Philosophical Papers: Volume 2, Philosophy and the Human Sciences Charles Taylor, 1985-03-28 A selection of published papers is presented here in two volumes structured to indicate the direction and essential unity of the work

Philosophy and the Human Sciences Charles Taylor, 1985 Charles Taylor has been one of the most original and influential figures in contemporary philosophy his philosophical anthropology spans an unusually wide range of theoretical interests and draws creatively on both Anglo American and Continental traditions in philosophy A selection of his published papers is presented here in two volumes structured to indicate the direction and essential unity of the work He starts from a polemical concern with behaviourism and other reductionist theories particularly in psychology and the philosophy of language which aim to model the study of man on the natural sciences This leads to a general critique of naturalism its historical development and its importance for modern culture and consciousness and that in turn points forward to a positive account of human agency and the self the constitutive role of language and value and the scope of practical reason The volumes jointly present some two decades of work on these fundamental themes and convey strongly the tenacity verve and versatility of the author in grappling with them They will interest a very wide range of philosophers and students of the human sciences

Naturalism in Question Mario De Caro, David Macarthur, 2008-12-15 Today the majority of philosophers in the English speaking world adhere to the naturalist credos that philosophy is continuous with science and that the natural sciences provide a complete account of all that exists whether human or nonhuman The new faith says science not man is the measure of all things However there is a growing skepticism about the adequacy of this complacent orthodoxy This volume presents a group of leading thinkers who criticize scientific naturalism not in the name of some form of supernaturalism but in order to defend a more inclusive or liberal naturalism The many prominent Anglo American philosophers appearing in this book Akeel Bilgrami Stanley Cavell Donald Davidson John Dupr Jennifer Hornsby Erin Kelly John McDowell Huw Price Hilary Putnam Carol Rovane Barry Stroud and Stephen White do not march in lockstep yet their contributions demonstrate mutual affinities and various unifying themes Instead of attempting to force human nature into a restricted scientific image of the world these papers represent an attempt to place human nature at the center of renewed but still scientifically respectful conceptions of philosophy and nature

The Routledge International Handbook of Multidisciplinary Perspectives on Character Development, Volume II Michael D. Matthews, Richard M. Lerner, 2024-03-29 Drawing from philosophy religion biology behavioral and social sciences and the arts The Routledge International Handbooks of Multidisciplinary Perspectives on Character Development Volumes I and II present cutting edge scholarship about the concept of character across the life span the developmental and contextual bases of character and the key organizations of societal sectors within and across nations that promote character development in individuals families and communities This second volume Moderators Threats and Contexts focuses on the moderators and covariates of

character development with chapters pertaining to cultural and contextual based exemplars of character development grit achievement and resilience hope for the future and parenting and self regulation With contributions from international experts Volume II goes on to discuss threats to moral positive or virtuous character development as well as the different contexts wherein the character is studied and promoted Special attention is paid to the centers of excellence at universities around the world that specialize in character development research and character education This comprehensive publication is an essential reference for researchers and graduate students in behavioral sciences biology philosophy theology and economics as well as practitioners leading or evaluating character education or character development programs around the world Find Volume I Conceptualizing and Defining Character here www.routledge.com/9781032169491 **Pragmatism and Political Theory** Matthew Festenstein, 1997-12-22 Pragmatism has enjoyed a considerable revival in the latter part of the twentieth century but what precisely constitutes pragmatism remains a matter of dispute In reconstructing the pragmatic tradition in political philosophy Matthew Festenstein rejects the idea that it is a single cohesive doctrine His incisive analysis brings out the commonalities and shared concerns among contemporary pragmatists while making clear their differences in how they would resolve those concerns His study begins with the work of John Dewey and the moral and psychological conceptions that shaped his philosophy Here Festenstein lays out the major philosophic issues with which first Dewey and then his heirs would grapple The book's second part traces how Dewey's approach has been differently developed especially in the work of three contemporary pragmatic thinkers Richard Rorty Jurgen Habermas and Hilary Putnam This first full length critical study of the relationship between the pragmatist tradition and political philosophy fills a significant gap in contemporary thought **A Law of Peoples for Recognizing States** Chris Naticchia, 2016-11-02 Which political entities should the international community recognize as member states granting them the rights and powers of statehood and entitling them to participate in formulating adjudicating and implementing international law What criteria should it use and are those criteria defensible From Kosovo Palestine and Taiwan to South Sudan Scotland South Ossetia Abkhazia and Catalonia these questions continuously arise and constantly challenge the international community for a consistent principled stance In response to this challenge Chris Naticchia offers a social contract argument for a theory of international recognition a normative theory of the criteria that states and international bodies should use to recognize political entities as member states of the international community Regardless of whether political entities adequately respect human rights or practice democracy he argues we must recognize a critical mass of them to get international institutions working Then we should recognize secessionist entities that suffer from persistent grave and widespread human rights abuses by their government and under certain conditions minority nations within multinational states that seek independence We must also recognize entities whose recognition would contribute to the economic development of the least well off entities Drawing on the social contract tradition and developing a broadly Rawlsian view A Law of Peoples for Recognizing States will both

