*A History of Literacy Education* Robert J. Tierney,P. David Pearson,2021 In this

volume two notable scholars trace the monumental shifts in theory research and practice related to reading education and literacy with particular attention to what they consider the central goal of literacy making meaning Each section describes a specific epoch including a brief snapshot of how the reader of that period is envisioned and characterized by researchers and teachers as well as a deep discussion of the ideas and contextual events of that era These developmental waves are organized in rough historical sequence by a series of shifts in underlying theoretical and scholarly lenses from the behavioral to the psycholinguistic to the cognitive to the sociocultural to the critical to the multimodal to the global The book closes with a discussion of the various research frames and methodological approaches that paralleled these developments Throughout there is a profound recognition that all research and practice are ultimately directed toward how students make meaning from sound to letter to word to ideas and images Book Features Animates some of the revolutionary developments related to reading education and literacy in modern times Each development is accompanied by a discussion of the aspirational reader that sets the stage for contemplating these shifts and their significance Traces the research and theoretical developments to illustrate the origins of the shifts and their influences Supported by a website with video lectures and conversations tied to the various waves of development Contemporary Composition Studies Edith Babin,Kimberly Harrison,1999-12-30

**Landmark Essays on Writing Across the Curriculum** Charles Bazerman, David Russell, 2020-11-25 Rhetoric as a

general teaching while preaching locality of action and guidelines for handling that locality has tended from the beginning to serve as a universality. It has offered a generalized techne with only limited categories appropriate for all discursive situations at least for those that were not excluded from the realm of rhetoric. Nonetheless from its beginnings rhetoric limited its interests to certain activity fields such as law, government, religion, and most important, the educators of leaders in these activity fields. This collection presents landmarks showing where the Writing Across the Curriculum (WAC) and Writing in the Disciplines (WID) movements have gone. They have opened up a number of prospects that were impossible to see when rhetoric and composition confined their gaze to relatively few discursive activities. This suggests that the rhetorical landscape is becoming more complex and interesting as well as more responsive to life in the complex differentiated societies that have emerged in the last few centuries. This volume will reveal to scholars and researchers a range of possibilities for the study of disciplinary discourse and its teaching and suggest to them new prospects for the future and for the better.

**Journal of College and Adult Reading and Learning**, 1994      Testing and Assessment in Translation and Interpreting Studies

Claudia V. Angelelli, Holly E. Jacobson, 2009-10-22. Testing and Assessment in Translation and Interpreting Studies examines issues of measurement that are essential to translation and interpreting. Conceptualizing testing both as a process and a product, the collection of papers explores these issues across languages and settings including university classrooms, research projects, the private sector, and professional associations. The authors have approached their chapters from different perspectives using a variety of methods, some focusing on very specific variables and others providing a much broader overview of the issues at hand. Chapters range from a discussion of the measurement of text cohesion in translation, the measurement of interactional competence in interpreting, the use of a particular scale to measure interpreters' renditions, to the application of a specific approach to grading or general program assessment such as interpreter or translator certification at the national level or program admissions processes. These studies point to the need for greater integration of research and practice in the specific area of testing and assessment and are a welcome addition to the field.
