Paul Klee Notebooks: The nature of nature Paul Klee,1992

Paul Klee and His Illness H. Suter,2010-02-01

In 1933 Paul Klee s work was branded as Entartete Kunst Degenerate Art by the National Socialists and he was dismissed from his professorial post at the D sseldorf Academy of Fine Arts This led him together with his wife Lily to return to his real home of Bern Here his avant garde art was not understood and Klee found himself in unasked for isolation In 1935 Klee started to suffer from a mysterious disease The symptoms included changes to the skin and problems with the internal organs In 1940 Paul Klee died but it was only 10 years after his death that the illness was actually given the name scleroderma in a publication about Klee However the diagnosis remained mere conjecture Since his adolescence the dermatologist and venereologist Dr Hans Suter has been fascinated by Paul Klee and his art and more than 30 years ago this fascination spurred him to commence research into the illness and its influence on the art of Paul Klee s final years It was due to Dr Suter s meticulous investigations that Klee s illness could be defined as diffuse systemic sclerosis In this book the author assembles his findings and describes the rare and complex disease in a clear and comprehensible way Further he empathetically interprets more than 90 of Klee s late works The point of view of a dermatologist renders a unique source of information It provides on one hand new insights into everyday medical practices at the University of Bern in the 1930s which will fascinate doctors and local historians alike While on the other hand art historians and art lovers will be absorbed by the newly discovered links between Paul Klee s work and his illness

The Routledge Companion to Biology in Art

and Architecture Charissa Terranova,Meredith Tromble,2016-08-12 The Routledge Companion to Biology in Art and Architecture collects thirty essays from a transdisciplinary array of experts on biology in art and architecture The book presents a diversity of hybrid art and science thinking revealing how science and culture are interwoven The book situates

bioart and bioarchitecture within an expanded field of biology in art architecture and design It proposes an emergent field of biocreativity and outlines its historical and theoretical foundations from the perspective of artists architects designers scientists historians and theoreticians Includes over 150 black and white images Art and Ventriloquism David Goldblatt,2014-02-04 This exciting collection of David Goldblatt s essays available for the first time in one volume uses the metaphor of ventriloquism to help understand a variety of art world phenomena It examines how the vocal vacillation between ventriloquist and dummy works within the roles of artist artwork and audience as a conveyance to the audience of the performer s intentions emotions and beliefs through a created performative persona Considering key works including those of Nietzsche Foucault Socrates Derrida Cavell and Wittgenstein Goldblatt examines how the authors use the framework of ventriloquism to construct and negate issues in art and architecture He ponders self plagiarism why the classic philosopher cannot speak for himself but must voice his thoughts through fictional characters or inanimate objects and works With a close analysis of two ventriloquist paintings by Jasper Johns and Paul Klee a critical commentary by Garry L Hagberg and preface by series editor Saul Ostrow Goldblatt s thoroughly fascinating book will be an invaluable asset to students of cultural studies art and philosophy The Spiritual Dynamic in Modern Art C. Spretnak,2014-10-22 This book demonstrates that numerous prominent artists in every period of the modern era were expressing spiritual interests when they created celebrated works of art This magisterial overview insightfully reveals the centrality of an often denied and misunderstood element in the cultural history of modern art Paul Klee Notebooks: The nature of nature, tr. from Unendliche Naturgeschichte by H. Norden Paul Klee,1969 The Concise New Makers of Modern Culture Justin Wintle,2008-11-28 A Who s Who of Western culture from Woody Allen to Emile Zola Containing four hundred essay style entries and covering the period from 1850 to the present The Concise New Makers of Modern Culture includes artists writers dramatists architects philosophers anthropologists scientists sociologists major political figures composers film makers and many other culturally significant individuals and is thoroughly international in its purview Next to Karl Marx is Bob Marley with John Ruskin is Salman Rushdie alongside Darwin is Luigi Dallapiccola Deng Xiaoping rubs shoulders with Jacques Derrida as do Julia Kristeva and Kropotkin With its global reach The Concise New Makers of Modern Culture provides a multi voiced witness of the contemporary thinking world The entries carry short bibliographies and there is thorough cross referencing as well as an index of names and key terms The Barbarian Principle Jason M. Wirth,Patrick Burke,2013-09-04 Toward the end of his life Maurice Merleau Ponty made a striking retrieval of F W J Schelling s philosophy of nature The Barbarian Principle explores the relationship between these two thinkers on this topic opening up a dialogue with contemporary philosophical and ecological significance that will be of special interest to philosophers working in phenomenology and German idealism Biocentrism and Modernism Oliver A.I. Botar,2017-07-05 Examining the complex intersections between art and scientific approaches to the natural world Biocentrism and Modernism reveals another side to the development of Modernism While

many historians have framed this movement as being mechanistic and against nature the essays in this collection illuminate the role that nature centric ideologies played in late nineteenth to mid twentieth century Modernism The essays in Biocentrism and Modernism contend that it is no accident that Modernism arose at the same time as the field of modern biology From nineteenth century discoveries to the emergence of the current environmentalist movement during the 1960s artists architects and urban planners have responded to currents in the scientific world Sections of the volume treat both philosophic worldviews and their applications in theory historiography and urban design This collection also features specific case studies of individual artists including Raymond Duchamp Villon Paul Klee Wassily Kandinsky and Jackson Pollock

In Paul Klee's Enchanted Garden Paul Klee, Michael Baumgartner, Henie-Onstad kunstsenter, Zentrum Paul Klee, 2008 For Paul Klee both as an artist and as a teacher nature was an inexhaustible source of inspiration a large part of

his oeuvre depicts gardens and parks from reallocations such as the Garden Kingdom of Dessau Worlitz or Hammamet in Tunisia to imaginary sometimes dreamlike and sometimes exotic products of fantasy portraying ominous plant worlds Klee 1879 1940 also paid special attention to plant structure and growth on walks he would often collect flowers evergreens and leaves expertly identifying and storing them in a herbarium With over one hundred and forty color illustrations this publication reveals the multifaceted temperament of Klee's lifelong dialogue with nature His complex approach on the one hand analytically objective and on the other radically subjective is also explored as is his understanding of art as a process of creation similar to nature itself