challenge and appeal to a broad readership in political philosophy international law and international relations *The Constitutional State* N. W. Barber, 2012-09-27 The Constitutional State provides an original analytical account of the state and its associated constitutional phenomena It presents the state as a form of social group consisting of people territory and institutions bound together by rules The institutions of the state make a distinctive and characteristic claim over the people of the state who in turn have a distinctive and characteristic relationship with these institutions This account reveals the importance of at least two forms of pluralism legal and constitutional It also casts light on some of the more difficult questions faced by writers on constitutions such as the possibility of states undertaking actions and forming intentions the moral significance of these actions for the people of the state and the capacity of the state to carry responsibility for acts between generations A Political Theory of Territory Margaret Moore, 2015-04-29 Margaret Moore offers a comprehensive normative theory of territory She provides an account both of the nature of rights to territory and of the nature of the right holder considering the arguments that might justify state territory as well as the appropriate relationship between the state the people and the land implied by that justificatory argument **Charles Taylor's Doctrine of Strong Evaluation** Michiel Meijer, 2017-11-14 This book provides a comprehensive critical account of the philosophy of Charles Taylor The author engages with the secondary literature on Taylor's work and suggests that some interpretations and criticisms have been based on misunderstandings of the ontological dimension of strong evaluation while also developing a novel interpretation of Taylor's ontological thought Meijer argues that a close examination of Taylor's central concept of strong evaluation reveals both the potential of and the tensions in his entire thinking The analysis pursues the development of Taylor's thought from his very first philosophical papers 1958 until his most recent reflections in *Retrieving Realism* 2015 and *The Language Animal* 2016 It also examines in detail Taylor's ambitious philosophical project to connect arguments in philosophical anthropology ethics phenomenology and ontology across the full range of his diverse writings The book therefore specifically traces the links between Taylor's arguments with strong evaluation as their unifying leitmotif

Toward A Psychology of Persons William E. Smythe, 2013-05-13 This closely integrated collection of essays constitutes a wide ranging and comprehensive attempt to understand persons within psychology a long lost enterprise The volume was inspired by the observation that contemporary psychology has become increasingly depersonalized in its conceptions and its methodology and has thereby lost touch with its traditional subject matter of human individuality and the nature of persons This development now threatens the integrity of psychology as a discipline Using both a critical and constructive approach the various contributors share two common objectives to explore the roots of depersonalization in modern psychology through systematic criticism of contemporary functionalist and neo functionalist approaches to articulate some alternative holistic interpretive and historical approaches to the psychology of persons Despite these common objectives the chapters reflect a wide variety of theoretical perspectives and approaches including cognitive science and neuroscience discursive

psychology hermeneutics social constructionism semiotics rhetorical analysis and psychological aesthetics These essays do not converge on a unified psychology of persons but they do serve to reopen a form of discourse that has long been absent from mainstream psychology This volume emerged from the deliberations of the Western Canadian Theoretical Psychologists WCTP a group of scholars primarily from Western Canadian universities with shared interests in the history and theory of psychology From its founding in 1989 to the present the WCTP has been actively engaged in promoting and contributing to the development of theoretical psychology Over the past half dozen years scholars have greatly benefitted from the close collaboration and collegial support that participation in the WCTP makes possible The annual meetings provide an opportunity for them to catch up on each other's work and also to pool their expertise to work on topics of shared interest

