P. Babkin (Prof.),1949 **Pavlov** Boris Peter Babkin,1951

Pavlov Boris Petrovič Babkin,1949 Ivan Pavlov Barbara R. Saunders,2006 Learn about the Russian scientist who introduced the idea of conditioned reflexes in behavior From source other than the Library of Congress Ivan Pavlov Daniel Todes,2000-06-22 Hailed as the Prince of World Physiology Ivan Pavlov continues to influence scientists today His pioneering research on digestion the brain and behavior still provides important insights into the minds of animals including humans and is an inspiring example of imaginative experimental technique Pavlov graduated from the theological seminary in his native Ryazan Russia in 1869 but almost immediately switched to medicine and enrolled at St Petersburg University He became interested in the physiology of circulation and digestion which led him to the study of conditional and unconditional

reflexes He conducted thousands of experiments with dogs developing a way to use a dogs salivary glands as a window through which to observe the workings of its brain Pavlov lived through the Russian Revolution and the civil war that followed it Lenin himself recognized his genius and provided financial backing for his research the new Soviet government built a research complex dedicated exclusively to his experiments Pavlov was honored for his contributions to science with the Nobel Prize for Physiology in 1904 Oxford Portraits in Science is an ongoing series of scientific biographies for young adults Written by top scholars and writers each biography examines the personality of its subject as well as the thought process leading to his or her discoveries These illustrated biographies combine accessible technical information with compelling personal stories to portray the scientists whose work has shaped our understanding of the natural world

Dictionary of World Biography: The 20th century, O-Z Frank Northen Magill, Christina J. Moose, Alison Aves, 1999-11 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who's who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual's life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual's place in history All entries conclude with a fully annotated bibliography Ivan Pavlov Charles River Charles River Editors, 2019-04-19 Includes pictures Includes online resources and a bibliography for further reading Don't become a mere recorder of facts but try to penetrate the mystery of their origin Pavlov Pavlov's dogs are to Psychology 101 what Rome is to antiquity classes This particular series of experiments and the concept of classical conditioning likely ring a bell for many readers because they have been referenced in countless texts both scientific and otherwise and they have seeped into various forms of pop culture throughout the years More often than not the man behind this universally applicable phenomenon gets mentioned in conjunction with the dogs which only cements his status as a household name over 80 years after his death In the critically acclaimed comedy *The Office* the resident prankster Jim conditions his coworker Dwight with the default Microsoft jingle that plays when a user unlocks their workstation and some mints For days on end Jim reboots his computer prompting the memorable two note tune and offers his colleague an Altoid each time One day Jim restarts his computer only this time he makes no further movements and without missing a beat Dwight instinctively extends his palm Dwight continued on with his work with an outstretched hand only snapping out of his daze when Jim inquired what it was that his colleague was doing I I don't know a genuinely baffled Dwight admits His face then contorts with disgust and he complains about the unsavory taste in his mouth The concept has also been parodied in animated television shows including the classic Warner Brothers animation *Pinky and the Brain* In an episode entitled *Pavlov's Mice* the pair of genetically modified mice are trapped in the cage of none other than a cartoon version of Ivan Pavlov himself When Pavlov strikes a golden gong Brain begins to tap dance and sing a children's

nursery rhyme and he is then rewarded with a morsel of cheese Next to him the simple minded Pinky claps giddily and gushes that he could watch Brain sing and dance all day To this a miserable Brain reveals a miniature chalkboard crowded with dozens of tally marks You have watched it all day Pinky says the disgruntled Brain 61 times to be exact It s a conditioned reflex to that infernal gong I m powerless to stop it The relatability of the classical conditioning experiment is perhaps why it is so often used on the screen both big and small The aforementioned examples of the phenomenon may not have taken place in reality but similar ones manifest can be found in various aspects of daily life When a child is taunted and teased in school they may begin to feign illness and drum up all sorts of excuses to stay home from school for they have now equated the establishment with feelings of terror and dread Similarly children who feel unjustly singled out and penalized by an instructor may begin to despise and resent the given subject Classical conditioning can also be subtle with something as simple as a song being enough to trigger an emotional response Hearing a song that reminds one of their ex may elicit a sense of sorrow or disgust depending on the conditions surrounding the end of the relationship Conversely a throwback radio station playing a listener s favorite song back in high school might awaken feelings of nostalgic bliss Ivan Pavlov The Life and Legacy of the Famous Russian Psychologist examines the experiments that made Pavlov one of the 20th century s most famous psychologists Along with pictures of important people places and events you will learn about Pavlov like never before

Pavlov's Physiology Factory Daniel P. Todes,2003-04-29 Russian physiologist and Nobel Prize winner Ivan Pavlov is most famous for his development of the concept of the conditional reflex and the classic experiment in which he trained a dog to salivate at the sound of a bell In Pavlov s Physiology Factory Experiment Interpretation Laboratory Enterprise Daniel P Todes explores Pavlov s early work in digestive physiology through the structures and practices of his landmark laboratory the physiology department of the Imperial Institute for Experimental Medicine In Lectures on the Work of the Main Digestive Glands for which Pavlov won the Nobel Prize in 1904 the scientist frequently referred to the experiments of his coworkers and stated that his conclusions reflected the deed of the entire laboratory This novel claim caused the prize committee some consternation Was he alone deserving of the prize Examining

the fascinating content of Pavlov's scientific notes and correspondence unpublished memoirs and laboratory publications Pavlov's Physiology Factory explores the importance of Pavlov's directorship of what the author calls a physiology factory and illuminates its relationship to Pavlov's Nobel Prize winning work and the research on conditional reflexes that followed it Todes looks at Pavlov's performance in his various roles as laboratory manager experimentalist entrepreneur and scientific visionary He discusses changes wrought by government and commercial interests in science and sheds light on the pathways of scientific development in Russia making clear Pavlov's personal achievements while also examining his style of laboratory management Pavlov's Physiology Factory thus addresses issues of importance to historians of science and scientists today big versus small science the dynamics of experiment and interpretation and the development of research cultures
