gulf region, building on these cross-country analyses and probing beyond the model's main global variables. Looking beyond the effect of oil and conflicts, the chapters illustrate how specific socio-political history of the country concerned, fear of fundamentalist groups, collusion with foreign powers and foreign interventions and the co-optation of the elites by the state contribute to these problems of democratization. Situating the democratic position of the Arab World in a global context, this book is an important contribution to the field of Middle Eastern politics, development studies and studies on conflict and democracy.
