*Everyday Lives in the Global City* Jörg Dürrschmidt, 2013-04-15 Rejecting simplifying notions of globalisation as a macro economic force this book provides a grounded picture of the various ways in which people's biographies are tied up with the global cultural economy The main argument of the book is that the globalisation of lives is experienced by people as the extension of their milieux both spatially and symbolically

**African Philosophy** Guttorm Fløistad, 2012-12-06 This publication is a continuation of two earlier series of chronicles *Philosophy of the Mid Century* Firenze 1958-59 and *Contemporary Philosophy* Firenze 1968 edited by Raymond Klibansky Like the other series these chronicles provide a survey of significant trends in contemporary philosophical discussion from 1970 to 1985 The need for such surveys has I believe increased rather than decreased over the last years The philosophical scene appears for various reasons more complex than ever before The continuing process of specialization in most branches the emergence of new schools of thought the convergence of interest thought not necessarily of opinion of different traditions upon certain problems the increasing attention being paid to the history of philosophy in discussions of contemporary problems and the growing significance for philosophical discourse of the social political and cultural situation in various regions of the world are the most important contributory factors Surveys of the present kind are a valuable source of knowledge of this complexity and may as such be an assistance in renewing the understanding of one's own philosophical problems The surveys it is to be hoped may also help to strengthen a world wide Socratic element of modern philosophy the dialogue or Kommunikationsgemeinschaft So far five volumes have been prepared for the new series