Politics, Theology and History Raymond Plant, 2001-01-29 This book examines the moral foundations of liberal societies through the role of Christian belief in public policy

Interpreting Modernity Jacob Levy, Jocelyn Maclure, Daniel M. Weinstock, 2020-10-15 There are few philosophical questions to which Charles Taylor has not devoted his attention His work has made powerful contributions to our understanding of action language and mind He has had a lasting impact on our understanding of the way in which the social sciences should be practised taking an interpretive stance in opposition to dominant positivist methodologies Taylor's powerful critiques of atomistic versions of liberalism have redefined the agenda of political philosophers He has produced prodigious intellectual histories aiming to excavate the origins of the way in which we have construed the modern self and of the complex intellectual and spiritual trajectories that have culminated in modern secularism Despite the apparent diversity of Taylor's work it is driven by a unified vision Throughout his writings Taylor opposes reductive conceptions of the human and of human societies that empiricist and positivist thinkers from David Hume to B F Skinner believed would lend rigour to the human sciences In their place Taylor has articulated a vision of humans as interpretive beings who can be understood neither individually nor collectively without reference to the fundamental goods and values through which they make sense of their lives The contributors to this volume all distinguished philosophers and social theorists in their own right offer critical assessments of Taylor's writings Taken together they provide the reader with an unrivalled perspective on the full extent of Charles Taylor's contribution to modern philosophy

Virtue Ethics Daniel Statman, 2019-08-07 The central question in contemporary ethics is whether virtue can replace duty as the primary notion in ethical theory This book focuses directly on this subject

Authority and Estrangement Richard Moran, 2012-01-06 Since Socrates and through Descartes to the present day the problems of self knowledge have been central to philosophy's understanding of itself Today the idea of first person authority the claim of a distinctive relation each person has toward his or her own mental life has been challenged from a number of directions to the point where many doubt the person bears any distinctive relation to his or her own mental life let alone a privileged one In Authority and Estrangement Richard Moran argues for a reconception of the first person and its claims Indeed he writes a more thorough repudiation of the idea of

privileged inner observation leads to a deeper appreciation of the systematic differences between self knowledge and the knowledge of others differences that are both irreducible and constitutive of the very concept and life of the person Masterfully blending philosophy of mind and moral psychology Moran develops a view of self knowledge that concentrates on the self as agent rather than spectator He argues that while each person does speak for his own thought and feeling with a distinctive authority that very authority is tied just as much to the disprivileging of the first person to its specific possibilities of alienation Drawing on certain themes from Wittgenstein Sartre and others the book explores the extent to which what we say about ourselves is a matter of discovery or of creation the difficulties and limitations in being objective toward ourselves and the conflicting demands of realism about oneself and responsibility for oneself What emerges is a strikingly original and psychologically nuanced exploration of the contrasting ideals of relations to oneself and relations to others

The Foundations and Future of Public Law Elizabeth Fisher, Jeff King, Alison Young, 2020-01-30 Public law in the UK and EU has undergone seismic changes over the last forty years development and membership of the EU the Human Rights Act devolution the fostering of public law expertise within the judiciary the globalization of public law and the increased interaction between the academy judiciary barristers public interest groups and legislatures have transformed the public law landscape Commentators spend much time at the frontiers of the subject responding rapidly to new developments and providing guidance to scholars legislators and judges for future directions In these circumstances there is rarely a chance to reflect upon the implications of these changes for the fundamentals of public law and how those fundamentals relate to one another In this collection leading figures in UK and EU public law address this lacuna Inspired by the depth scope and ambition of the work of Paul Craig Professor of English Law at Oxford University the focus of this collection is upon exploring and reflecting upon six fundamentals of public law and the interrelationship between them legislation case law theory institutions process and constitutions

