The Writer's Index of Good Form and Good English John Matthews Manly, Edith Rickert, 1923 *The Florist and Pomologist*, 1868 **Context-Dependence in the Analysis of Linguistic Meaning** Hans Kamp, Barbara Partee, 2021-10-01 Does context and context dependence belong to the research agenda of semantics and specifically of formal semantics Not so long ago many linguists and philosophers would probably have given a negative answer to the question However recent developments in formal semantics have indicated that analyzing natural language semantics without a thorough accommodation of context dependence is next to impossible The classification of the ways in which context and context dependence enter semantic analysis though is still a matter of much controversy and some of these disputes are ventilated in the present collection This book is not only a collection of papers addressing context dependence and methods for dealing with it it also records comments to the papers and the authors replies to the comments In this way the contributions themselves are contextually dependent In view of the fact that the contributors to the volume are such key figures in contemporary formal semantics as Hans Kamp Barbara Partee Reinhard Muskens Nicholas Asher Manfred Krifka Jaroslav Peregrin and many others the book represents a quite unique inquiry into the current activities on the semantics side of the semantics pragmatics boundary Basics of Biblical Hebrew Grammar Gary D. There's No Such Thing as Creativity John Baer,2022-07-07 Most people including creativity researchers act as if they believe that creativity is not simply a useful category or label but a real thing with its own essence just as Plato would argue that an ideal triangle has an essence that is shared with all actual triangles Most people including creativity researchers also believe that there is a set of general creativity relevant skills that can be applied to most problems in ways that will lead to more creative outcomes Creativity research now calls these beliefs into question A domain general misunderstanding of the nature of creativity relevant skills and the equally mistaken belief that creativity exists independently of actual creative things and ideas have together hindered creativity theory research assessment and training A more domain specific and nominalist understanding of creativity will free creativity researchers to make progress in areas where it is currently stymied
