Phonologie Panchronique:

La phonologie panchronique Claude Hagège, André Haudricourt, 1978-01-01 T00:00:00+01:00 La matière traitée par le présent volume est une nouveauté la phonologie panchronique examine les lois du changement phonétique pour toutes les langues connues d'hier et d'aujourd'hui Cela suppose le contrôle d'un grand nombre de données illustrant ces lois et leurs exceptions travers une dialectique complexe de causes internes et externes Les universaux ainsi proposés résultent la fois d'une méthode hypothético-ductive et d'une vérification empirique *Phonological Typology* Larry M. Hyman, Frans Plank, 2018-04-09 Despite earlier work by Trubetzkoy Jakobson and Greenberg phonological typology is often underrepresented in typology textbooks At the same time most phonologists do not see a difference between phonological typology and cross linguistic formal phonology The purpose of this book is to bring together leading scholars to address the issue of phonological typology both in terms of the unity and the diversity of phonological systems *Languages and Linguists* Robert Henry Robins, Henry M. Hoenigswald, André-Georges Haudricourt, 1997 The volume contains the texts of interviews realized with three linguists the late André Georges Haudricourt 1911 1996 Henry M Hoenigswald born in 1915 and Robert H Robins born in 1921 The book has a twofold objective on the one hand its goal is to bring together a number of inside testimonies on fundamental issues in linguistics on the other hand it is intended to provide a personalized documentation which is particularly relevant for a historiography of linguistics that does not limit itself to published sources The issues addressed in these interviews concern the status of linguistics and more particularly the relationship between the study of languages and history the fundamental aims of the study of language and the scientific and humanitarian status of linguistics The three interviews also shed light on the intellectual itinerary of the three linguists and on the developments which took place in the linguistic landscape during the past 65 years The three interviews are supplemented with useful bibliographical notes The preface informs about the state of the art in the oral archiving of linguistics **Phonology** Charles W. Kreidler, 2001 Phonology Critical Concepts the first such anthology to appear in thirty years and the largest ever published brings together over a hundred previously published book chapters and articles from professional journals These have been chosen for their importance in the exploration of theoretical questions with some preference for essays that are not easily accessible Divided into sections each part is preceded by a brief introduction which aims to point out the problems addressed by the various articles and show their relations to one another **The Bantu Languages** Mark Van de Velde, Koen Bostoen, Derek Nurse, Gérard Philippson, 2019-01-30 Written by an international team of experts this comprehensive volume presents grammatical analyses of individual Bantu languages comparative studies of their main phonetic phonological and grammatical characteristics and overview chapters on their history and classification It is estimated that some 300 to 350 million people or one in three Africans are Bantu speakers Van de Velde and Bostoen bring together their linguistic expertise to produce a volume that builds on Nurse and Philippson's first edition The Bantu Languages 2nd edition is divided into two

parts Part 1 contains 11 comparative chapters and Part 2 provides grammar sketches of 12 individual Bantu languages some of which were previously undescribed The grammar sketches follow a general template that allows for easy comparison Thoroughly revised and updated to include more language descriptions and the latest comparative insights New to this edition new chapters on syntax tone reconstruction and language contact 12 new sketch grammars thoroughly updated chapters on phonetics aspect tense mood and classification exhaustive catalogue of known languages with essential references This unique resource remains the ideal reference for advanced undergraduate and postgraduate students of Bantu linguistics and languages It will be of interest to researchers and anyone with an interest in historical linguistics linguistic typology and grammatical analysis

History of the Language Sciences / Geschichte der Sprachwissenschaften / Histoire des sciences du langage. 2. Teilband Sylvain Auroux, E.F.K. Koerner, Hans-Josef Niederehe, Kees Versteegh, 2008-07-14 Volume 2 treats in great detail and at times quite innovatively the individual stages of development of the study of language as an autonomous discipline from the growing awareness in 17th and 18th century Europe of genetic relationships among a host of languages to the establishment of comparative historical Indo European linguistics in the 19th century from the generation of the Schlegels Bopp Rask and Grimm to the Neogrammarians and the application of the comparative method to non Indo European languages from all over the globe Typological linguistic interests first synthesized by Humboldt as well as the development of various other non historical endeavours in the 19th and the first half of the 20th century such as language and psychology semantics phonetics and dialectology receive ample attention