A Balanced Epistemological Orientation for the Social Sciences Charles F. Gattone, 2020-12-08 A Balanced Epistemological Orientation for the Social Sciences challenges social researchers to rethink the epistemological assumptions grounding their work It reviews the strengths and weaknesses of four salient epistemological orientations in the field positivism relativism interpretivism and intersubjectivism to identify the characteristics of a theoretically informed epistemology for social science Relying on such an epistemology means seeking a deeper understanding of the social world without losing sight of the constructed nature of one's conceptual frames It involves adopting a reflexive position with regard to the norms and traditions in one's area of specialization and in the field as a whole Epistemologically balanced social research is neither the dispassionate gathering of factual information nor the elaboration of universal assessments formed on the basis of armchair speculation It involves engaging in inquiry in an independent manner and being aware of the perspectival character of the claims being made in the attempt to shed new light on social phenomena The caliber of social science can be elevated when researchers recognize the symbolic nature of their work and

the significance of their conclusions in the larger social order A Political Theory of Territory Margaret Moore (Professor in Political Theory), 2015 Our world is currently divided into territorial states that resist all attempts to change their borders But what entitles a state or the people it represents to assume monopoly control over a particular piece of the Earth's surface Why are they allowed to prevent others from entering What if two or more states or two or more groups of people claim the same piece of land Political philosophy which has had a great deal to say about the relationship between state and citizen has largely ignored these questions about territory This book provides answers It justifies the idea of territory itself in terms of the moral value of political self-determination it also justifies within limits those elements that we normally associate with territorial rights rights of jurisdiction rights over resources right to control borders and so on The book offers normative guidance over a number of important issues facing us today all of which involve territory and territorial rights but which are currently dealt with by ad hoc reasoning disputes over resources disputes over boundaries oceans unoccupied islands and the frozen Arctic disputes rooted in historical injustices with regard to land secessionist conflicts and irredentist conflicts In a world in which there is continued pressure on borders and control over resources from prospective migrants and from the desperate poor and no coherent theory of territory to think through these problems this book offers an original systematic and sophisticated theory of why territory matters who has rights over territory and the scope and limits of these rights

Critical Social Theory Craig Browne, 2016-02-14 In this accomplished sophisticated and up-to-date account of the state of critical social theory today Craig Browne explores the key concepts in critical theory like critique ideology and alienation and crucially goes on to relate them to major contemporary developments such as globalization social conflict and neo-liberal capitalism Critical theory here is not solely the work of Adorno Horkheimer Marcuse and Habermas The book begins with the Frankfurt School but uses this as a base to then explore more contemporary figures such as Nancy Fraser Axel Honneth Luc Boltanski Cornelius Castoriadis Ulrich Beck Anthony Giddens Pierre Bourdieu Hannah Arendt A survey of critical social theory for our times this is an essential guide for students wishing to grasp a critical understanding of social theory in the modern world Charles Taylor Mark Redhead, 2002-03-04 An examination and critique of the theoretical and political

efforts of Taylor to promote deep diversity as an antidote to the process of political fragmentation in general and specifically in his home of Quebec Redhead political theory Oregon State U argues that Taylor's opposition to Quebecois separatists is equally rooted in a political theory of communitarian liberalism his political activities within the New Democratic Party of Canada and Quebec his understanding of his Catholic faith and his experiences growing up in an Anglo-French household Redhead argues that Taylor's philosophy ultimately fails to address questions of nationalist projects that simplify identity or questions of openness to different moral ontologies **Modern Political Science** Robert Adcock, Mark Bevir, Shannon C. Stimson, 2009-01-10 Since emerging in the late nineteenth century political science has undergone a radical shift from constructing grand narratives of national political development to producing empirical studies of individual political

phenomena What caused this change Modern Political Science the first authoritative history of Anglophone political science argues that the field's transformation shouldn't be mistaken for a case of simple progress and increasing scientific precision On the contrary the book shows that political science is deeply historically contingent driven both by its own inherited ideas and by the wider history in which it has developed Focusing on the United States and the United Kingdom and the exchanges between them Modern Political Science contains contributions from leading political scientists political theorists and intellectual historians from both sides of the Atlantic Together they provide a compelling account of the development of political science its relation to other disciplines the problems it currently faces and possible solutions to these problems Building on a growing interest in the history of political science Modern Political Science is necessary reading for anyone who wants to understand how political science got to be what it is today or what it might look like tomorrow
