Patterns of Cancer in Five Continents, 1990 *Cancer Risk Assessment* Peter G. Shields, 2005-05-24 The assessment of cancer risk is a complex process that requires the examination of etiological agents real world environments and individual rates of exposure This reference offers practical approaches to determine cancer risk in individuals groups of exposed persons and the general public in relation to individual genetic and acquired suscep *National Cancer Institute Monograph* National Cancer Institute (U.S.), 1979 **Pattern Recognition Receptors and Cancer** Anton G. Kutikhin, Arseniy E. Yuzhalin, 2015-10-08 The group of pattern recognition receptors PRRs includes families of Toll like receptors TLRs NOD like receptors NLRs C type lectin receptors CLRs RIG I like receptors RLRs and AIM 2 like receptors ALRs Conceptually receptors constituting these families are united by two general features Firstly they directly recognize common antigen determinants of virtually all classes of pathogens so called pathogen associated molecular patterns or simply PAMPs and initiate immune response against them via specific intracellular signaling pathways Secondly they recognize endogenous ligands since they are usually released during cell stress they are called damage associated molecular patterns DAMPs and hence PRR mediated immune response can be activated without an influence of infectious agents So pattern recognition receptors play the key role performing the innate and adaptive immune response In addition many PRRs have a number of other vital functions apart from participation in immune response realization The fundamental character and diversity of PRR functions have led to amazingly rapid research in this field Such investigations are very promising for medicine as immune system plays a key role in vast majority if not all human diseases and the process of discovering the new aspects of the immune system functioning is rapidly ongoing The role of Toll like receptors in cancer was analyzed in certain reviews but the data are still scattered This collection of reviews systematizes the key information in the field **Cancer Epidemiology and Prevention** Michael Thun, Martha S.