Historical Linguistics 1999 Laurel J. Brinton, 2001-08-09 This is a selection of papers from the 14th International Conference on Historical Linguistics held August 9 13 1999 at the University of British Columbia From the rich program and the many papers given during this conference the present twenty three papers were carefully selected to display the state of current research in the field of historical linguistics

Introduction to Indo-European Linguistics Oswald Szemerényi, Oswald John Louis Szemerényi, 1999 Professor Szemerényi's Einführung in die vergleichende Sprachwissenschaft first published in 1970 remains the standard introduction to comparative Indo European linguistics Updated and revised for its English translation it appears here in a new paperback format The introductory section presents a general survey of the principles of diachronic comparative linguistics and the remainder of the book is a thorough and detailed analysis according to those principles of the phonological and morphological structure of the Indo European group of languages Each section of the book has a detailed bibliography so that the student can progress from the general overview to a more detailed examination of particular topics

The Synchronic and Diachronic Phonology of Ejectives Paul D. Fallon, 2013-12-16 This study is the first book length examination of ejectives and their phonological patterning deepening the empirical understanding of ejectives and contributing to both phonological theory and to typologies of sound change

Perspectives on Historical Linguistics

Winfred Philipp Lehmann, Yakov Malkiel, 1982-01-01 This volume presents seven extensive essays by specialists in their respective fields of historical linguistics The first essay after the Introduction states the principles presented in *Directions for Historical Linguistics* 1968 and assesses the progress made since then towards constructing a general theory of language change Like the following essays on phonology and morphology it poses new questions that have arisen in the increasingly ambitious research Historical attention to discourse the topic of the next essay is virtually new though it too finds predecessors among philologists who devoted themselves to texts Finally two essays treat etymology one concentrating on the rigorously investigated Romance field the other on Indo European especially on new insights prompted by attention to Hittite

The Dialect Laboratory Gunther De Vogelaer, Guido Seiler, 2012 Much theorizing in language change research is made without taking into account dialect data Yet dialects seem to be superior data to build a theory of linguistic change on since dialects are relatively free of standardization and therefore more tolerant of variant competition in grammar In addition as compared to most cross linguistic and diachronic data dialect data are unusually high in resolution This book shows that the study of dialect variation has indeed the potential perhaps even the duty to play a central role in the process of finding answers to fundamental questions of theoretical historical linguistics It includes contributions which relate a clearly formulated theoretical question of historical linguistic interest with a well defined solid empirical base The volume discusses phenomena from different domains of grammar phonology morphology and syntax and a wide variety of languages and language varieties in the light of several current theoretical frameworks

Tinrin Grammar Midori Osumi, 1995-01-01 This book presents an analysis of the phonology morphology and syntax of Tinrin a previously undescribed Melanesian language of southern New Caledonia

On the Death and Life of Languages Claude Hagège, 2009-01-01 Twenty five languages die each year at this pace half the world's five thousand languages will disappear within the next century In this timely book Claude Hagège seeks to make clear the magnitude of the cultural loss represented by the crisis of language death By focusing on the relationship of language to culture and the world of ideas Hagège shows how languages are themselves crucial repositories of culture the traditions proverbs and knowledge of our ancestors reside in the language we use His wide ranging examination covers all continents and language families to uncover not only how languages die but also how they can be revitalized for example in the remarkable case of Hebrew In a striking metaphor Hagège likens languages to bonfires of social behavior that leave behind sparks even after they die from these sparks languages can be rekindled and made to live again

