Patterns Of Primary Production In The Biosphere:

Patterns of Primary Production in the Biosphere Helmut Lieth, 1978 What is plant matter Measuring primary productivity Modeling productivity patterns Global production pattern **Primary Productivity of the Biosphere** H. Lieth, R.H. Whittaker, 2012-12-06 The period since World War II and especially the last decade influenced by the International Biological Program has seen enormous growth in research on the function of ecosystems The same period has seen an exponential rise in environmental problems including the capacity of the Earth to support man's population The concern extends to man's effects on the biosphere the film of living organisms on the Earth's surface that supports man The common theme of ecologic research and environmental concerns is primary production the binding of sunlight energy into organic matter by plants that supports all life Many results from the IBP remain to be synthesized but enough data are available from that program and other research to develop a convincing summary of the primary production of the biosphere the purpose of this book The book had its origin in the parallel interests of the two editors and Gene E Likens which led them to prepare a symposium on the topic at the Second Biological Congress of the American Institute of Biological Sciences in Miami Florida October 24 1971 Revisions of the papers presented at that symposium appear as Chapters 2 8 9 10 and 15 in this book We have added other chapters that complement this core these include discussion and evaluation of methods for measuring productivity and regional production current findings on tropical productivity and models of primary productivity

Successes, Limitations, and Frontiers in Ecosystem Science Michael L. Pace, Peter M. Groffman, 2013-12-01 Research on the ecosystems has emerged in recent decades as a vital successful and sometimes controversial approach to environmental science Ecosystem science has addressed issues such as human alteration of biogeochemical cycles ecological complexity and biodiversity and ecological response to climate change As a central and integrating science ecosystem level studies have been highly successful This book emphasizes the idea that much of the progress in ecosystem research has been driven by the emergence of new environmental problems that could not be addressed by existing approaches By focusing on successes limitations and frontiers in ecosystem studies it will be welcomed by students and scientists throughout the ecological and environmental communities Forests at the Land-atmosphere Interface J. Grace, J. Moncrieff, K. McNaughton, 2004 Annotation Forest ecosystems exist at the interface between the land and the atmosphere Understanding the properties of this planetary boundary layer is very important for a number of related disciplines This book presents an overview of topics that are of significance at this interface starting at the scale of intra leaf organelles ranging to higher levels of organisation such as communities and ecosystems It covers topics such as stomatal functioning large scale processes radiation modelling forest meteorology and carbon sequestration Based on proceedings of a conference to mark the retirement of Professor Paul Jarvis from the University of Edinburgh the book contains contributions from leading international scientists It will be of significant interest to researchers in forestry ecology environmental sciences and natural

resources Biodiversity in Drylands Moshe Shachak, 2005 The first volume in the Long Term Ecological Research Network series this book summarizes the state of knowledge about biodiversity in drylands and seeks to identify questions and strategies for future research and to lay out guidelines for management of biodiversity in desert and semi desert regions

Methods in Ecosystem Science Osvaldo E. Sala, Robert B. Jackson, Harold A. Mooney, Robert Howarth, 2000-08-11 Ecology at the ecosystem level has both necessitated and benefited from new methods and technologies as well as those adapted from other disciplines With the ascendancy of ecosystem science and management the need has arisen for a comprehensive treatment of techniques used in this rapidly growing field Methods in Ecosystem Science answers that need by synthesizing the advantages disadvantages and tradeoffs associated with the most commonly used techniques in both aquatic and terrestrial research The book is divided into sections addressing carbon and energy dynamics nutrient and water dynamics manipulative ecosystem experiments and tools to synthesize our understanding of ecosystems Detailed information about various methods will help researchers choose the most appropriate methods for their particular studies Prominent scientists discuss how tools from a variety of disciplines can be used in ecosystem science at different scales *SeaWiFS Technical Report Series* Michael Darzi, 1992 World Forest Biomass and Primary Production Data Melvin G.
