

Taniko

Tāniko is a traditional style of weaving. Tāniko patterns are often woven around the borders of traditional korowai, and tells Māori stories, histories and values of te ao Māori.

Mangopare

The word mangopare means hammerhead shark and symbolises strength, leadership, courage and tenacity.

Kaokao

The kaokao pattern means protection. It looks like a repetitive 'M' shape which is said to represent the rib cage and arms of warriors (think of the Haka stance).

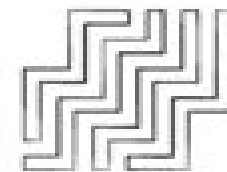

The kaokao pattern is usually on tukutuku panels in the four corners of a whare representing the protection of all.

Māori patterns and meanings

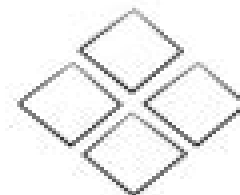

Niho Taniwha

Niho taniwha translates to taniwha teeth. The triangle shape of the niho taniwha represents strength and stability. The repetitive pattern symbolises whakapapa, stories, histories and myths passed down over time.

Poutama

The poutama is a common pattern used throughout Māori weaving and artwork. It means stairs, and symbolises whakapapa or genealogy, and also the pursuit of knowledge, advancement and growth.

Patiki

The pātiki or pātikitiki is usually represented as a repetitive diamond pattern. Pātiki is the word for flounder, and symbolises abundance, hospitality and providing for your people.

Koru

The koru symbolises nature, new life, growth, and strength as it resembles an unfurling fern frond. It is probably the most widely recognised Māori design, and feature in a lot of Māori design such as kōwhiriwhai.

The Concept of Meaning Thomas E Hill, 2014-02-25 First published in 2002 This is Volume VIII of seventeen in the Library of Philosophy series on Metaphysics Written in 1974 the most significant studies of meaning are rightly focused upon restricted ranges of meanings but occasional attempts to see the subject in larger perspective are also required The present inquiry is concerned with meanings of words in languages and of spoken and written sentences but it is also concerned with a wider spectrum including meanings of spoken and written sentences of signs and symbols of physical and historical events of material objects and mental images of poems and paintings of sculptures and symphonies and even of life and of the universe

Pattern Grammar Susan Hunston, Gill Francis, 2000 This book describes an approach to lexis and grammar based on the concept of phraseology and of language patterning arising from work on large corpora The notion of pattern as a systematic way of dealing with the interface between lexis and grammar was used in Collins Cobuild English Dictionary 1995 and in the two books in the Collins Cobuild Grammar Patterns series 1996 1998 This volume describes the research that led to these publications and explores the theoretical and practical implications of the research The first chapter sets the work in the context of work on phraseology The next two chapters give several examples of patterns and how they are identified Chapters 4 and 5 discuss and exemplify the association of pattern and meaning Chapters 6 7 and 8 relate the concept of pattern to traditional approaches to grammar and to discourse Chapter 9 summarizes the book and adds to the theoretical discussion as well as indicating the applications of this approach to language teaching The volume is intended to contribute to the current debate concerning how corpora challenge existing linguistic theories and as such will be of interest to researchers in the fields of grammar lexis discourse and corpus linguistics It is written in an accessible style however and will be equally suitable for students taking courses in those areas

Verb Valency Patterns Susen Faulhaber, 2011-04-29 Taking as its point of departure the general assumption that meaning is crucial in accounting for verb complementation this volume presents the results of an empirical study of verb complementation patterns of semantically similar English verbs The semantic parallels of the verbs selected are based on their coverage in dictionaries first and foremost the Valency Dictionary of English Herbst Heath Roe and G tz 2004 as well as corpus research and native speaker assessments It is demonstrated that despite obvious similarities in complementation between such verbs there are still a significant number of syntactic discrepancies which cannot be accounted for on the basis of meaning alone and that semantic factors such as selection restrictions and aspectual properties do not sufficiently correlate with the verbs syntactic properties and consequently do not have sufficient explanatory power Thus the results rigorously challenge so called projectionist approaches which assume the position that complementation is determined by semantic properties and thus ought to be predictable on this basis In the light of a general trend towards placing greater emphasis on semantic aspects in the fields of construction grammar and cognitive grammar too the number of idiosyncratic phenomena on the level of single complements as well as whole patterns clearly underlines the importance of storage phenomena as opposed to rule based generation As such it stresses the necessity of finding ways to systematically account for item specific properties of verbs in any grammatical theory of the English language The book is targeted at all linguists interested in the relationship between semantics and syntax which is one of the prevalent questions in modern linguistics

also in the field of construction grammar and cognitive grammar Since the data is presented in a way which is compatible with various theories of complementation the target group is clearly not restricted to any specific linguistic school Because of the large amount of item specific information presented this book is also a valuable source for grammarians and lexicographers **Structure, Content and Meaning of Organizational Networks** Peter Groenewegen, Julie E.

Intonation in L2 Discourse María Dolores Ramírez-Verdugo, 2021-07-11 Grounded in a systemic functional linguistic SFL approach this book applies a contrastive interlanguage corpus based approach to investigate the nature and role of L2 intonation and its pragmatic function in spoken discourse The volume offers a brief overview of SFL theories and frameworks with a clear focus on Halliday's model of phonology and the proposal of developing a grammar of speech Integrating a SFL framework with a corpus linguistic informed approach the book uses this foundation as a jumping off point from which to explore the prosodic complexities involved in English language teaching and learning for L2 learners highlighting its various functions as illustrated in examples from the UAM English Learner Spoken Corpus A final chapter synthesizes these findings toward critically reflecting on future directions for the study of L2 speech prosody This book will be key reading for graduate students and researchers in applied linguistics and English language teaching

The Hidden Structure of Interaction Luigi Anolli, 2005 The idea of complexity states that most things tend to organize themselves into recurring patterns even when these patterns are not immediately visible to an external observer The general name for the scientific field concerned with the behaviour over time of a dynamic system is complexity theory The dynamic systems systems capable of changing over time are the focus of this approach and its concern is with the predictability of their behaviour The systems of interest to the complexity theory under certain conditions perform in regular predictable ways under other conditions they exhibit behaviour in which regularity and predictability is lost The concepts of stable and unstable behaviour are part of the traditional repertoire of physical science What is novel is the concept of something in between chaotic behaviour For chaos here we refer to systems which display behaviour that though it has certain regularities defies prediction How does the order emerge from the chaos How can we predict the behaviour of a chaotic system Over the last 30 years and more trying to identify the hidden patterns behind chaotic behaviour became the focus of attention in a number of scientific disciplines These range as widely as astronomy chemistry evolutionary biology geology and psychology