Historical Linguistics Charles Jones, 2014-02-04 The contributors to this volume cover the international range of scholarship in the field of Historical Linguistics as well as some of its major themes The work and ideas they discuss are relevant not only to other aspects of Historical Linguistics but also to more general developments in linguistic theory Along with Professor Jones Introduction their comments provide a major overview of Historical Linguistics that will be the reference point for its development for many years to come and form an important contribution to general theories of

linguistic behaviour **The Language Builder** Claude Hagège, 1993-06-11 Linguistics as a social science should have something to teach us about humans as social beings However modern grammatical theories regard languages as autonomous systems so these theories are little concerned with speakers and hearers their interactions and their relationship to the world around them Further these theories tend toward excessive concern with methodology and the properties of linguistic systems neglecting in fact the languages themselves and those who use them in everyday life Even the shift toward cognitive approaches promising for their new insights into the brain still misses an equally important aspect of language namely a framework which would account for the social activity by which speakers build linguistic structures in order to meet the requirements of communication Based on a wide range of languages Hagège's work sheds light on the human language building activity He argues that the conscious and unconscious signatures of human nature are written everywhere in language The study of these signatures gives insight into basic characteristics of human beings tends to re-humanize linguistics and stresses the importance of language as a dynamic activity as opposed to a self-contained system

Principles of Historical Linguistics Hans Henrich Hock, 2021-10-25 Historical linguistic theory and practice consist of a large number of chronological layers that have been accepted in the course of time and have acquired a permanence of their own These range from neogrammarian conceptualizations of sound change analogy and borrowing to prosodic lexical morphological and syntactic change and to present day views on rule change and the effects of language contact To get a full grasp of the principles of historical linguistics it is therefore necessary to understand the nature of each of these layers This book is a major revision and reorganization of the earlier editions and adds entirely new chapters on morphological change and lexical change as well as a detailed discussion of linguistic palaeontology and ideological responses to the findings of historical linguistics to this landmark publication

The Languages and Linguistics of Mainland Southeast Asia Paul Sidwell, Mathias Jenny, 2021-08-23 The handbook will offer a survey of the field of linguistics in the early 21st century for the Southeast Asian Linguistic Area The last half century has seen a great increase in work on language contact work in genetic theoretical and descriptive linguistics and since the 1990s especially documentation of endangered languages The book will provide an account of work in these areas focusing on the achievements of SEAsian linguistics as well as the challenges and unresolved issues and provide a survey of the relevant major publications and other available resources We will address Survey of the languages of the area organized along genetic lines with discussion of relevant political and cultural background issues Theoretical descriptive and typological issues Genetic classification and historical linguistics Areal and contact linguistics Other areas of interest such as sociolinguistics semantics writing systems etc Resources major monographs and monograph series dictionaries journals electronic data bases etc Grammar sketches of languages representative of the genetic and structural diversity of the region Papers in the History of Linguistics Hans Aarsleff, L.G. Kelly, Hans-Josef Niederehe, 1987-01-01 This volume presents a selection of slightly revised versions of papers from the third

Auxiliation Tania Kuteva, 2004 Auxiliation describes the process by which auxiliary verbs such as do may must will and have develop from lexical verbs meaning exist possess hold etc The sequence of verb followed by complement turns into the grammatical structure of marker followed by main verb This transformation which involves morphosyntactic semantic and phonological changes can be seen operating in the same direction across many if not all languages There is no accepted theory to explain it Tania Kuteva presents a cross linguistic study of the phenomenon She seeks a to explore the cognitive forces underlying auxiliation b to shed light on how auxiliation relates to discourse and to pragmatic considerations and c to show the relation between the conceptual semantic and discourse pragmatic factors at work in the process Combining recent grammaticalization theory with insights from the psychology of language use the author also offers a new perspective on how grammaticalization occurs in everyday linguistic communication The book makes significant contributions to an explanatory theory of auxiliation to the study of language change and to the understanding of linguistic communication
